## **OEO/ADA Compliance Statement**

The Commission is administratively attached to the Alaska Department of Fish and Game.

The Alaska Department of Fish and Game (ADF&G) administers all programs and activities free from discrimination based on race, color, national origin, age, sex, religion, marital status, pregnancy, parenthood, or disability. The department administers all programs and activities in compliance with Title VI of the Civil Rights Act of 1964, Section 504 of the Rehabilitation Act of 1973, Title II of the Americans with Disabilities Act of 1990, the Age Discrimination Act of 1975, and Title IX of the Education Amendments of 1972.

If you believe you have been discriminated against in any program, activity, or facility please write:

- ADF&G ADA Coordinator, P.O. Box 115526, Juneau, AK 99811-5526
- U.S. Fish and Wildlife Service, 4401 N. Fairfax Drive, MS 2042, Arlington, VA 22203
- Office of Equal Opportunity, U.S. Department of the Interior, 1849 C Street NW, MS 5230, Washington DC 20240.

The department's ADA Coordinator can be reached via phone at the following numbers:

- (VOICE) 907-465-6077
- (Statewide Telecommunication Device for the Deaf) 1-800-478-3648
- (Juneau TDD) 907-465-3646
- (FAX) 907-465-6078

## **Abstract**

This report provides basic data and background information specific to emergency transfers of Alaska's commercial fisheries limited entry permits. The annual number of emergency transfers is shown by individual fishery and for all fisheries combined. Data is provided on the residency (rural/urban, local/ nonlocal, and Alaska/non-Alaska residents) and ages of persons who transfer and receive permits by emergency transfer. Summary information from a mandatory survey of the parties who emergency transfer permits is provided, showing the various reason(s) given for transfers, the relationships between the parties to emergency transfers, and the financial terms associated with transfers.

The report also provides details on emergency transfer regulations, and mentions some of the policy considerations for implementing the regulations.

Prepared by Marcus Gho and Yvonne Fink

## **Acknowledgements**

Special thanks to Craig Farrington for his insights and contributions to this document.

The previous version of this report was published August, 2014 as CFEC report 14-5N and was authored by the following CFEC employees: Kurt Iverson, Yvonne Fink, and Marcus Gho.

## Introduction

In 1972, Alaska's constitution was amended to allow limited entry in the state's commercial fisheries. Following the amendment, in 1973 the Alaska State Legislature enacted Alaska's Limited Entry Act, creating the state's limited entry program and giving the Commercial Fisheries Entry Commission (CFEC or commission) the responsibility for administering the program.<sup>1</sup>

State statutes require that limited entry permits shall be issued only to individuals.<sup>2</sup> Permit holders must renew their permits annually. Most permits are transferable.<sup>3</sup> Transferable permits can be sold, traded, or passed between individuals as gifts. Permits may also be conveyed as an inheritance. To permanently transfer a permit to another individual, the permit holder initially files a notice of intent to transfer with CFEC. After a 60-day period following the notice, CFEC can process the permit transfer.<sup>4</sup> To receive a permit, the recipient must demonstrate a present ability to actively engage in the fishery.

In addition to authorizing the permanent transfer of limited entry permits, state statutes also provide a means for the temporary transfer of permits if an unforeseen event prevents the permit holder from fishing.<sup>5</sup> Emergency transfers allow a permit to be temporarily held and fished by someone other than the permanent permit holder when "... illness, death, disability, required military or government service, or other unavoidable hardship of a temporary, unexpected, and unforeseen nature prevents the transferor from participating in the fishery."

Unless the commission specifies otherwise, an emergency transfer is effective until the nature of the emergency ends, or until the end of the season, whichever comes first. At that point, the permit reverts back to the original holder.

Permanent and emergency transfers are governed by state statutes and regulations. CFEC staff must carefully review the terms of each transfer to ensure the transaction conforms to the laws and regulations. Current regulations for emergency transfers can be found at 5 AAC 05.1740 and are shown in full in Appendix B.

## Abbreviations

The following abbreviated terms are defined below and used throughout this document.

*Emergency transfer (ET).* An ET is a temporary assignment of a permit that expires either on the last day of the same calendar year or sooner. An individual who holds an ET permit has all the privileges of participating in the specific fishery allowed by the permit as any other permit holder in the fishery with the same permit type.

*Interim-use permit (IUP).* An IUP is issued annually for all commercial fisheries which are not under entry limitation as well as to applicants waiting to find out if they qualify for a permanent permit.

*Permanent transfer (PT).* A PT occurs when a permit holder allocates all interest in a permit to another individual.

## General Notes on the Data Presented in the Tables

CFEC issues two general classes of commercial fishing permits: IUPs and limited entry permits. Limited entry permits are issued in fisheries that have undergone limitation. IUPs are issued primarily in open-access fisheries, but they are also issued to individuals in limited fisheries during the period when a person's application for a limited permit is being processed, and also during the period after the fishery has been

---

<sup>2</sup> AS 16.43.990 (7).

<sup>3</sup> AS 16.43.170.

<sup>4</sup> For permit transfers from estates, the 60-day notice is waived.

<sup>5</sup> AS 16.53.180.

limited, but before the application period would begin. All CFEC permits are defined by regulation as a distinct finfish or shellfish species (or a combination of species), a gear type, and an administrative area.

The first limited entry permits were issued in 1975 in 19 of the state's salmon fisheries. Since then, more fisheries have been limited at different points in time. By the end of 2015, limited entry permits had been issued in 65 fisheries: 26 salmon fisheries; 19 herring fisheries; 9 crab fisheries; 5 sablefish fisheries; 3 shrimp fisheries; and 3 dive fisheries (geoduck, sea cucumber, and sea urchin).

In some limited fisheries, CFEC created more than one permit type to help constrain increases in fishing power. Some of the permit constraints restrict the amount of gear that can be used, while others limit the length of the vessel. In other fisheries, non-severable permits were issued which combine permissible gear types and/or harvestable species. To date, a total of 79 permit types have been issued in the 65 limited fisheries.<sup>6</sup>

Appendix A provides a table that lists the state's limited entry fisheries, and shows statistics on the number of permanent permits initially issued. The table is excerpted from the CFEC report 16-3N *Changes in the Distribution of Alaska's Limited Entry Permits, 1975-2015*.

Some sections of this report provide time-series data for individual fisheries. In particular, for fisheries shown in Table 4, the first year in the time series corresponds to the year when limited entry was adopted and limited permits (either permanent or interim-use) were first issued for the fishery. Normally, the bulk of limited entry permits are issued within the first two years after a fishery is limited; however, some permits might not be issued for several years if a person's application is denied and the applicant contests their initial determination through the CFEC appeals process. Applicants who are awaiting final adjudication of their permit claims can continue to fish using IUPs during the intervening period. As a result, unless otherwise noted, figures referring to the 'total number of permits' in a fishery represent the combined totals of interim-use and permanent permits for each respective year. On occasion, a person might hold both an IUP and a permanent permit in a fishery in the same year. In these circumstances, the tables count only the permanent permit in the 'total number of permits' category.

Four distinct fisheries were subject to a moratorium on new participants prior to the date when CFEC implemented the fishery's limited entry program. The fisheries and the respective moratorium years include the Southeast Alaska Dungeness crab pot fishery (1992-1996) and the Southeast Alaska sea urchin, sea cucumber, and geoduck dive fisheries (1996-2000). Because statutes authorize ETs of IUPs in fisheries subject to a moratorium, the moratorium years are included in the tables for these respective permit types.

Not all limited entry fisheries are shown in the tables specific to permit types – Tables 4, 5, 9, and 10. If no ETs have occurred in a permit type, it will not appear in the tables.

Data for Table 8 (Relationship of Parties in the Transfer), Table 11 (Reasons for Transfer), and Table 12 (Terms of the Transfer) come primarily from the survey portion of the CFEC ET forms. In a small number of cases, the survey data is incomplete, which accounts for the differences in the totals between these tables and the tables that summarize all ETs.

ET forms have changed over the years, including the survey questions that were added to the forms in 1994. Many of the statistics in this report are therefore restricted to the years from 1994 through 2015.

---

<sup>6</sup> By the end of 2015, maximum number regulations had been adopted for 66 limited fisheries. No permanent entry permits have been issued for the Prince William Sound sablefish pot gear fishery; therefore, the permit type does not appear in this report. In addition, 2 fisheries were placed under a vessel limited entry program from 2004. Statutes that enabled one of the vessel-permit programs were allowed to sunset by the Alaska Legislature in 2013. Traditional ETs were not authorized in the vessel-permit program.

## Basic Procedures for Granting an ET

To initiate an ET, a permit holder completes the CFEC form *Request for Emergency Transfer of Entry Permit*. The form requires the transferor to explain in detail the nature of the emergency, and, if it is a medical emergency, to provide a statement from the examining physician indicating the onset of the condition, the diagnosis, and the treatment.

The parties to an ET are required to provide the terms of their agreement. They also indicate the status of their relationship. Each party completes his/her respective section; the form is signed by both parties and is notarized.

If the basis for an ET continues into the following year, CFEC may grant a second transfer for the second year. After the second year, CFEC will not grant an ET unless the permit holder demonstrates an extraordinary circumstance that is allowable under the regulations.

There are no special provisions under the law authorizing CFEC to issue ETs due to old age or for chronic medical problems. Nor are matters of choice, such as working another job, acceptable under the regulations as reasons for granting an ET.

CFEC staff place a high priority on processing ETs. For example, in 2015, 80% of the requested transfers were fully processed within two days of their receipt at CFEC. In the event of a sudden emergency during the fishing season, a transfer will often be completed immediately by CFEC staff. The recipient of the transferred permit can begin fishing as soon as practicable using a copy of the completed ET form signed by CFEC staff. The recipient's embossed plastic CFEC "permit card" is mailed to them within two days.

If an applicant's request for an ET is denied by the CFEC Licensing staff, regulations allow the applicant to contest the denial by requesting an administrative hearing before a CFEC paralegal or hearing officer.<sup>7</sup> As a quasi-judicial agency, CFEC hearings are governed by administrative procedural rules, including rules of evidence. Decisions are issued based upon the record. As with all ETs, hearings requested during the fishing season are given high priority, and are normally resolved within one to three days. Most hearings are conducted by telephone.

Following a decision by a hearing officer or paralegal, applicants may appeal again if they so desire, this time by filing a petition for administrative review to the CFEC commissioners. Relatively few requests for ETs are appealed to the commissioners. However, to ensure consistency with the governing statutes and regulations, all transfer cases that were brought to a paralegal or hearing officer are eventually reviewed by the commissioners. At their discretion, the commissioners may issue a concurring opinion or overturn the hearing officer's ruling. In reaching their decision, the commission's review may also offer clarifications of law or regulations.

Note that many of the appealed decisions have resulted in granting an ET, but because the final decision has not been written they remain in adjudication status (see Table 1).

• Data is as of October 25, 2016.

## Regulation Changes

ETs are based on the premise of providing relief to permit holders when they are faced with a temporary hardship that prevents them from fishing. Alaska statutes generally prohibit the leasing of entry permits, but regulations specify exceptions in the case of ETs.<sup>8</sup> The rules provide individuals an opportunity to mitigate some of their difficulty by gaining back a portion of the revenue they lost by not fishing, and, as a policy consideration, help dependent individuals retain their permits over the long term.

ET regulations were first adopted in 1975 and are specifically authorized by statute.<sup>9</sup> The basic criteria for a transfer were originally written as follows:

*The commission will grant an emergency transfer if the proposed transferee is presently able to participate actively in the fishery and if the transferor establishes that sickness, injury, or other unavoidable hardship prevents him from participating in the fishery.*

<sup>8</sup> AS 16.43.150(g) and 20 AAC 05.1705.

<sup>9</sup> AS 16.43.180 and currently 20 AAC 05.1740; formerly 20 AAC 05.740.

Since then, the regulations have been amended several times. It appears that the most significant changes were made in the early 1980s. For example, in January 1980, the section was rewritten to specify the terms for the ET of IUPs, and to provide additional examples of unavoidable hardship:

*The commission will grant an emergency transfer of an entry or interim-use permit if the proposed transferee is not a permit holder in the fishery and is presently able to participate actively in the fishery, and if it is established that illness, disability, death, required military or government service, or other unavoidable hardship prevents the transferor from participating in the fishery.*

And in January 1983, a new section was added that put limits on granting ETs repeatedly over subsequent years:

*Except for extraordinary circumstances, requests for an emergency transfer in subsequent years will be considered only upon a showing of a new unavoidable hardship of an unexpected and unforeseen nature which prevents the permit holder from fishing.*

Then later, in November 1994, a “subsequent years” provision was amended to allow an ET on the same basis for a second year. Apart from the changes noted above, other minor modifications have been made to the regulations, none of which have significantly altered the basic criteria for an ET.

In 2015 and 2016, regulations 20 AAC 05.1725 (c) and 20 AAC 05.1946 (3) (B) were modified to accommodate an ET of a second permit in a salmon fishery when it’s aid of an otherwise legitimate PT that can’t be done in time to get the permit fishing for the current season.

Finally, in 2016, regulation 20 AAC 05.1740 (b) was updated to put into regulation the practice of emergency transfer-permanent transfer, which is further described in this report.

## **ETs of Non-transferable and IUPs**

Some limited entry permits are non-transferable. Under the statutes, when CFEC determines that limited entry is necessary in an open-access fishery, the agency first establishes the maximum number of permits that will be issued. Following adoption of the maximum number, CFEC develops a point system that ranks individuals who apply for a permit. The point system rankings reflect the relative hardship an applicant would bear if excluded from the fishery. Within the hardship rankings, the agency is required to determine a minor economic hardship point level. Eligible applicants who accrue points at or below the minor economic hardship level are issued non-transferable permits. Non-transferable permits remain valid for the permit holder’s lifetime, but they cannot be passed to other individuals and the permits are permanently forfeited when the permit holder dies. All limited entry permits – both transferable and non-transferable – must be renewed each year, and can be revoked if the permit holder fails to renew the permit for two consecutive years. From 1975 through 2015, CFEC issued a total of 16,593 limited entry permits: 14,217 were transferable, and 2,376 were non-transferable.<sup>10</sup>

ETs of non-transferable permits are permissible, but only under certain conditions consistent with regulations.<sup>11</sup> The transfer request must come during the fishing season, and will be granted only to allow the continued use of the permit in a fishing operation.

IUPs issued in limited entry fisheries are also authorized for ETs. State statutes and regulations specify that if a fishery is undergoing a moratorium or limited entry program, and an applicant’s status is not yet finalized, CFEC is authorized to grant an ET of the applicant’s IUP.<sup>12</sup> The standard for granting an ET of an IUP is not as rigorous as that of transferring a standard permanent permit. Under the IUP circumstances, the statute

---

<sup>10</sup> CFEC Report 16-3N-Exec; *Changes in the Distribution of Alaska’s Limited Entry Permits, 1975 - 2015*.

<sup>11</sup> 20 AAC 05.1740 (b).

<sup>12</sup> AS 16.43.180 and 20 AAC 05.1740 (a).

calls for granting an ET “...to alleviate hardship.” Moreover, IUPs may be transferred repeatedly from one year to the next. It is likely the legislature adopted this more relaxed standard due to concerns that the IUP holder cannot permanently transfer their permit until their permit claim has been made final by the commission.

The more lenient standard for granting ETs for IUPs has raised questions in the past. At present, however, the vast majority of permit applications have been adjudicated, and there are far fewer instances where these standards might apply.<sup>13</sup>

Moreover, the commission has attempted to contain interim-use ETs by providing the following restrictive definition of hardship in 20 AAC 05.1770(13):

*“hardship,” with respect to the emergency transfer of interim-use permits, means privation and suffering, and does not include the results of a permit holder’s own economic decisions, nor the results of economic, biological, or regulatory variables which are normally part of the risk of doing business as a fisherman.*

There is a provision in the regulations that allows ETs of IUPs in open access fisheries. The transfers would occur only under special circumstances that allow a fishing operation to continue if obtaining another IUP is exceptionally time-consuming or difficult.<sup>14</sup> These circumstances have occurred very rarely and were more common in the past, when communication technology was less developed.

## **Other ETs Specifically Authorized by Statute**

AS 16.43.180 also authorizes the temporary ET of entry permits in the event of required military or government service, or if a permit becomes part of an estate due to the death of a permit holder. Regulations allow permits in an estate to be emergency transferred beyond two years, pending the final disposition of the permit holder’s assets.<sup>15</sup>

The statutes that apply to required military or government service were added by the Legislature in 1978, and the definitions for the services are provided in the regulations.<sup>16</sup> Included in this service category are assignments required by law in federal, state, or local governments. This also includes some forms of voluntary service, provided the service is not the permit holder’s primary occupation. Most commonly, transfers in this category apply to permit holders who serve on the Alaska Board of Fisheries or in the Alaska Legislature, and who have to forgo fishing in order to serve the State. Military service by persons who serve in the National Guard or other military reserve forces would also be included.

## **Emergency Transfer-Permanent Transfer (ET-PT)**

To initiate a *permanent* transfer of an entry permit, a permit holder must first file a *Notice of Intent to Transfer* form with CFEC. After the form is received, there is a 60-day waiting period before the PT can take place.

Occasionally, emergency (temporary) transfers arise out of situations where two parties have a permit sale agreement, but the required 60-day waiting period interferes with the recipient’s ability to participate in the fishery. Under these circumstances, CFEC will consider issuing an Emergency Transfer-Permanent Transfer, or ET-PT. The transaction is first processed as a temporary transfer, which allows the recipient to use the permit immediately. Then, at a point in time past the 60-day waiting period, a second transfer is administered

---

<sup>13</sup> As of June 1, 2016, twenty-nine applications were pending a final determination, and the applicants might qualify for an ET of their IUP. Seven applications were before hearing officers, 21 were before the commissioners, and 1 was under remand to the commission from the Alaska Superior Court.

<sup>14</sup> 20 AAC 05.1740 (b).

<sup>15</sup> 20 AAC 05.1740 and 05.1750.

<sup>16</sup> § 5 ch 123 SLA 1978 and 20 AAC 05.1770 (a) (11) and (12).

to secure the transaction permanently. This second transfer, the permanent transfer, typically occurs after the fishing season ends.

An ET-PT is issued by CFEC with strict requirements. The parties to the sale must first submit all the required documents for the eventual sale of the permit. They must also provide a signed statement specifying why the temporary transfer is necessary to avoid lost fishing time due to the 60-day waiting period. The documents are carefully reviewed and validated by the licensing staff before granting and processing the temporary transfer.

Since 1994, CFEC has issued 2,071 ET-PTs. A small number of ET-PTs (133, or 6.4% of the total ET-PTs<sup>17</sup>) have failed to result in a PT between the two parties after the ET was issued. Many of these were the result of unforeseen and often tragic circumstances to at least one of the parties of the transfer. For example, after an ET is issued the subsequent sale might fall through if the permanent permit holder dies and the permit enters probate. Divorces, accidents, and other personal circumstances might also prevent the intended sale. In some cases, CFEC has had reason to question whether the parties to the transaction might be attempting to use an ET-PT to circumvent the medical or true emergency requirements of a traditional ET. Under these circumstances, CFEC staff will require additional information before completing the transfer. It is not uncommon for CFEC to deny a request for an ET-PT. As with all denials of permit transfers, the applicants have the right to appeal the denial to a hearing officer.

Licensing staff reviewed all of the 2015 failure to transfer ET-PTs; all but one of these were permanently transferred in 2016 after the fishing season ended; the majority of the ET-PTs were not finalized were in fisheries that start late in the year and do not conclude until early the next year. Had the fishing season for these permits not span both 2015 and 2016, they would have transferred sooner.

## **ETs of Two Years or More**

As mentioned, an ET is effective until the nature of the emergency ends, or until the end of the season (in practice, normally the end of the calendar year), whichever comes first. At that point, the permit will, by default, go back to the original holder.

The regulations do, however, authorize a second ET when the condition that prevented the permit holder from participating in the fishery persists, and prevents the permit holder from participating in the following year.<sup>18</sup> This portion of the regulations was passed in 1994, although prior to that time, commission policy had allowed repeated transfers under certain circumstances.

Allowing two years helps the commission address situations where emergencies might last more than one year but the nature of the emergency does not prevent an individual from fishing at a point in time in the future.

---

<sup>17</sup> CFEC internal licensing statistics.

<sup>18</sup> 20 AAC 05.1740 (i).

The conditions under which ETs may be extended beyond two years are currently specified as follows:

- (1) a new unavoidable hardship of an unexpected and unforeseen nature that prevents the permit holder from fishing; or
- (2) a continuation of the basis for the first emergency transfer in addition to extraordinary circumstances; for purposes of this paragraph, “extraordinary circumstances” are circumstances beyond the control of the permit holder that can be addressed by granting an emergency transfer, such as

(A) the failure of a good faith attempt to participate in the fishery;

(B) a realistic intent to return to the fishery within a reasonable period of time after the first emergency transfer based upon a high probability of removal of the disability or unavoidable hardship that gave rise to the first emergency transfer; or

(C) an intent to permanently transfer the permit that cannot presently be fulfilled in spite of substantial, good faith efforts to do so; “extraordinary circumstances” do not include the effects of economic, biological, or regulatory variables that are normally part of the risk of doing business as a fisherman, such as an economic choice, retirement from the fishery, permanent illness or disability, or lack of a market for the sale of a permit.

This subset of regulations emphasizes extraordinary circumstances and potential hardship faced by permit holders. Using this standard, the commission may review transfers on a case-by-case basis, and focus more highly on the nature and extent of a situation that might give rise to an ET. As a matter of policy, the commission must attempt to hit a balance between portions of the law that disallow the leasing of permits and avoiding the potential of creating of a class of “absentee landlords” of fishing permits, while at the same time adhering to other portions of the law that allow ETs, with the goal of serving fishermen and fishing families who have legitimate intentions of remaining in the fishery but who are faced with a temporary hardship.

Following the second grant of an ET, licensing staff warn the permit holder in writing that future ETs are unlikely to be granted and will only be considered if the applicant can show a new or an extraordinary circumstance.

AS 16.43.180 authorizes continuing ETs beyond two years for both IUPs and permits which are part of an estate. Permits held by persons who are committed to certain government services are also allowed ETs that might go beyond two years.

Another class of permits that could be emergency transferred for more than two years are those associated with the *Wassillie v. CFEC* (1975) court settlement. *Wassillie* class members were allowed to apply for permanent entry permits in the salmon fisheries long after the qualification date due to misadvised or lack of adequate assistance they received during the original application period. By the time the case was settled and individual claims had been adjudicated, many of the successful applicants were elderly and too disabled to participate in the fishery. The commission allowed these applicants an extraordinary circumstances status to compensate for the years they were excluded from the fishery. This status also allowed successful *Wassillie* applicants to ET their permits for more than two consecutive years.

## Number of ETs

*Table 2: Summary of ETs of Limited Entry Permits for All Fisheries Combined, 1994-2015*

*Table 3: IUPs in ETs*

*Table 4: Summary of ETs of Limited Entry Permits, by Permit Type, 1975-2015*

Table 2 and Figure 1 provide a summary of the number of ETs of limited entry permits by category for each year since 1975. The total number of permits eligible for an ET is provided in the second column of Table 2. This figure includes the sum of all limited entry and IUPs that were issued in limited fisheries, plus any IUPs that may have been issued in fisheries that were temporarily subject to a moratorium on new entrants.

Five categories of ETs are shown for each year. The annual rate of ETs is expressed as the total number of ETs relative to the total number of eligible permits that were issued.

Table 2 and Figure 1 also help illustrate how the number of ETs steadily rose over time to peak in the years from 1993 through 2000. These years correspond to a period of high earnings in the salmon fisheries statewide. The bulk of ETs have occurred in the salmon fisheries.

Note that the categories for ET-PT and Government Service do not show any transfers until 1994 and 1995, respectively. This is an artifact of data collection: ET survey forms did not include a means to track the categories prior to 1994. Although there are no statistics for the categories before 1994, ET-PT and Government Service ETs were in fact granted as far back as the mid- 1980s.

Also note that Table 2 provides unique counts of ETs of IUPs and permits associated with estates; however, the two categories are not completely exclusive from one another. In many cases, the death of a permit holder who held an IUP in a limited fishery is good cause for an ET of his/her permit until the permit holder's estate can be fully settled. Table 3 helps illustrate the overlap of the two categories. For the sake of establishing either/or categories, Table 2 groups these blended IUP/Estate transfers into the IUP category.

Table 4 provides data similar to Table 2, but breaks out the information by permit types of the limited fisheries. The first year in a permit type series corresponds to the year when IUPs or permanent permits were first eligible for ET in the fishery.

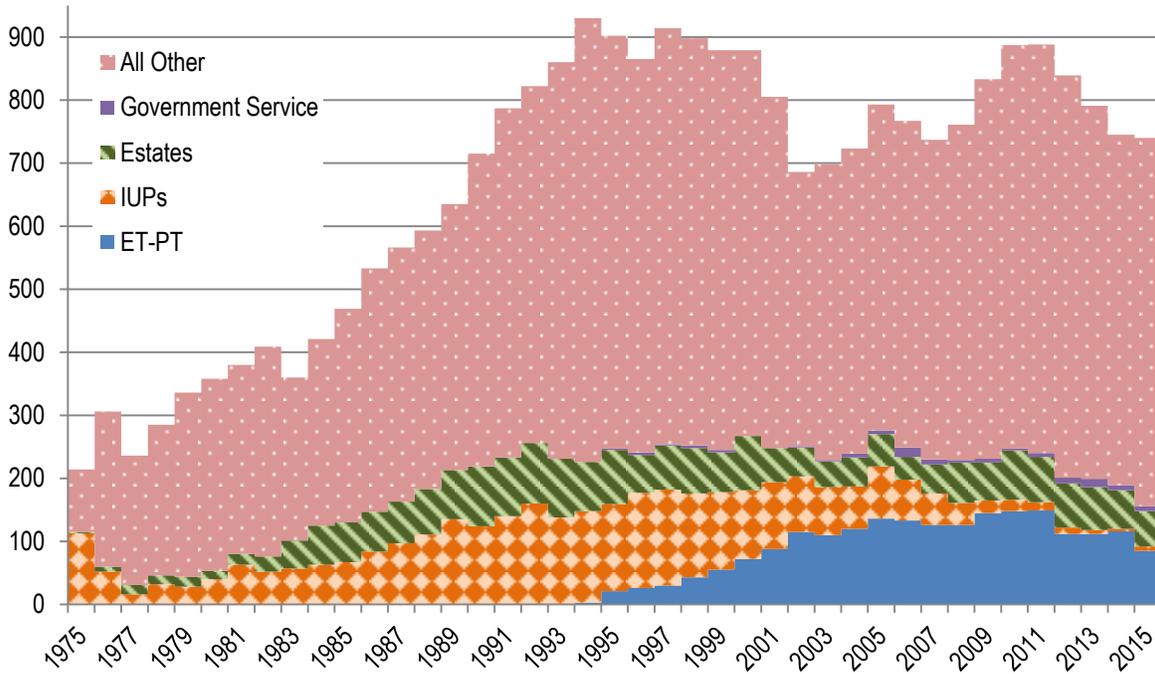

Similar to Table 2, the figures in Table 4 for 'Total Permits Issued' represent the sum of IUPs and permanent permits that were issued in fisheries that were subject to limited entry. "Total Permits Issued" therefore represents the number of permits that were eligible for ET in each year. On occasion, a person will hold both an IUP and a permanent permit in a fishery in the same year. In these circumstances, the tables count only the permanent permit in the 'Total Permits Issued' column.

**Table 2. Summary of ETs of Limited Entry Permits for All Fisheries Combined, 1975-2015**

Year	Total Permits Issued	Category of ET					Total ETs	Rate of ETs
		ET-PT	IUPs	Estates	Government Service	All Other		
1975	8,158		113	2		99	214	2.6%

2015	14,122	85	7	56	8	584	740	5.2%

- 'Total Permits Issued' represents permits eligible for ET. It is the sum of all permanent and IUPs issued in limited fisheries or in fisheries that were subject to a temporary moratorium on new entrants. If a person held both an IUP and a permanent permit in the same year for a fishery, only the permanent permit is counted.
- Some ETs of IUPs are the result of a permit holder's mandatory government service, or because the IUP has become part of an estate. In this table, all transfers of IUPs are combined in the "IUPs" column. For a detailed breakout of categories of transfers of IUPs, see Table 3.
- ET surveys were not in place prior to 1994; as a result, data for 'ET-PT' and 'Government Service' transfers are not available for those years.

Data provided in Table 4 indicates that within salmon management areas, set gillnet permits tend to have somewhat higher rates of ETs than other permit types. In contrast is the salmon hand troll fishery that occurs in Southeast Alaska has had a moderately low all-years ET rate of 1.1%.

Among all fisheries, the highest rates of ETs are consistently found in the sablefish longline fisheries in Southeast Alaska, where rates have been as high as 57.7% (2006). For permits in both the Northern and Southern Southeast sablefish fisheries, a substantial number of the ETs were associated with interim- use permits. ETs of IUPs are subject to a somewhat less rigorous standard for approval than permanent permits, as was explained in previous sections. The Southeast king crab fisheries show similar trends as the sablefish fisheries, with relatively high ET rates, again influenced by a significant number of IUPs. Table 4 illustrates how individual fisheries can influence statewide statistics on ETs. The combined set and drift gillnet salmon fisheries in Bristol Bay represented 37.2% of all ETs processed by CFEC by the end of 2015. Note that these two fisheries encompass 20.5% of all permits that could have been emergency transferred over the same time period. The Bristol Bay drift gillnet fishery alone, which has the highest number of permit holders of all limited entry fisheries, frequently accounts for over 200 ETs per year.

Table 4 also indicates that some permit types account for minimal or no ETs over lengthy periods of time. These permits usually apply to fisheries that have been closed, either for conservation reasons or due to market conditions. Notable examples include permits for Cook Inlet Dungeness crab, Bristol Bay herring roe on kelp, and the herring fisheries in Prince William Sound and Cook Inlet. Other permits, such as those for the herring fisheries in Western Alaska - Goodnews Bay, Nelson and Nunivak Islands, Cape Romanzof, and Norton Sound – also show very low ET rates. Again, this is probably due to inconsistent participation in the fisheries, which have been impacted in recent years by market conditions.

The moratorium years in the Southeast Alaska Dungeness crab pot fishery were from 1992 through 1996. Table 4 shows two classes of permits issued for the fishery in those years, depending upon the length of the participating vessel: under 50 feet, or 50 feet and over. When the moratorium ended and a limited entry program was implemented in 1997, the regulations created four classes of Dungeness crab permits, each one corresponding to a specific number of allowable pots. As a result, the tables in the fishery-specific sections of this report show Southeast Alaska Dungeness crab permits separated into distinct types for moratorium and post-moratorium years. The Southeast Alaska dive fisheries were also subject to moratoria from 1996 through 2000. However, unlike the Dungeness crab fishery, the permit types for the dive fisheries did not change between the moratorium years and the years following limited entry; the permit designations stayed the same, and the fishery-specific tables reflect this.

There is a separate anomaly with permits for the Southeast Alaska pot shrimp fishery. For the first six years of limited entry from 1996 through 2001, two permit types were issued. By 2002, one of the permit types had been phased out, leaving only the “Southeast shrimp, pot gear” (no vessel length specified) permit type.

- Total Permits Issued represents the number of permits eligible for ET. It is the sum of limited entry and IUPs that were issued in a fishery. If a person held both an IUP and a permanent permit in the same year for a fishery, only the permanent permit is counted.
- Some transfers in the IUP category were the result of mandatory government service or were part of an estate. See Table 3.
- The first year in a permit type series corresponds to the year when limited entry was implemented and permits were first eligible for ET.
- The Southeast Alaska Dungeness crab (1992-1996) and the sea cucumber, sea urchin, and geoduck dive fisheries (1996-2000) were subject to moratoria on new entrants prior to implementation of limited entry. Moratorium interim- use permits are eligible for ET.

## ETs of One or More Years

Table 5: Consecutive Years of ETs of Limited Entry Permits, by Permit Type, 1994-2015

Previous sections of this report discuss the circumstances where an individual might be allowed to ET a permit repeatedly for more than one year. Briefly, ETs are authorized for up to two years if a person has a medical condition that persists into the second year. New and unexpected medical conditions might also give rise to repeated ETs. Required military or other government service, or issues involving the settlement of a permit holder's estate are other potential reasons where a permit could be emergency transferred across consecutive years. Individuals who hold IUPs in limited fisheries might transfer their IUPs for more than one consecutive year, and *Wasillie* class members who received permits were granted a status that allowed them to repeatedly transfer their permits.

ETs that are used to facilitate a PT (ET-PT) are often associated with repeat transfers. A common scenario involves individuals who suffer a medical condition(s) that prevents them from fishing for one or two years. Following this, the individual might decide to permanently transfer away their permit, but to facilitate the transaction they need to request an ET-PT. This would result in ETs over consecutive years.

Table 5 indicates the scope of consecutive ETs. To assess repeat transfers, the data was examined for each unique person / permit combination. The year 1 column indicates the number of permits that were emergency transferred by persons who did not ET their permit in the immediately preceding year. The Year 2 column shows the number of unique person/permit combinations that were in their second consecutive year of ET. The Year 3 column shows person/permits with three years of repeated ETs, etc.

Note that some permits are emergency transferred to more than one individual in a year. In roughly 1 in 30 occasions, people will ET their permit, then have to withdraw and ET the same permit to a different individual later in the same year. In Table 5, these instances are not included as "repeat transfers" because they occur in the same year. This methodology also accounts for the slight differences in the sum of transfers between Table 5 in this section and Tables 2 and 4 in the previous section.

Also note that Table 5 will slightly over-estimate repeat transfers for fisheries with seasons that begin late in the year and cross over into the next calendar year. Most commonly, this applies to the salmon hand and power troll fisheries and the Southeast geoduck dive fishery. For example, to ET a geoduck dive permit for an entire season, an individual might transfer their permit for the portion of the fishery that occurs in December; then, to continue the ET, they would need to request a second transfer for the remaining part of the season in January of the next year. Transfers of this type will inflate the figures for repeat transfers in Table 5.

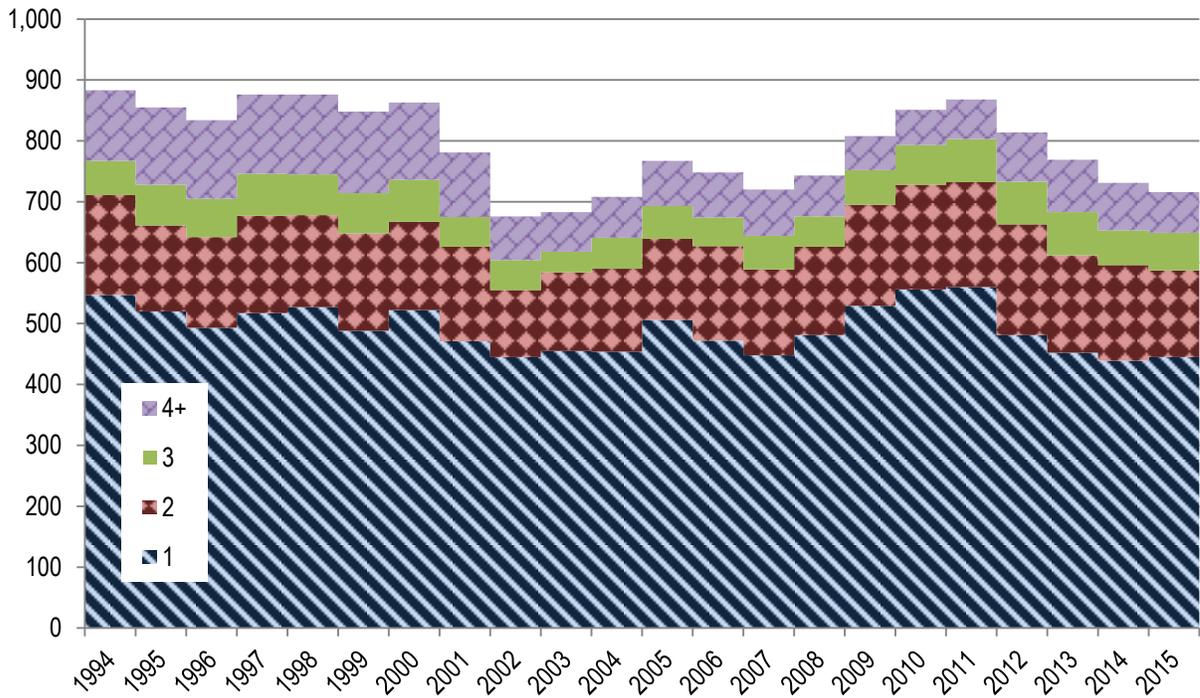

The time-series in the table extends back to 1994, when the survey portion of the current emergency form began. If no ETs have occurred in a particular permit type, it will not be listed in the table.

On average, 37.9% of the ETs in a year were also transferred in one or more of the previous years. The number and percentage of ETs that occurred for four or more continuous years was highest in the mid-1990s and peaked in 1999 at 15.8% of all ETs; this percentage has subsequently dropped, and was 9.4% in 2015. The decrease might be related to a drop in the number of *Wasillie* class members who held permits, as well as a general reduction in the number of IUPs in all fisheries. ETs of IUPs are subject to a less rigorous regulatory standard than ETs of permanent permits, and may lead to repeated transfers.

The highest rates of consecutive ETs have been for permits in the Southeast Alaska sablefish fisheries and king crab fisheries. Again, this may be related to a proportionally high number of IUPs. Economic returns to permit holders might also influence the rates of ETs, as these fisheries are characterized by relatively high ex-vessel earnings and high permit values.

Figure 2 illustrates the number of consecutive years of ETs for all limited entry permits from 1994 to 2015.

Figure 2. Consecutive Years of ETs for all Limited Entry Permits, 1994-2015

- Permit types with no ETs are excluded from the table.
- If the first year in a permit type series is after 1994, the year corresponds to when limited entry was implemented and permits were first eligible for ET.
- The Southeast Alaska Dungeness crab (1992-1996) and the sea urchin, sea cucumber, and geoduck dive (1996-2000) fisheries were subject to moratoria on new entrants prior to implementation of limited entry. Moratorium IUPs are eligible for ET.
- Some permits are emergency transferred to more than one individual in a year. These are not part of the sum of repeat transfers because they occur within the same year. This accounts for the slight differences in the total sum of transfers between this table and Tables 2 and 4 in this report.

## ETs by Resident Type and/or Relationship

Table 6: Number of ETs Between Resident Types, 1994-2015

Table 7: Permit Holdings, ETs, and Corresponding Percentages by Resident Type, 1994-2015

Table 8: Relationship of Emergency Transferors to Transfer Recipients, by Resident Type, 1994-2015

Table 9: Relationship of Emergency Transferors to Transfer Recipients, by Permit Type, 1994-2015

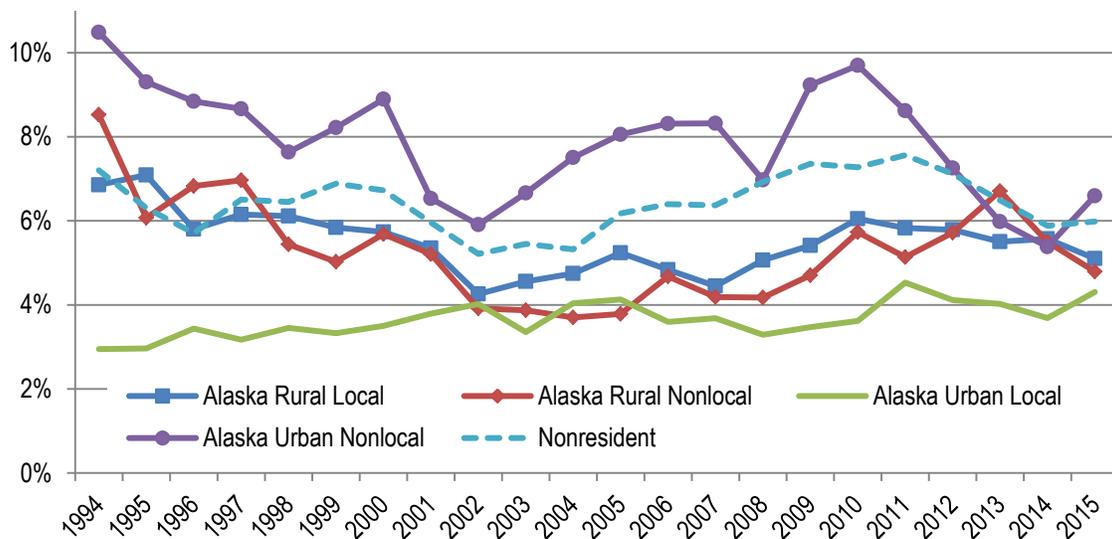

This section provides statistics on ETs of permits based upon where the permit holders reside. Permit holders who live in Alaska are classified into rural or urban communities and local or nonlocal groups.<sup>19</sup> Nonresidents of Alaska are classified in a separate category. Each party to the ET permit (transferor or transfer recipient) then falls into one of five classifications, depending upon their residence:

- **Alaska** resident of a **Rural** community which is **Local** to the fishery for which the permit applies;
- **Alaska** resident of a **Rural** community which is **Nonlocal** to the fishery for which the permit applies;
- **Alaska** resident of an **Urban** community which is **Local** to the fishery for which the permit applies;
- **Alaska** resident of an Urban community which is **Nonlocal** to the fishery for which the permit applies;
- **Nonresident** to Alaska.

Table 6 examines ETs solely by resident type. Intra-cohort transfers refer to permit exchanges that occur between persons of the same resident type. Cross-cohort transfers are those that occur between individuals who have separate resident types.

Table 7 compares the number and percentage of limited entry permit holdings for each resident type (the sum of permanent and IUPs that are eligible for ET) with the resident type's number and percentage of ETs. Figure 3 is derived from Table 7 and expresses the rate of ETs within each resident type.

**Figure 3. Rates of ETs of Transferors by Resident Type of the Transferor, 1994-2015**

<sup>19</sup> Rural and urban classifications conform to designations determined under the United States Census 2010. Local and nonlocal boundaries closely align with Commercial Fisheries Entry Commission management areas.

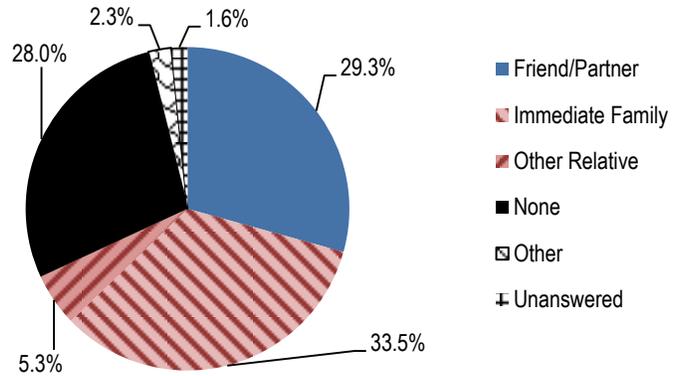

Tables 8 and 9 present the relationships of the parties involved in ETs. The data indicates that roughly two-thirds of all ETs have occurred between individuals who know one another.

Figure 4 displays relationships between transferors and transfer recipients for all ETs for all fisheries between 1994 and 2015. 38.8% of the ETs have been between family members (the sum of Immediate Family and Other Relative), and 29.3% have occurred between Friends/Partners.

Alaska Rural Locals have a significantly higher rate of ETs to family members (49.1%), and a lower rate to the Friend/Partner(s) (22.3%) than the other resident types. Nonresidents record the lowest rates of transfers to family members (22.6%) and the highest rates (36.4%) to persons with whom they have no prior relationship (category 'None').

Note that Table 9 shows only the years when ETs occurred for each permit type. If no ETs occurred for a particular permit type and year, it is excluded from the table.

- *'Total permits'* represents all permits eligible for ETs. It is the sum of permanent and IUPs issued in limited fisheries or in fisheries that were subject to a temporary moratorium on new entrants. If a person held both an IUP and a permanent permit in the same year for a fishery, only the permanent permit is counted. *'Total permits'* excludes a small number of permits that were temporarily held by the Department of Commerce, Community, and Economic Development (DCCED) at year-end.
- *'Total ETs'* excludes one ET in 2001 from DCCED.

- *Figures in this table summarize data collected from the survey portion of the CFEC emergency transfer form. The survey was first implemented in 1994. During the transition, 431 ETs were processed without surveys, which accounts for the differences in the totals between this table and other tables in this report that summarize all ETs.*

- Permit types and years with no ETs are excluded from the table.
- Figures in this table reflect data collected from the survey portion of the CFEC emergency transfer form. The survey was first implemented in 1994. During the transition, 431 ETs were processed without surveys, which accounts for differences in the totals between this table and other tables in this report.
- If the first year in a permit type series is after 1994, the year corresponds to when limited entry was implemented and permits were first eligible for ET.
- The Southeast Alaska Dungeness crab (1992-1996) and the sea urchin, sea cucumber, and geoduck dive fisheries (1996-2000) were subject to moratoria on new entrants prior to implementation of limited entry. Moratorium IUPs are eligible for ET.

## Ages of Permit Holders in ETs

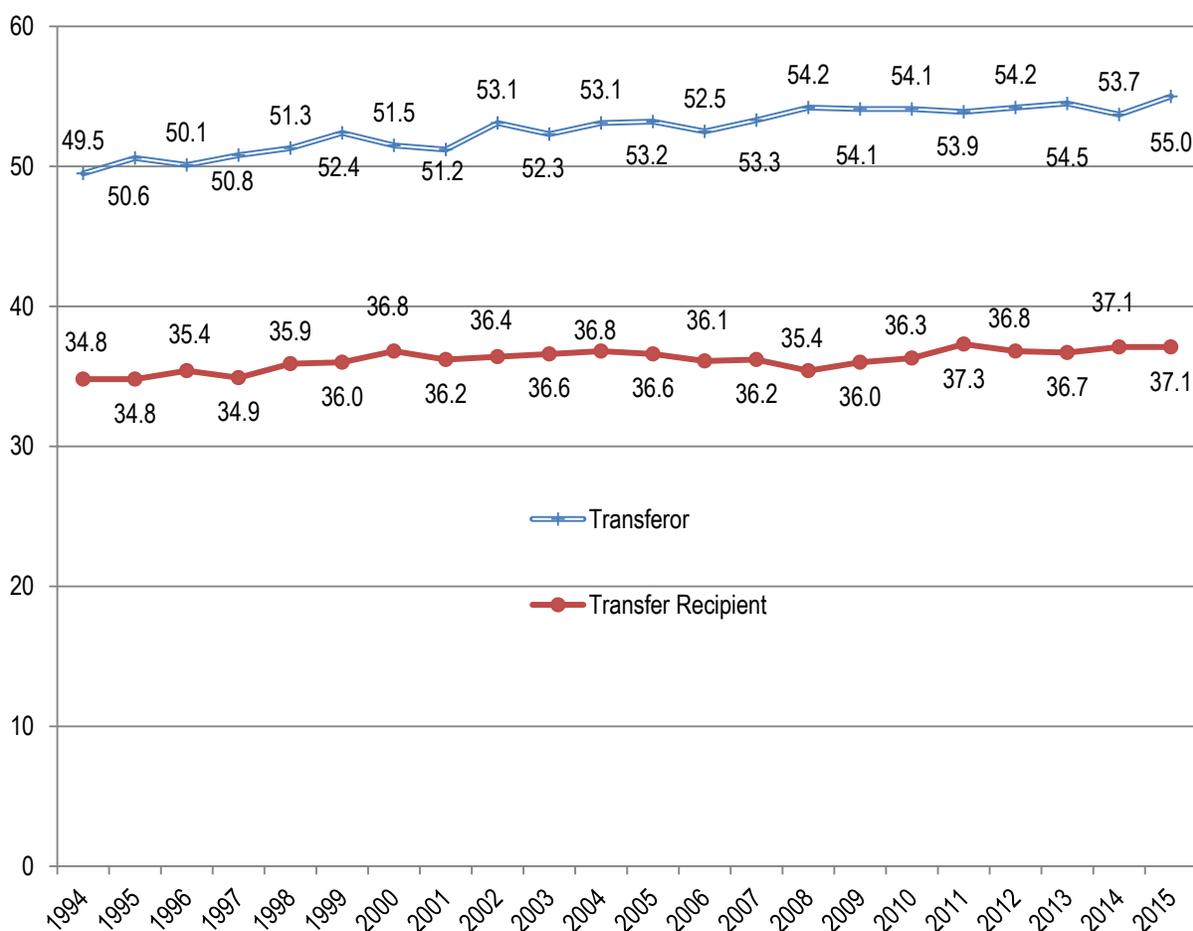

Table 10: Ages of Emergency Transferors and Transfer Recipients by Permit Type, 1994-2015

Table 10 summarizes data from CFEC permit files on the ages of persons involved in ETs. Statistics are shown for both the transferor (permanent permit holder or IUP holder) and for the transfer recipient (temporary holder of the permit in an ET) by permit type, from 1994 - 2015.

The data indicates that persons who receive permits via ET tend to be considerably younger than the persons who transfer the permits. This increase in age follows a general pattern observed throughout the state: the average age for all limited entry permit holders has steadily increased since 1980, and now stands at 50.3 years.<sup>20</sup>

Note that individual permit holders' birthdates are confidential. If fewer than four ETs occurred in a fishery, the average age is redacted and marked with an asterisk in Table 10.

Figure 5. Average Age of Emergency Transferors and Transfer Recipients

- Age and birthdate information is confidential. Data is redacted with an asterisk if there are fewer than 4 ETs.
- Permit types with no ETs are excluded from the table.
- If the first year in a permit type series is after 1994, the year corresponds to when limited entry was implemented and permits were first eligible for ET.
- Number of permits' is the sum of permanent and IUPs that were eligible for ET in limited fisheries or in fisheries that were subject to a moratorium on new entrants. If a person held both an IUP and a permanent permit in the same year for a fishery, only the permanent permit is counted. One ET in 2001 from DCCED is excluded from the totals.

## Reasons for ETs and Terms of Transfer

*Table 11: ET Survey: Reasons Given for Transfers, by Year, 1994-2015*

*Table 12: ET Survey: Terms of Remuneration to the Transferor, by Year 1994-2015*

As detailed in previous sections, ETs allow an entry permit to be temporarily fished by someone other than the permanent permit holder if illness, death, disability, required military or government service, or other unavoidable hardship occurs unexpectedly and temporarily.

Restricting the scope of how permits may be used by someone other than the permanent permit holder is necessary to align provisions for ETs with other statutes that specify that an entry permit should be held only by persons who presently have the ability to participate in the fishery.<sup>21</sup> ETs are intended to provide relief to persons who are actively engaged in a fishery but who are faced with a temporary and unplanned difficulty that prevents them from fishing.

One requirement for the ET of a permit is for the parties to complete the CFEC form *Request for Emergency Transfer of Entry Permit*. In completing the transfer form, the applicant must supply detailed and corroborating information that indicates the nature of the emergency. If the reason relates to a medical condition, the applicant must also include a statement from a doctor. Along with the detailed information, one section of the emergency transfer form asks permit holders to select one of eleven categories of "Reason for Transfer". Table 11 summarizes that information.

An analysis of the survey questions on the emergency transfer form should take into account that each transfer is not only reviewed to ensure that it conforms to the regulations, but is also considered for its situational merits. Specific and unique facts define each transfer, beyond what is summarized by the survey questions. It is not uncommon that in upholding the regulations, licensing staff ask for more information. It is also common practice for CFEC staff to deny a transfer, but at the same time encourage the permit holder to ask for a review by a hearing officer, where the nuances of the transfer can be more properly considered.

The following are notes that help explain the "Reasons for Transfer" selections on the emergency transfer form, as summarized in Table 11:

*Medical Necessity: Injury or Accident / Illness or Other Health Problem / Pregnancy*

If an immediate family member requires the care or attention of a permit holder, and it is due to an unexpected illness or medical condition, this might constitute grounds for an ET. Note that "Immediate family member" is defined in regulation.<sup>22</sup>

To establish grounds for an ET due to medical reasons, the transferor must provide a sworn statement from an examining physician indicating the onset of the condition, the diagnosis, and the treatment. This information helps the commission's review of the transfer request to ensure that the medical condition prevents the permit holder from fishing.

*Death of the Permit Holder or of an Immediate Family Member of the Permit Holder*

The sudden death of a permit holder is grounds for the family or permit holder's estate to ET the permit. Permits that are part of an estate may be emergency transferred beyond two years, pending the final disposition of the estate. To authorize continuing transfers in this category, CFEC staff currently requests documentation of the settlement status of the estate. A death of a permit holder's immediate family member can also be a valid reason for an ET.

---

<sup>21</sup> AS 16.43.170 (b).

<sup>22</sup> 5 AAC 05.1770 (a)(10).

### *Required Government or Military Service*

As discussed in previous sections, ETs of this type are authorized by statute.<sup>23</sup> Military and government service are defined in the regulations.<sup>24</sup> Depending upon the specific circumstances, either of these reasons might provide the basis for emergency transferring a permit for more than two consecutive years.

### *Incarceration*

When a commercial fisherman is convicted of a crime and is sentenced to incarceration, the commission may consider an ET to prevent economic hardship to the permit holder's immediate family. Transfers are approved only with the stipulation that all monetary proceeds resulting from the transfer go directly to the needs of the family, and only if the family was supported by fishing income prior to the incarceration. Many transfers in this class involve temporarily passing an entry permit to an adult member of the family - someone who is capable of fishing the permit and using the proceeds to help support dependent family members. Other common examples include using the fishing proceeds to help make child support payments, or to prevent a family permit from falling into foreclosure, or to satisfy a household tax debt. In other cases, the commission may consider granting an ET for an incarcerated person who has not yet been convicted of a crime.

### *Financial or Economic Hardship*

The Economic Hardship category refers to relatively rare cases where an entry permit has been pledged as collateral for a loan through DCCED/CFAB. DCCED and CFAB are the only lending agencies allowed to use entry permits as collateral. If an individual has offered a permit as collateral and falls behind on their loan payments, the lender can initiate foreclosure on the permit. Under these circumstances the commission will consider granting an ET of the permit, provided that all the monetary proceeds from the transfer are used to help prevent foreclosure on the loan. Before issuing an ET in this fashion, the commission requires complete documentation of the foreclosure and how the loan payments will be made.

### *School or Training*

Mandatory school or training might force a permit holder to temporarily leave a fishery. This situation most commonly applies to minor children who hold permits in family set gillnet operations. The category does not apply to elective educational pursuits like college or vocational training for high school graduates.

### *Other*

This category is selected by applicants when the reason for their transfer does not have an apparent fit into any of the other listed categories. The most common instance in the 'Other' category is when an ET is used to facilitate the PT of a permit (ET-PT). ET-PTs are discussed in greater detail in the *Emergency Transfer-Permanent Transfer (ET-PT)* section. The 'Other' category also includes cases where an individual obtains a permit through a right of survivorship, but they are not prepared to immediately fish the permit or to sell it. Another common scenario that fits this category is when a legal guardian seeks to dispense of a permit on behalf of a permit holder who has become incapacitated.

### *Working at Alternate Employment and Retirement*

Although 'Retirement' was listed on past emergency transfer forms and 'Working at Alternate Employment' is still on the forms, neither of these reasons, standing alone, would result in an ET. In fact, 'Retirement' is explicitly mentioned in CFEC regulations as a reason that does not justify an ET.<sup>25</sup>

Instead, these two reasons were placed on the form to add clarification for the ultimate dispensation of a permit after it is emergency transferred for a valid reason. Either of the selections must be combined with other permissible reasons, such as a temporary medical condition. In Table 11, only the category 'Working at

---

<sup>23</sup> AS 16.43.180 (a).

<sup>24</sup> 5 AAC 05.1770 (11) and (12), respectively.

<sup>25</sup> 20 AAC 05.1740 (i)(2)(C).

Alternate Employment' is listed; it was marked by applicants in very rare instances (20 out of 17,529 ETs). Although 'Retirement' was also listed as a selection on the emergency transfer forms for a period of time, it was never actually used - a tally indicates zeros for all years for that particular selection, therefore it is omitted from Table 11.

## Terms for Use of the Permit

Table 12 provides statistics on another section of the emergency transfer form, where permit holders select one of seven choices that help document the terms under which the transfer will take place. Generally, leasing the fishing rights associated with a state limited entry permit is prohibited; however, regulations grant an exception for permits that have been emergency transferred.<sup>26</sup> The law allows permit holders to receive some form of remuneration if they are forced to temporarily forgo fishing. Regulations protect the permanent permit holder by automatically transferring the permit back into the permanent permit holder's name at the end of the year or at the end of the fishing season. The lease terms are collected for the purposes of adjudicating each ET where applicable; staff does not follow up to verify the adherence of terms of remuneration. Final terms (or lack of) are known only to the transferor and transferee.

The data indicates the most common form of compensation to the permanent permit holder is a percentage of the earnings garnered by the person who temporarily fishes the permit. Because Alaskan fisheries are almost exclusively open access, landings for permits within a specific permit type vary drastically, and therefore would be difficult to report in aggregation a value of such a lease. CFEC ex-vessel value is only estimated for an entire fishery and therefore do not accurately reflect individual earnings for any specific permit holder. Flat fees to the permit holder are also common, and the proportion of this type of transaction appears to be increasing. In roughly 1 out of 4 ETs, the permanent holder indicates they do not receive direct monetary compensation from the transfer. It is likely that many of the transactions in that category are tied to ETs among family members.

"No answer given", as indicated in Table 12 is merely a literal accounting of the check-boxes on the emergency transfer survey form. In practice, all permit holders must relate the terms of compensation for the transfer. On occasion, the boxes on the form are inadvertently left unchecked (this was especially prevalent for five years in the 1990's), but no transfers are actually processed without this information, and the terms of the transfer are detailed in ancillary documents in the CFEC files.

- Figures in this table summarize data collected from the survey portion of the CFEC emergency transfer form. The survey was first implemented in 1994. During the transition, 431 ETs were processed without surveys, which accounts for the differences in the totals between this table and other tables in this report that summarize all ETs.

## Appendix B: CFEC Emergency Transfer Regulations

### 20 AAC 05.1740. Emergency transfers

- (a) A holder of an entry permit or interim-use permit in a limited fishery or a fishery subject to a moratorium may apply for an emergency transfer of the entry or interim-use permit to another person by making application to the commission on a form provided by the commission.
- (b) The commission will grant an emergency transfer of an entry permit if the proposed transferee is not a permit holder in the fishery and is presently able to participate actively in the fishery, and if it is established that illness, disability, death, required military or government service, or other unavoidable hardship of a temporary, unexpected, and unforeseen nature prevents the transferor from participating in the fishery. If the entry permit is not transferable under AS 16.43.170 (c) or (e), the emergency transfer will be granted only to allow the continued operation of the transferor's vessel or setnet site and fishing gear. Temporary emergency transfer of an interim-use permit issued under AS 16.43.210 (b), 16.43.225, or 16.43.227 or of a permit held by an estate will be granted by the commission to alleviate hardship. Temporary emergency transfer of an interim-use permit in an unlimited fishery issued under AS 16.43.210 (a), will be granted by the commission if reasonably necessary in order for the fishing operation to continue until another permit may be obtained.
- (c) Where illness, disability, or death precludes communication by the transferor, the commission will, in its discretion, authorize the emergency transfer of an entry permit or interim-use permit upon application by a person other than the transferor.
- (d) Unless otherwise limited by the commission, an emergency transfer is effective until the emergency is over, or until the end of the season, or until the transferor submits a request that the permit be returned, whichever occurs first.
- (e) The proposed transferor and transferee of an emergency transfer under this section shall provide information and executed releases for information the commission determines is reasonably necessary to establish the basis upon which the emergency transfer is requested. Sufficient proof to verify the basis of the transfer must be submitted when the transfer request is made.
- (f) Repealed 1/29/82.
- (g) Where illness, disability or other unavoidable hardship, as described in (c) of this section, began or death occurred within 14 days immediately preceding the mailing date of a properly completed Request for Emergency Transfer of Permit form, the commission or an agent of the commission may certify the application as complete by dating and signing the form. The commission agent will not certify the form as complete unless the form is accompanied by an envelope addressed to the commission with adequate postage. The proposed emergency transferee may fish with the carbon copy of the form for no more than 14 days following the date the form was certified as complete, unless extended by the commission. Upon approval of the request for emergency transfer, the commission will issue a temporary permit card to the emergency transferee. Upon denial of the request, the commission will notify the permit holder and proposed transferee of its decision and of the fact that fishing with the carbon copy of the application form is no longer authorized.
- (h) A proposed emergency transferee of a permit may not fish with a carbon copy of a Request for Emergency Transfer of Permit form if the
  - (1) form has not been signed and dated by an agent of the commission;
  - (2) request is based on a circumstance, described in (b) of this section, that arose more than 14 days before the form is received by the commission;
  - (3) annual permit renewal form and fee have not been received and processed by the commission.

## Appendix B: CFEC ET Regulations

- (i) If the commission grants an emergency transfer and the basis for the emergency transfer continues at the time the transferor applies for an emergency transfer for the following season, the commission will grant an emergency transfer for that following season. For subsequent seasons, the commission will grant an emergency transfer only upon a showing by the permit holder of
  - (1) a new unavoidable hardship of an unexpected and unforeseen nature that prevents the permit holder from fishing;
  - (2) a continuation of the basis for the first emergency transfer in addition to extraordinary circumstances; for purposes of this paragraph, "extraordinary circumstances" are circumstances beyond the control of the permit holder that can be addressed by granting an emergency transfer, such as
    - (A) the failure of a good faith attempt to participate in the fishery;
    - (B) a realistic intent to return to the fishery within a reasonable period of time after the first emergency transfer based upon a high probability of removal of the disability or unavoidable hardship that gave rise to the first emergency transfer; or
    - (C) an intent to permanently transfer the permit that cannot presently be fulfilled in spite of substantial, good faith efforts to do so; "extraordinary circumstances" do not include the effects of economic, biological, or regulatory variable that are normally part of the risk of doing business as a fisherman, such as an economic choice, retirement from the fishery, permanent illness or disability, or lack of a market for the sale of a permit.
- (j) The transferor may revoke an emergency transfer at any time by submitting to the commission or an agent of the commission
  - (1) a completed Request for Return of Original Permit Card form provided by the commission;
  - (2) the emergency permit card, or if the card has not been received by the emergency transferee, the transferee's copy of the Request for Emergency Transfer of Permit form; and
  - (3) if submitted through an agent, an envelope addressed to the commission with adequate postage.
- (k) A permittee may not fish with a copy of the Request for Return of Original Permit Card form unless the form has been submitted to the commission through an agent of the commission, and that agent has certified the application as complete by dating and signing the form. A permittee may submit to the commission an otherwise properly completed Request for Return of Original Permit Card form that is not signed and dated by an agent; however a copy of the form may not be retained for fishing.
- (1) For the purposes of receiving and certifying as complete a Request for Emergency Transfer of Permit form and a Request for Return of Original Permit Card form, an employee of the Department of Fish and Game or of the Department of Public Safety, division of fish and wildlife protection, is an agent of the commission.

## Appendix C: CFEC Emergency Transfer Application

### Commercial Fisheries Entry Commission Request for Emergency Transfer of Entry Permit

PO Box 110302  
Juneau, AK 99811-0302  
Phone: 907-789-6150/Toll Free: 1-855-789-6150  
Fax: 907-789-6170  
Website: [www.cfec.state.ak.us](http://www.cfec.state.ak.us)  
Transfer email: [dfg.cfec.transfers@alaska.gov](mailto:dfg.cfec.transfers@alaska.gov)

#### General Information:

Emergency Transfers are granted for:

- Illness
- Disability
- Death
- Required military or government service
- An unavoidable hardship of a temporary, unexpected, and unforeseen nature that prevents the permit holder from participating in the fishery\*\*

\*\*\*Hardship," with respect to emergency transfers, means privation and suffering, and does not include the results of a permit holder's own economic decisions, nor the results of economic, biological or regulatory variables which are normally part of the risk of doing business as a fisherman.

#### Instructions:

To request an emergency transfer:

- The entire form must be completed by both the permit holder and transferee
- The current year permit card (if issued) must be returned or the annual fee must be paid
- A \$50.00 transfer fee must be submitted
- Both parties must have their signatures notarized (they do not have to sign at the same time or place)
- If the transfer is being requested due to illness, injury or disability, the physician who examined the permit holder must complete the required physician's statement page

To request an emergency transfer in the event of the permit holder's death:

- The representative of the estate should complete the form. If a representative has not been appointed, the surviving spouse or next of kin may complete the form
- If the Entry Commission does not have a copy of the death certificate, one must be provided
- The physician's statement DOES NOT need to be completed

If the request is due to an illness, injury or death which occurred in the last 14 days (not an old illness that has flared up) this form MUST be submitted to the Entry Commission, even after business hours, in order for the transfer to be valid.

If it is after business hours, you will need to send an email to [yvonne.fink@alaska.gov](mailto:yvonne.fink@alaska.gov). Once the email is received a determination will be made and you will be contacted as soon as possible. Only an employee at the Entry Commission may authorize the transferee to begin fishing with a copy of the transfer form after it has been processed and made valid for fishing.

If the transfer is denied, a notice will be given to the permit holder and they will have an opportunity to request an administrative hearing which can be conducted by phone.

If you emergency transfer your salmon permit and the transferee gets demerit points for a fishing violation, you will also receive demerit points.

#### Payment Information:

Credit card payments are not accepted over the phone, they must be submitted using the attached credit card authorization and submitted via fax, (907) 789-6170, or email, [dfg.cfec.transfers@alaska.gov](mailto:dfg.cfec.transfers@alaska.gov). We accept Mastercard, Visa, and Discover.

We also accept checks, money orders, and cashier's checks which can be submitted with this form and mailed to:
