OEO/ADA Compliance Statement

The Commission is administratively attached to the Alaska Department of Fish and Game.

The Alaska Department of Fish and Game (ADF&G) administers all programs and activities free from discrimination based on race, color, national origin, age, sex, religion, marital status, pregnancy, parenthood, or disability. The department administers all programs and activities in compliance with Title VI of the Civil Rights Act of 1964, Section 504 of the Rehabilitation Act of 1973, Title II of the Americans with Disabilities Act of 1990, the Age Discrimination Act of 1975, and Title IX of the Education Amendments of 1972.

If you believe you have been discriminated against in any program, activity, or facility please write:

- ADF&G ADA Coordinator, P.O. Box 115526, Juneau, AK 99811-5526
- U.S. Fish and Wildlife Service, 4401 N. Fairfax Drive, MS 2042, Arlington, VA 22203
- Office of Equal Opportunity, U.S. Department of the Interior, 1849 C Street NW, MS 5230, Washington DC 20240.

The department's ADA Coordinator can be reached via phone at the following numbers:

- (VOICE) 907-465-6077
- (Statewide Telecommunication Device for the Deaf) 1-800-478-3648
- (Juneau TDD) 907-465-3646
- (FAX) 907-465-6078

Abstract

This report examines limited entry permits in the five Yakutat and Southeast Alaska commercial salmon fisheries: purse seine (S01A permits), drift gillnet (S03A permits), Yakutat set gillnet (S04D permits), statewide hand troll (S05B permits), and statewide power troll (S15B permits). We present summary statistics on the number of permits held, permanent and emergency permit transfers, permit value, permit latency, new entrants in the fisheries, permit holder median age, estimated gross earnings, and vessel characteristics for these five permit types. Some summary statistics are separated by resident type. We also provide a description of the computer files and methods used to generate the statistics.

Prepared by Reid Johnson, Daniel Strong and Sally Kohlhase

Introduction

This report provides an overview of limited entry permit holdings and estimated gross earnings in the Yakutat and Southeast Alaska commercial salmon fisheries. Commercial fishing in Yakutat and Southeast Alaska has been documented as far back as 1878.¹ Historically, several gear types have been employed to commercially harvest salmon in Yakutat and Southeast Alaska, but today the five commercial salmon fisheries prosecuted in this region of Alaska are the purse seine (S01A), drift gillnet (S03A), set gillnet (S04D), hand troll (S05B), and power troll (S15B) fisheries.

In 1972, Alaskan voters amended the state constitution to allow limited entry in the state's commercial fisheries. Following the amendment, in 1973 the Alaska State Legislature enacted the Limited Entry Act (AS 16.43), giving the Commercial Fisheries Entry Commission (CFEC) the authority to administer the program. Permit fisheries are defined by CFEC as a specific gear type for a fishery resource within a defined administrative area.

The Southeast Alaska salmon purse seine, drift gillnet, power troll, and Yakutat set gillnet fisheries were part of the original group of 19 Alaska salmon fisheries that were limited after the Alaska legislature passed the limited entry act. Limited entry permits in these fisheries were first issued in 1975. The hand troll fishery was subsequently limited in 1980, and hand troll limited permits were issued starting in 1982.

Limited entry permits were allocated based upon an individual's past participation and economic dependence on the fishery. To allocate permits among qualified applicants, CFEC developed point systems to measure each individual's relative position in the fishery. The Limited Entry Act also required CFEC to determine levels within the point system where persons would experience only minor economic hardship if excluded from an initial permit allocation. Persons who were ranked at or below the minor economic hardship level received non-transferable permits, while persons who were ranked above the minor economic hardship level received transferable permits.

Among the Yakutat and Southeast Alaska salmon permit fisheries, non-transferable permits were only issued in the hand troll permit fishery: out of the 2,162 permanent permit initially issued, a total of 1,457 were non-transferable. CFEC permits are cancelled after two years of non-payment of annual fees. This can occur when the permit holder reaches an age when fishing is no longer feasible, or when the permit holder passes away.

Information regarding season length, openings and closings, harvest size, and related data can be found in the Alaska Department of Fish and Game's (ADF&G) Area Management Reports. This report focuses on the economics of these commercial fisheries.

Pink salmon made up the largest percentage of ex-vessel value in the Southeast Alaska commercial salmon harvest over 1975-2023, at 33% (Table 0-1). The percentage of ex-vessel value accounted for by each salmon species varied across years as well as across the five Southeast Alaska permit types. Commercial harvests of species other than salmon were documented at extremely low rates and are not displayed in Table 0-1.

¹ See *Alaska's Commercial Salmon Catches, 1878-1997*. RIR No. 5J99-05.

Table 0-1. Percent of Total Ex-vessel Value of Southeast Alaska Salmon Fisheries by Species, 1975-2023

Species	Southeast Purse Seine	Southeast Drift Gillnet	Yakutat Set Gillnet	Hand Troll	Power Troll	Total Southeast Salmon
Chinook	1.0%	2.7%	1.8%	35.2%	43.0%	12.8%
sockeye	10.6%	32.0%	49.9%	0.3%	0.3%	12.8%
coho	3.4%	13.7%	44.2%	58.1%	50.8%	20.0%
pink	60.3%	8.8%	2.8%	5.1%	2.0%	33.0%
chum	24.7%	42.8%	1.4%	1.3%	3.9%	21.4%

Description of the Data Files Used to Generate This Report

Four CFEC data files were used to generate the statistics in this report: the gross earnings file, the permit file, the vessel file, and the census file. The most recent data are included in this report. The following is a brief description of each file. Please contact CFEC for more detail about these files if you are interested.

CFEC Gross Earnings File

The CFEC gross earnings file is based on ADF&G fish tickets and is augmented with CFEC permit holder and other data. The ex-vessel value for salmon in the CFEC gross earnings file largely come from the Commercial Operators Annual Report and ADF&G fish tickets with some additional information provided by processors. ADF&G salmon districts were mapped out from statistical areas using information provided by ADF&G. Several processes to validate and enhance fields such as vessel number and statistical area were undertaken to increase accuracy of this report.

CFEC Permit File

The CFEC permit file contains data originating from CFEC permit renewal and permit transfer forms on persons who hold or have held CFEC permits. The permit file contains a data field indicating the declared residency of permit holders as well as their addresses. In this report, resident status is categorized into four resident types:

- **Local** – permits held by persons residing locally to the ADF&G management area
- **Nonlocal** – permits held by persons who reside in Alaska outside of the ADF&G management area
- **Alaska Data Missing** – Alaska residents for whom address information is missing
- **Nonresidents** – permits held by persons who are not residents of Alaska

CFEC Vessel File

CFEC maintains a data set of vessel registration data back to 1978. Commercial fishermen fill out a form and voluntarily provide data regarding the vessel they intend to use that fishing season.

CFEC Census File

CFEC maintains a data set of places within Alaska where permit holders reside. Each community is annotated with information on its local or nonlocal status by permit fishery. Table 0-2 lists the communities that are currently designated as local to the Yakutat set gillnet salmon fishery in the Census file. Table 0-3 includes communities local to the Southeast Alaska purse seine and drift gillnet salmon fisheries. Note that while salmon hand and power troll permits are issued statewide, CFEC considers only the communities listed in Tables 0-2 and 0-3 as local to the salmon troll fisheries because these communities are local to where the fishery is prosecuted.

Table 0-2. Communities Local to the Yakutat Set Gillnet Salmon Fishery, as Indicated in the CFEC Census File

Data Display

Percentages are rounded to the nearest tenth of a percent where displayed. Dollars are rounded to whole dollars. Rounded aggregates may appear to not total due to rounding. If you would like more precise figures, please contact the CFEC research unit. Some figures may vary from previous reports when data have been corrected and/or updated.

Chapter 1 Southeast Alaska Salmon Purse Seine Fishery

S01A Permit Holdings

Limited entry permits for the Southeast Alaska salmon purse seine fishery (S01A permits) were issued starting in 1975. Table 1-1 indicates the initial distribution and historical net changes in permit holdings for the fishery. CFEC has issued 419 S01A permits. Of this total, Alaska Locals received 50.8% (213/419) of the permits, Nonlocal Alaskans received 0.2% (1/419) of the permits, and Nonresidents received 48.9% (205/419). Every permit issued was a transferable permit.

Table 1-1. Initial Issuance and Year-end 2023 Totals of Southeast Alaska Salmon Purse Seine Permits, With Net Changes Due to Permit Transfers, Migrations, and Cancellations, by Resident Type

Residency	INITIAL ISSUE		TRANSFERS		MIGRATIONS		CANCELLED		2023 YEAR-END	
	Total	Percent	Change	Percent Change	Change	Percent Change	Change	Percent Change	Total	Percent Change
Local	213	50.8%	-3	-1.4%	-25	-11.7%	-39	-17.8%	146	52.5%
Nonlocal	1	0.2%	15	1500.0%	1	100.0%	-12	-1200.0%	5	1.8%
Nonresident	205	48.9%	-12	-5.9%	21	10.2%	-90	-43.9%	124	44.6%
AK Data Missing	0	0.0%	0	.	3	.	0	.	3	1.1%
Total	419		0		0		-140	-33.4%	279	

The number of permits held by each resident type can change for three reasons: permits can be transferred to other resident types (transfer); permit holders can move from one location to another (migration); or permits can be cancelled (such as when a permit holder does not pay the renewal fee for two consecutive years or if there is a permit buyback). This table indicates the extent to which these factors have contributed to net changes in permit holdings in this fishery.

One hundred thirty-five permits were cancelled in the purse seine fishery through three separate permit buybacks. Thirty-five, 64, and 36 permits were bought back in 2008, 2012, and 2019 respectively.

Transfers of S01A Permits

Under the Limited Entry Act's terms of free transferability, permits may be sold, traded, given away, or inherited. CFEC requires the completion of a survey with each transfer.² The surveys provide information such as transfer acquisition methods, the relationship between individuals in the transaction, and the sale amount for instances when the permit is sold.

Table 1-2. Transfer Acquisition Methods for Southeast Alaska Salmon Purse Seine Permits, 1980-2023

Acquisition Method	S01A Permit		Combined Southeast Salmon		Statewide Salmon Purse Seine		All Fisheries Statewide	
	Count	Percent	Count	Percent	Count	Percent	Count	Percent
Gift	235	21.5%	1,657	17.0%	1,169	27.8%	14,043	32.8%
Sale	765	70.0%	7,377	75.8%	2,645	63.0%	24,955	58.3%
Trade	20	1.8%	148	1.5%	65	1.5%	540	1.3%
Inheritance	54	4.9%	394	4.1%	183	4.4%	1,956	4.6%
Other	19	1.7%	150	1.5%	139	3.3%	1,274	3.0%
Total	1,093		9,726		4,201		42,768	

Table 1-2 provides counts of permits by transfer acquisition method for the S01A permits, all five Southeast Alaska salmon permit types combined, statewide salmon purse seine permits, and all limited entry permits

² CFEC implemented the transfer survey in 1980.

between 1980 and 2023. More than two-thirds of all S01A permit transfers were sales (70.0%, or 765/1,093), just over a fifth were transferred as gifts (21.5% or 235/1,093), and a smaller percentage were trades (1.8% or 20/1,093), inheritance (4.9% or 54/1,093) or other (1.7% or 19/1,093).

Table 1-3. Relationships of Transferor to Transfer Recipients for Southeast Alaska Salmon Purse Seine Permits, 1980-2023

Relationship	S01A Permit		Combined Southeast Salmon		Statewide Salmon Purse Seine		All Fisheries Statewide	
	Count	Percent	Count	Percent	Count	Percent	Count	Percent
Business Partner/Friend	212	19.4%	1,932	19.9%	733	17.4%	8,041	18.8%
Member of Immediate Family	290	26.5%	2,041	21.0%	1346	32.0%	14,350	33.6%
Other Relative	28	2.6%	254	2.6%	155	3.7%	1,903	4.4%
Other/None	563	51.5%	5,499	56.5%	1966	46.8%	18,474	43.2%
Total	1,093		9,726		4,201		42,768	

Table 1-3 shows the relationships between the transferors and transfer recipients for S01A permits and provides counts of S01A permit transfers with all five Southeast Alaska salmon permit types combined, statewide salmon purse seine permits, and all limited entry permits from 1980 to 2023. Transfers within the family, both immediate family members and other relatives, total 29.1% (318/1,093) of all transfers. This compares to 24.7% (2,295/9,726) for all five Southeast Alaska salmon permit types combined, 35.7% (1,501/4,201) for statewide salmon purse seine permits, and 38% (16,253/42,768) for all limited entry permits statewide.

Emergency Transfers of S01A Permits

Commercial landings can be made with either permanently-held permits or with permits held temporarily through emergency transfers. Emergency transfers (ET) of permits are granted if illness, disability, death, required military or government service, or other unavoidable hardship of a temporary, unexpected, and unforeseen nature prevents the permanent permit holder from participating in the fishery. “Hardship” does not include the results of a permit holder’s own economic decisions, or the results of economic, biological, or regulatory variables which are normally part of the risk of doing business as a fisher. At the end of the year, ET permits automatically revert to the permanent permit holder.

Table 1-4 and Figure 1-1 show the total number of individuals who recorded landings each year, and of that group, the number of individuals who made landings with ET permits. Some individuals who made landings with ET permits also made landings with permanent permits in the same year.

Table 1-4. Use of Emergency Transfer Permits in the Southeast Alaska Salmon Purse Seine Fishery, 1975-2023

Individuals with Landings				ET Permit Holders with Landings			Individuals with Landings				ET Permit Holders with Landings

Figure 1-1. Use of Emergency Transfer Permits in the Southeast Alaska Salmon Purse Seine Fishery, 1975-2023

Latent S01A Permits

CFEC regulations require individuals to renew their limited entry permits annually, regardless of whether they fish. Permits that are not used (don't record landings) in a particular year are referred to herein as "latent" permits for that year.

Table 1-5 indicates the total number of viable S01A permits issued each year, the number of permits fished (with commercial landings), and the rate of permit latency. Viable permits include both interim entry and permanent permits. Note that for this table, in years when a single individual held an interim-entry permit and was also issued a permanent permit, only the permanent permit is counted. The rate of latency is depicted in Figure 1-2.

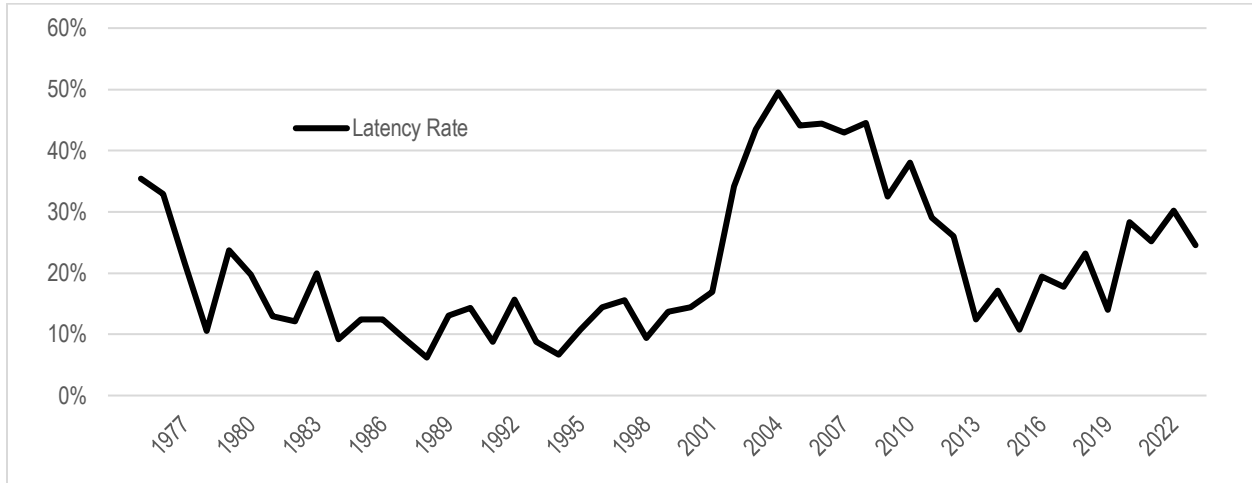

There are many reasons why an individual might not fish in any given year. This table and figure do not explain any of these reasons, but simply estimate the rate of permit latency.

Table 1-5. Southeast Alaska Salmon Purse Seine Permit Latency, 1975-2023

Year	Permits		Latency Rate	Year	Permits		Latency Rate	Year	Permits		Latency Rate
	Issued	Fished			Issued	Fished			Issued	Fished	
1975	443	286	35.4%	1992	420	354	15.7%	2009	379	256	32.5%
1976	416	279	32.9%	1993	419	382	8.8%	2010	379	235	38.0%

1986	420	368	12.4%	2003	416	235	43.5%	2020	279	200	28.3%
1987	420	381	9.3%	2004	414	209	49.5%	2021	278	208	25.2%
1988	420	394	6.2%	2005	415	232	44.1%	2022	278	194	30.2%
1989	420	365	13.1%	2006	414	230	44.4%	2023	278	210	24.5%
1990	420	360	14.3%	2007	415	237	42.9%				
1991	420	383	8.8%	2008	382	212	44.5%				

- When an individual with an interim-entry permit is issued a permanent permit in the same year, only the permanent permit is counted in the above table.
- 'Permits Fished' is the number of CFEC permits that were used to record commercial landings in that year.

Figure 1-2. Southeast Alaska Salmon Purse Seine Permit Latency, 1975-2023

New Entrants into the Southeast Alaska Salmon Purse Seine Fishery

New entrants are defined herein as individuals who, for the first time, record a landing on a permanent S01A permit. It is important to note that initial permit holders are not considered new entrants because they needed a proven fishing history prior to 1975 to become an initial permit holder of a limited entry permit. Individuals who only make landings on an emergency transfer or interim-entry permit for any given year are not considered in this table.

Table 1-6 and Figure 1-3 describe individuals rather than permits. An individual may hold up to two permits in this fishery but can only fish one of them. An individual may hold one S01A permit one year, and then in subsequent years hold a different S01A permit. Likewise, individuals may enter and exit the fishery multiple times over the years. Individuals are only counted once as a new entrant and only in the year in which they made their first documented landing.

Table 1-6. New Entrants into the Southeast Alaska Salmon Purse Seine Fishery, 1975-2023

Year	Individuals with Landings	New Entrants	Percent New
1975	277	42	15.2%

- *New Entrants excludes individuals with interim-entry and emergency transfer permits.*

Figure 1-3. New Entrants into the Southeast Alaska Salmon Purse Seine Fishery, 1975-2023

Age of S01A Permit Holders

Table 1-7 shows the annual median age of five different cohorts of people: 1) Southeast Alaska salmon purse seine (S01A) permit holders; 2) all five (S01A, S03A, S04D, S05B, and S15B) Southeast Alaska salmon permit holders; 3) statewide salmon purse seine permit holders 4) all CFEC limited entry permit holders; and 5) the general population of Alaska.

Note that these figures include ages of permit holders for both transferable and non-transferable permits; however, there were no non-transferable S01A permits issued. Some individuals hold permits in more than one fishery; in these cases, the age of the permit holder is counted once for each permit that he or she holds.

The median age of the general Alaska population has increased 7 years between 1980 and 2023. The change in ages over the same period for all CFEC permit holders increased by 16.4 years, and 14.9 years for the statewide salmon purse seine permit holders. In Southeast Alaska among all salmon permit holders the median age increased 16.2 years.

For S01A permit holders, the median age increased by 12.9 years.

Table 1-7. Median Age of Select CFEC Permit Holders and the General Alaska Population

Year	S01A	Combined SE Salmon Purse Seines	Statewide Salmon Purse Seines	Statewide All Permits	Median Alaska Age

- Median Alaska Age is the annual median age of all Alaskans as reported by the Alaska Department of Labor and Workforce Development, Research and Analysis Section.
- Displayed figures are rounded to the nearest 10th. Age data from the CFEC permit file is as of December 31st of each year.

S01A Permit Value

Many permit transfers are non-monetary transactions (see Table 1-2). Table 1-8 considers solely the arms-length market transactions where permits are sold. CFEC estimated values are only expressed in real (adjusted for inflation) terms.

Table 1-8. CFEC Estimated Value of Southeast Alaska Salmon Purse Seine Permits

Year	S01A Permit Sales	Real Permit Value	Standard Deviation
1987	25	\$110,700	\$13,000

2023	3	\$191,900	\$20,000

- Permit values represent averages of all arms-length sale transactions over the year. Beginning in 1991, additional data from recent months in the preceding year may have been included until at least four observations could be averaged.
- Real permit values were calculated using the 2024 Consumer Price Index from the U.S. Bureau of Labor Statistics

Southeast Alaska Salmon Purse Seine Vessel Characteristics

Table 1-9 reports on various vessel characteristics of the Southeast Alaska salmon purse seine fleet since 1978. Reported are the age, length, net tonnage, horsepower, and hold capacity. This data is from the vessel license file which includes voluntarily supplied information on vessels. The first column of each category is the count of vessels with the described characteristics; other statistics reported include the 25th percentile, median, and 75th percentile.

Table 1-9. Southeast Alaska Salmon Purse Seine Vessel Characteristics

• Mean values include every vessel used in this fishery from 1978 to 2023.

Participation and Earnings

Earnings are estimated from weighted average ex-vessel prices, and as noted earlier, largely stem from the ADF&G Commercial Operators Annual Report and fish ticket values. Earnings shown in Figure 1-4 are in real dollars using the 2024 Consumer Price Index from the U.S. Bureau of Labor Statistics.

Permit counts include interim entry permits and permanent permits. Interim-entry permits are issued to individuals during the period when their applications for permanent permits are in adjudication. The last year an interim-entry permit was held for the Southeast Alaska salmon purse seine fishery was in 2003. Some individuals made landings on both an interim-entry permit and subsequently on their newly issued permanent permit in the same year; for these instances, only the permanent permit is counted in this report.

Table 1-11 reports the number of permits issued, permits and vessels with landings, and estimated gross earnings in the Southeast Alaska salmon purse seine fishery from 1975 to 2023. Note that the figures by permit in this table span the entire year, regardless of who held the permit or however many times the permit was transferred.

Table 1-12 reports the number of permit holders (people) and estimated real (inflation-adjusted) gross earnings by each resident type. Where fewer than four individuals made landings, earnings are masked for that group and at least one other to protect confidentiality.

Figure 1-4. Estimated Real Average Gross Earnings Per Southeast Alaska Salmon Purse Seine Permit

- Real earnings are adjusted for inflation using the 2024 U.S. Bureau of Labor Statistics Consumer Price Index.

Table 1-11. Estimated Total Gross Earnings (Real and Nominal) for the Southeast Alaska Salmon Purse Seine Fishery, With Average Earnings (Real) by Permit and Vessel, 1975-2023

Year	Viable Permits	Gross Earnings	Permits With Landings	Average Gross Earnings	Vessels With Landings	Average Vessel Earnings

- Adjusted for inflation to 2024 dollars using U.S. Bureau of Labor Statistics Consumer Price Index.
- Counts will differ from CFEC on-line Basic Information Tables where the on-line data does not account for the combination of interim entry permits that were issued as permanent permits in the same year. Note that these counts are for individuals, not permits.

Chapter 2 Southeast Alaska Salmon Drift Gillnet Fishery

S03A Permit Holdings

Limited entry permits for the Southeast Alaska salmon Drift Gillnet fishery (S03A permits) were issued starting in 1975. Table 2-1 indicates the initial distribution and historical net changes in permit holdings for the fishery. CFEC has issued 475 S03A permits. Of this total, Alaska Locals received 66.3% (315/475) of the permits, Nonlocal Alaskans received 1.1% (5/475) of the permits, and the remaining 32.4% (154/475) of the permits went to Nonresidents. All the S03A permits were issued as transferable permits.

Table 2-1. Initial Issuance and Year-end 2023 Totals of Southeast Alaska Salmon Drift Gillnet Permits, With Net Changes Due to Permit Transfers, Migrations, and Cancellations, by Resident Type

Residency	INITIAL ISSUE		TRANSFERS		MIGRATIONS		CANCELLED		2023 YEAR-END	
	Total	Percent	Change	Percent Change	Change	Percent Change	Change	Percent Change	Total	Percentage
Local	315	66.3%	81	25.7%	-25	-7.9%	-2	-0.6%	369	78.2%
Nonlocal	5	1.1%	7	140.0%	2	40.0%	0	0.0%	14	3.0%
Nonresident	154	32.4%	-74	-48.1%	7	4.5%	-1	-0.6%	86	18.2%
AK Data Missing	1	0.2%	-14	-1400.0%	16	1600.0%	0	0.0%	3	0.6%
Total	475	100.0%	0		0		-3	-0.6%	472	100.0%

The number of permits held by each resident type can change for three reasons: permits can be transferred to other resident types (transfer); permit holders can move from one location to another (migration); or permits can be cancelled, such as when a permit holder does not pay the renewal fee for two consecutive years. This table indicates the extent to which these factors have contributed to net changes in permit holdings in this fishery. Transfers have had the largest impact on the changes.

Transfers of S03A Permits

Under the Limited Entry Act’s terms of free transferability, permits may be sold, traded, given away, or inherited. CFEC requires the completion of a survey with each transfer.³ The surveys provide information such as transfer acquisition methods, the relationship between individuals in the transaction, and the sale amount for instances when the permit is sold.

Table 2-2. Transfer Acquisition Methods for Southeast Alaska Salmon Drift Gillnet Permits, 1980-2023

Acquisition Method	S03A Permit		Combined Southeast Salmon		Statewide Salmon Drift Gillnet		All Fisheries Statewide	
	Count	Percent	Count	Percent	Count	Percent	Count	Percent
Gift	406	23.0%	1,657	17.0%	4,003	30.6%	14,043	32.8%
Sale	1,256	71.2%	7,377	75.8%	8,127	62.0%	24,955	58.3%
Trade	20	1.1%	148	1.5%	127	1.0%	540	1.3%
Inheritance	44	2.5%	394	4.1%	396	3.0%	1,956	4.6%
Other	38	2.2%	150	1.5%	448	3.4%	1,274	3.0%
Total	1,764		9,726		13,101		42,768	

Table 2-2 provides counts of the transfer acquisition methods for the S03A permits, all three Southeast Alaska salmon permit types combined, all statewide salmon drift gillnet permits combined, and all limited entry permits between 1980 and 2023. More than two thirds of all S03A transfers were sales (71.2% or 1,256/1,764), about one fourth were gifts (23.0% or 406/1,764), and a smaller percentage were trades (1.1% or 20/1,764) or other (2.2% or 38/1,764).

Table 2-3. Relationships of Transferor to Transfer Recipients for Southeast Alaska Salmon Drift Gillnet Permits, 1980-2023

Total	1,764		9,726		13,101		42,768	

Table 2-3 shows the relationships between the transferors and transfer recipients for S03A permits and provides counts of S03A permit transfers with all five Southeast Alaska salmon permit types combined, all statewide salmon drift gillnet permits combined, and all limited entry permits from 1980 to 2023. Transfers within the family, both between immediate family members and other relatives, total 28.0% (494/1,764) of all permit transfers for S03A permits compared to 23.6% (2,295/9,726) for all five Southeast Alaska salmon permit types combined, 35.3% (4,627/13,101) for all salmon drift gillnet statewide, and 38.0% (15,253/42,768) for all limited entry permits statewide.

³ CFEC implemented the transfer survey in 1980.

Emergency Transfers of S03A Permits

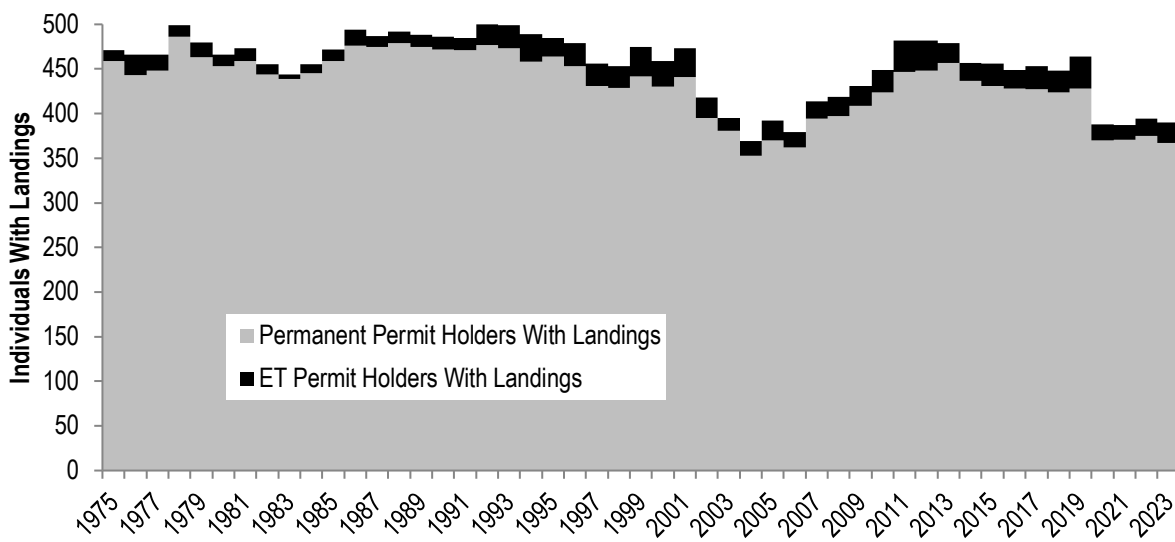

Commercial landings can be made with either permanently held permits or with permits held temporarily through emergency transfers. Emergency transfers (ET) of permits are granted if illness, disability, death, required military or government service, or other unavoidable hardship of a temporary, unexpected, and unforeseen nature prevents the permanent permit holder from participating in the fishery. “Hardship” does not include the results of a permit holder’s own economic decisions, or the results of economic, biological, or regulatory variables which are normally part of the risk of doing business as a fisher. At the end of the year, ET permits automatically revert to the permanent permit holder.

Table 2-4 and Figure 2-1 show the total number of individuals who recorded landings each year, and of that group, the number of individuals who made landings with ET permits. Some individuals who made landings with ET permits also made landings with permanent permits in the same year.

Table 2-4. Use of Emergency Transfer Permits in the Southeast Alaska Drift Gillnet Fishery, 1975-2023

Figure 2-1. Use of Emergency Transfer Permits in the Southeast Alaska Salmon Drift Gillnet Fishery, 1975-2023

Latent S03A Permits

CFEC regulations require individuals to renew their limited entry permits annually, regardless of whether they fish. Permits that are not used (don't record landings) in a particular year are referred to herein as "latent" permits for that year.

Table 2-5 indicates the total number of viable S03A permits issued each year, the number of permits fished (with commercial landings), and the rate of permit latency. Viable permits include both interim entry and permanent permits. Note that for this table, in years when a single individual held an interim-entry permit and was also issued a permanent permit, only the permanent permit is counted. The rate of latency is depicted in Figure 2-2.

There are many reasons why an individual might not fish in any given year. This table and figure do not explain any of these reasons, but simply estimate the rate of permit latency.

Table 2-5. Southeast Alaska Salmon Drift Gillnet Permit Latency, 1975-2023

Year	Permits Issued	Permits Fished	Latency Rate
1975	499	440	11.8%
1976	484	430	11.2%
1977	474	438	7.6%

2023	472	366	22.5%

• When an individual with an interim-entry permit is issued a permanent permit in the same year, only the permanent permit is counted in the above table.

Figure 2-2. Southeast Alaska Salmon Drift Gillnet Permit Latency, 1975-2023

New Entrants into the Southeast Alaska Salmon Drift Gillnet Fishery

New entrants are defined herein as individuals who, for the first time, record a landing on a permanent S03A permit. It is important to note that initial permit holders are not considered new entrants because they needed a proven fishing history prior to 1975 to become an initial permit holder of a limited entry permit. Individuals who only make landings on an emergency transfer or interim-entry permit for any given year are not considered in this table.

Table 2-6 and Figure 2-3 describe individuals rather than permits. An individual may hold up to two permits in this fishery but can only fish one of them. An individual may hold one S03A permit one year, and then in subsequent years hold a different S03A permit. Likewise, individuals may enter and exit the fishery multiple times over the years. Individuals are only counted once as a new entrant and only in the year in which they made their first documented landing.

Table 2-6. New Entrants into the Southeast Alaska Salmon Drift Gillnet Fishery, 1975-2023

Year	Individuals w/Landings	New	New Percent	Year	Individuals w/Landings	New	New Percent	Year	Individuals w/Landings	New	New Percent

• New Entrants excludes individuals with interim-entry and emergency transfer permits.

Figure 2-3. New Entrants into the Southeast Alaska Salmon Drift Gillnet Fishery, 1975-2023

Age of S03A Permit Holders

Table 2-7 shows the annual median age of five different cohorts of people: 1) Southeast Alaska salmon drift gillnet (S03A) permit holders; 2) all five (S01A, S03A, S04D, S05B, and S15B) Southeast Alaska salmon permit holders; 3) all salmon drift gillnet permit holders statewide; 4) all CFEC limited entry permit holders; and 5) the General population of Alaska.

Note that these figures include ages of permit holders for both transferable and non-transferable permits; however, there were no non-transferable S03A permits issued. Some individuals hold permits in more than one fishery; in these cases, the age of the permit holder is counted once for each permit that he or she holds.

The median age of the general Alaska population has increased 7 years between 1980 and 2023. The ages for all CFEC permit holders over the same period increased by 16.4 years, and by 9.5 years for the statewide drift gillnet permit holders. Median ages increased by 16.2 years for the combined Southeast Alaska salmon permit holders.

For S03A permit holders, the median age increased 13.4 years.

Table 2-7. Median age of Select CFEC Permit Holders and the General Alaska population

Year	S03A	Combined SE Salmon	Statewide Salmon Drift Gillnet	Statewide All Permits	AK Worker Median Age

- Median Alaska Age is the average age of all Alaskans as reported by the Alaska Department of Labor and Workforce Development, Research and Analysis Section.
- Displayed figures are rounded to the nearest 10th. Age data from the CFEC permit file is as of December 31st of each year.

S03A Permit Value

Many permit transfers are non-monetary transactions (see Table 2-2). Table 2-8 considers solely the arms-length market transactions where permits are sold. CFEC estimated values are only expressed in real (adjusted for inflation) terms.

Table 2-8. CFEC Estimated Value of Southeast Alaska Salmon Drift Gillnet Permits

Year	S03A Permit Sales	Permit Value	Standard Deviation
1987	28	\$155,700	\$19,400

2023	5	\$67,600	\$8,400

- Permit values represent averages of all arms-length sale transactions over the year. Beginning in 1991, additional data from recent months in the preceding year may be included until at least four observations can be averaged.
- Standard Deviation was not calculated prior to 1987.
- Real permit values were calculated using the 2024 Consumer Price Index from the U.S. Bureau of Labor Statistics.

Southeast Alaska Salmon Drift Gillnet Vessel Characteristics

Table 2-9 reports on various vessel characteristics of the Southeast Alaska salmon drift gillnet fleet since 1978. Reported are the age, length, net tonnage, horsepower, and hold capacity. This data is from the vessel license file which includes voluntarily supplied information on vessels. The first column of each category is the count of vessels with the described characteristics; other statistics reported include the 25th percentile, median, and 75th percentile.

Table 2-9. Southeast Alaska Salmon Drift Gillnet Vessel Characteristics

Year	Vessel Count	Age				Length in Feet				Net Tons				Horsepower				Hold Capacity (ft³)			
		Count	25%	Median	75%	Count	25%	Median	75%	Count	25%	Median	75%	Count	25%	Median	75%	Count	25%	Median	75%

- Mean includes every vessel used in this fishery from 1978 to 2023

Participation and Earnings

Earnings are estimated from weighted average ex-vessel prices, and as noted earlier, largely stem from the ADF&G Commercial Operators Annual Report and fish ticket values. Earnings shown in Figure 2-4 are in real dollars using the 2024 Consumer Price Index from the U.S. Bureau of Labor Statistics.

Permit counts include interim entry permits and permanent permits. Interim-entry permits are issued to individuals during the period when their applications for permanent permits are in adjudication. The last year an interim-entry permit was held for the Southeast Alaska salmon drift gillnet fishery was in 2012. Some individuals made landings on both an interim-entry permit and subsequently on their newly issued permanent permit in the same year; for these instances, only the permanent permit is counted in this report.

Table 2-11 reports the number of permits, permit issued, vessels with landings, and estimated gross earnings in the Southeast Alaska salmon drift gillnet fishery from 1975 to 2023. Note that the figures by permit or vessel in this table span the entire year, regardless of who held the permit or how many times the permit was transferred.

Table 2-12 reports the number of permit holders (people) and estimated real (inflation adjusted) gross earnings by each resident type. Where fewer than four individuals made landings, earnings are masked for that group and at least one other to protect confidentiality.

Figure 2-4. Estimated Real Average Gross Earnings Per Southeast Alaska Salmon Drift Gillnet Permit

- Real earnings are adjusted for inflation using the 2024 U.S. Bureau of Labor Statistics Consumer Price Index.

Table 2-11. Estimated Total Gross Earnings (Real and Nominal) for the Southeast Alaska Salmon Drift Gillnet Fishery, With Average Gross (Real) Earnings by Permit and Vessel, 1975-2023

Year	Viable Permits	Total Gross Earnings	Permits With Landings	Average Real Earnings	Vessels With Landings	Average Real Vessel Earnings

- Adjusted for inflation to 2024 dollars using U.S. Bureau of Labor Statistics Consumer Price Index.
- Counts will differ from CFEC on-line Basic Information Tables where the on-line data does not account for the combination of interim entry permits that were issued as permanent permits in the same year.
- Note that these counts are for individuals, not permits.
- When fewer than four permits make landings, earnings in another column are masked to protect confidentiality.

Chapter 3 Yakutat Salmon Set Gillnet Fishery

S04D Permit Holdings

Limited entry permits for the Yakutat salmon set gillnet fishery (S04D permits) were issued starting in 1975. Table 3-1 indicates the initial distribution and historical net changes in permit holdings for the fishery. CFEC has issued 172 S04D permits. Of this total, Alaska Locals received 75.0% (129/172) of the permits, Nonlocal Alaskans received 14.5% (25/172) of the permits, and Nonresidents received 10.5% (18/172). Every permit issued was a transferable permit.

Table 3-1. Initial Issuance and Year-end 2023 Totals of Yakutat Salmon Set Gillnet Permits, With Net Changes Due to Permit Transfers, Migrations, and Cancellations, by Resident Type

Residency	Initial Issue		Transfers		Migrations		Cancelled		2023 Year End	
	Total	Percent	Change	Percent Change	Change	Percent Change	Cancelled	Percent Cancelled	Total	Percentage
AK Data Missing	0	0.0%	-5	-	7	-	0	-	2	1.2%
Local	129	75.0%	10	7.8%	-35	-27.1%	2	1.6%	102	61.4%
Nonlocal	25	14.5%	-9	-36.0%	22	88.0%	3	12.0%	35	21.1%
Nonresident	18	10.5%	4	22.2%	6	33.3%	1	5.6%	27	16.3%
Total	172	100.0%	0	0.0%	0	0.0%	6	3.5%	166	100.0%

The number of permits held by each resident type can change for three reasons: permits can be transferred to other resident types (transfer); permit holders can move from one location to another (migration); or permits can be cancelled (such as when a permit holder does not pay the renewal fee for two consecutive years or if there is a permit buyback). This table indicates the extent to which these factors have contributed to net changes in permit holdings in this fishery. Migrations have had the largest impact on the changes in permit holdings for this fishery.

Transfers of S04D Permits

Under the Limited Entry Act’s terms of free transferability, permits may be sold, traded, given away, or inherited. CFEC requires the completion of a survey with each transfer.⁴ The surveys provide information such as transfer acquisition methods, the relationship between individuals in the transaction, and the sale amount for instances when the permit is sold.

Table 3-2. Transfer Acquisition Methods for Yakutat Salmon Set Gillnet Permits, 1980-2023

Acquisition Method	S04D Permit		Combined Southeast Salmon		Statewide Salmon Set Gillnet		All Fisheries Statewide	
	Count	Percent	Count	Percent	Count	Percent	Count	Percent
Gift	320	47.8%	1,657	17.0%	6,974	51.5%	14,043	32.8%
Sale	299	44.6%	7,377	75.8%	5,170	38.1%	24,955	58.3%
Trade	4	0.6%	148	1.5%	97	0.7%	540	1.3%
Inheritance	31	4.6%	394	4.1%	830	6.1%	1,956	4.6%
Other	16	2.4%	150	1.5%	483	3.6%	1,274	3.0%
Total	670		9,726		13,554		42,768	

Table 3-2 provides counts of permits by transfer acquisition method for the S04D permits, all five Southeast Alaska salmon permit types combined, statewide salmon set gillnet permits, and all limited entry permits between 1980 and 2023. Nearly half of all S04D permit transfers were gifts (47.8%, or 320/670), most of the other half were transferred as sales (44.6% or 299/670), and a smaller percentage were inheritances (4.6% or 31/670), trades (0.6% or 4/670) or other (7% or 47/670).

Table 3-3. Relationships of Transferor to Transfer Recipients for Yakutat Salmon Set Gillnet Permits, 1980-2023

Relationship	S04D Permit		Combined Southeast Salmon		Statewide Salmon Set Gillnet		All Fisheries Statewide	
	Count	Percent	Count	Percent	Count	Percent	Count	Percent
Business Partner/Friend	180	26.9%	1,932	19.9%	2,766	20.4%	8,041	18.8%
Member of Immediate Family	265	39.6%	2,041	21.0%	6,489	47.9%	14,350	33.6%
Other Relative	66	9.9%	254	2.6%	938	6.9%	1,903	4.4%
Other/None	159	23.7%	5,499	56.5%	3,361	24.8%	18,474	43.2%
Total	670		9,726		13,554		42,768	

Table 3-3 shows the relationships between the transferors and transfer recipients for S04D permits and provides counts of S04D permit transfers with all five Southeast Alaska salmon permit types combined, statewide salmon set gillnet permits, and all limited entry permits from 1980 to 2023. Transfers within the family, both immediate family members and other relatives, total 49.4% (331/670) of all transfers. This compares to 23.6% (2,295/9,726) for all five Southeast Alaska salmon permit types combined, 54.8% (7,427/13,554) for statewide salmon set gillnet permits, and 38% (16,253/42,768) for all limited entry permits statewide.

⁴ CFEC implemented the transfer survey in 1980.

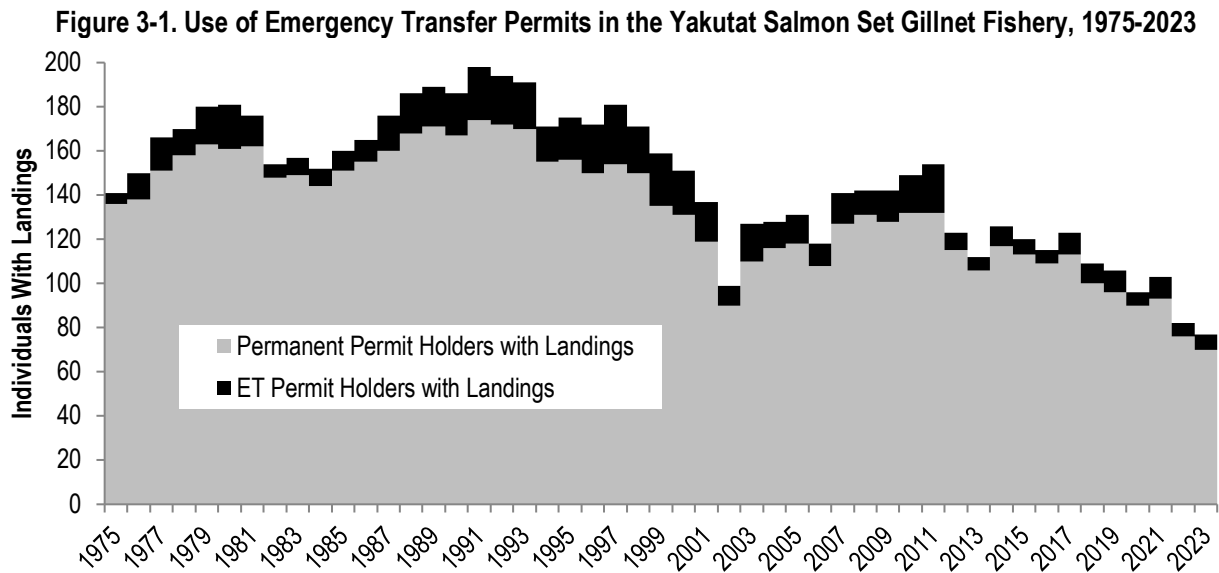

Emergency Transfers of S04D Permits

Commercial landings can be made with either permanently held permits or with permits held temporarily through emergency transfers. Emergency transfers (ET) of permits are granted if illness, disability, death, required military or government service, or other unavoidable hardship of a temporary, unexpected, and unforeseen nature prevents the permanent permit holder from participating in the fishery. “Hardship” does not include the results of a permit holder’s own economic decisions, or the results of economic, biological, or regulatory variables which are normally part of the risk of doing business as a fisher. At the end of the year, ET permits automatically revert to the permanent permit holder.

Table 3-4 and Figure 3-1 show the total number of individuals who recorded landings each year, and of that group, the number of individuals who made landings with ET permits. Some individuals who made landings with ET permits also made landings with permanent permits in the same year.

Table 3-4. Use of Emergency Transfer Permits in the Yakutat Salmon Set Gillnet Fishery, 1975-2023

Year	Individuals with Landings	ET Permit Holders with Landings	ET Rate	Year	Individuals with Landings	ET Permit Holders with Landings	ET Rate	Year	Individuals with Landings	ET Permit Holders with Landings	ET Rate
1975	136	5	3.7%	1992	172	22	12.8%	2009	128	14	10.9%

Latent S04D Permits

CFEC regulations require individuals to renew their limited entry permits annually, regardless of whether they fish. Permits that are not used (don't record landings) in a particular year are referred to herein as "latent" permits for that year.

Table 3-5 indicates the total number of viable S04D permits issued each year, the number of permits fished (with commercial landings), and the rate of permit latency. Viable permits include both interim entry and permanent permits. Note that for this table, in years when a single individual held an interim-entry permit and was also issued a permanent permit, only the permanent permit is counted. The rate of latency is depicted in Figure 3-2.

There are many reasons why an individual might not fish in any given year. This table and figure do not explain any of these reasons but simply estimate the rate of permit latency.

Table 3-5. Yakutat Salmon Set Gillnet Permit Latency, 1975-2023

Year	Permits Issued	Permits Fished	Latency Rate
1975	174	135	22.4%
1976	156	133	14.7%
1977	159	144	9.4%

2016	167	109	34.7%
2017	167	113	32.3%
2018	166	102	38.6%
2019	166	94	43.4%
2020	167	91	45.5%
2021	166	95	42.8%
2022	167	76	54.5%
2023	166	71	57.2%

- Permanent permit in the same year, only the permanent permit is counted in the above table.
- 'Permits Fished' is the number of CFEC permits that were used to record commercial landings in that year.

Figure 3-2. Yakutat Salmon Set Gillnet Permit Latency, 1975-2023

New Entrants into the Yakutat Salmon Set Gillnet Fishery

New entrants are individuals who record a landing for the first time on a permanent S04D permit. It is important to note that initial permit holders are not considered new entrants because they needed a proven fishing history prior to 1975 to become an initial permit holder of a limited entry permit. Individuals who only make landings on an emergency transfer or interim-entry permit for any given year are not considered in this table.

Table 3-6 and Figure 3-3 describe individuals rather than permits. An individual may hold one S04D permit one year, and then in subsequent years hold a different S04D permit. Likewise, individuals may enter and exit the fishery multiple times over the years. Individuals are only counted once as a new entrant and only in the year in which they made their first documented landing.

Table 3-6. New Entrants into the Yakutat Salmon Set Gillnet Fishery, 1975-2023

Year	Individuals with Landings	New Entrants	Percent New
1975	95	5	5.3%

- New Entrants excludes individuals with interim-entry and emergency transfer permits

Figure 3-3. New Entrants into the Yakutat Salmon Set Gillnet Fishery, 1975-2023

Age of S04D Permit Holders

Table 3-7 shows the annual median age of five different cohorts of people: 1) Yakutat salmon set gillnet (S04D) permit holders; 2) all five (S01A, S03A, S04D, S05B, and S15B) Southeast Alaska salmon permit holders; 3) statewide salmon set gillnet permit holders 4) all CFEC limited entry permit holders; and 5) the General population of Alaska.

Note that these figures include ages of permit holders for both transferable and non-transferable permits; however, there were no non-transferable S04D permits issued. Some individuals hold permits in more than one fishery; in these cases, the age of the permit holder is counted once for each permit that he or she holds. The median age of the general Alaska working population has increased 7 years between 1980 and 2023. Statewide salmon set gillnet permit holders increased 16 years. Southeast Alaska salmon permit holders median age increased 16.2 years, and the median age of S04D permit holders increased 19.8 years.

Table 3-7. Median age of Select CFEC Permit Holders and the General Alaska population

Year	S04D	Combined SE Salmon	Statewide Set Gillnet	Statewide All Permits	Median Alaska Age

- Median Alaska Age is the average age of all Alaskans as reported by the Alaska Department of Labor and Workforce Development, Research and Analysis Section.
- Displayed figures are rounded to the nearest 10th. Age data from the CFEC permit file is as of December 31st of each year.

S04D Permit Value

Many permit transfers are non-monetary transactions (see Table 3-2). Table 3-8 considers solely the arms-length market transactions where permits are sold. CFEC estimated values are only expressed in real (adjusted for inflation) terms.

Table 3-8. CFEC Estimated Value of Yakutat Salmon Set Gillnet Permits

Year	S04D Permit Sales	Permit Value	Standard Deviation
1987	4	\$79,200	\$2,700
1988	16	\$78,000	\$5,200
1989	2	\$86,000	\$20,000
1990	8	\$97,200	\$13,800
1991	4	\$112,800	\$6,500
1992	2	\$94,000	\$14,500

2021	3	\$17,600	\$3,300
2022	6	\$17,100	\$1,600
2023	4	\$15,500	\$800

- Permit values represent averages of all arms-length sale transactions over the year. Beginning in 1991, additional data from recent months in the preceding year may have been included until at least four observations could be averaged.
- Real permit values were calculated using the 2024 Consumer Price Index from the U.S. Bureau of Labor Statistics.

S04D Permit Stacking

In 2002, the Alaska Legislature amended Alaska Statute 16.43.140(c) to allow individuals to hold two salmon permits. In 2006, the Legislature passed House Bill 251, granting the Board of Fisheries authority to extend fishing privileges to a second permit. Beginning in 2012, the Alaska Board of Fisheries permitted “stacked permit” operations in the Yakutat salmon set gillnet fishery, enabling individuals to fish additional complements of gear using two permits. By contrast, “single permit” operations involve fishing only one complement of gear.

Accurately reporting the prevalence of stacked permit operations is challenging due to the transferability of S04D permits, which can change hands multiple times within a season. For instance, a fisher might begin as a single permit operation, then acquire a second permit midseason and switch to a stacked permit operation. In some cases, a second permit might be held temporarily through an Emergency Transfer, then replaced with a permanently held permit for the remainder of the season. Unlike other fisheries with stacked permit regulations, there is no registration database to track these operations, and stacked permit deliveries are not recorded on fish tickets.

Additionally, the use of stacked permits is typically restricted during the sockeye salmon season to address conservation concerns for Chinook salmon. Even when it is allowed, some fishers elect not to deploy an additional complement of gear due to crew or logistical limitations. Consequently, there is currently no practical method to track stacked permit deliveries in the S04D permit fishery.

Participation and Earnings

Earnings are estimated from weighted average ex-vessel prices, and as noted earlier, largely stem from the ADF&G Commercial Operators Annual Report and fish ticket values. Earnings shown in Figure 3-4 are in real dollars using the 2024 Consumer Price Index from the U.S. Bureau of Labor Statistics.

Permit counts include interim entry permits and permanent permits. Interim-entry permits are issued to individuals during the period when their applications for permanent permits are in adjudication. The last year an interim-entry permit was held for the Yakutat salmon set gillnet fishery was in 2004. Some individuals made landings on both an interim-entry permit and subsequently on their newly issued permanent permit in the same year; for these instances, only the permanent permit is counted in this report.

Table 3-9 reports the number of permits issued, permits with landings, and estimated gross earnings in the Yakutat salmon set gillnet fishery from 1975 to 2023. Note that the figures by permit in this table span the entire year, regardless of who held the permit or however many times the permit was transferred. Table 3-10 reports the number of permit holders (people) and estimated real (inflation-adjusted) gross earnings by each resident type. Where fewer than four individuals made landings, earnings are masked for that group and at least one other to protect confidentiality.

Figure 3-4. Estimated Real Average Gross Earnings Per Yakutat Salmon Set Gillnet Permit

- Real earnings are adjusted for inflation using the 2024 U.S. Bureau of Labor Statistics Consumer Price Index.

Table 3-9. Estimated Total Gross Earnings (Real and Nominal) for the Yakutat Salmon Set Gillnet Fishery, With Average Earnings (Real) by Permit, 1975-2023

Year	Viable Permits	Total Gross Earnings	Permits With Landings	Average Real Earnings
1975	174	\$3,562,221	135	26,387

- Adjusted for inflation to 2024 dollars using U.S. Bureau of Labor Statistics Consumer Price Index.
- Counts will differ from CFEC on-line Basic Information Tables where the on-line data does not account for the combination of interim entry permits that were issued as permanent permits in the same year. Note that these counts are for individuals, not permits.

Chapter 4 Statewide Salmon Hand Troll Fishery

S05B Permit Holdings

Limited entry permits for the statewide salmon hand troll fishery (S05B permits) were issued starting in 1982. Table 4-1 indicates the initial distribution and historical net changes in permit holdings for the fishery. CFEC has issued 2,162 S05B permits. Of this total, Alaska Locals received 90.5% (1,956/2,162) of the permits, Nonlocal Alaskans received 2.5% (53/2,162) of the permits, and Nonresidents received 6.5% (141/2,162). More than two-thirds (67.4%, or 1,457/2,162) of the permits were issued as non-transferable permits.

Table 4-1. Initial Issuance and Year-end 2023 Totals of Statewide Salmon Hand Troll Permits, With Net Changes Due to Permit Transfers, Migrations, and Cancellations, by Resident Type

Residency	INITIAL ISSUE		TRANSFERS		MIGRATIONS		CANCELLED		2023 YEAR-END	
	Total	Percent	Change	Percent Change	Change	Percent Change	Change	Percent Change	Total	Percentage
Local	1,956	90.5%	11	0.6%	-211	-10.8%	-1,018	-52.0%	738	85.2%
Nonlocal	52	2.4%	-55	-105.8%	120	230.8%	-82	-157.7%	35	4.0%
Nonresident	154	7.1%	44	28.6%	91	59.1%	-196	-127.3%	93	10.7%
Total	2,162	100.0%	0	0.0%	0	0.0%	-1,296	-59.9%	866	100.0%

The number of permits held by each resident type can change for three reasons: permits can be transferred to other resident types (transfer); permit holders can move from one location to another (migration); or permits can be cancelled (such as when a permit holder does not pay the renewal fee for two consecutive years). This table indicates the extent to which these factors have contributed to net changes in permit holdings in this fishery.

Cancelled permits have had the largest impact on S05B permit holdings. The majority (93.9%, or 1,217/1,296) of the cancelled permits were non-transferable.

Transfers of S05B Permits

Under the Limited Entry Act’s terms of free transferability, transferable permits may be sold, traded, given away, or inherited. CFEC requires the completion of a survey with each transfer.⁵ The surveys provide information such as transfer acquisition methods, the relationship between individuals in the transaction, and the sale amount for instances when the permit is sold.

Table 4-2. Transfer Acquisition Methods for Statewide Salmon Hand Troll Permits, 1982-2023

Acquisition Method	S05B Permit		Combined Southeast Salmon		Statewide Salmon Troll		All Fisheries Statewide	
	Count	Percent	Count	Percent	Count	Percent	Count	Percent
Gift	384	11.6%	1,657	17.0%	696	11.2%	14,043	32.8%
Sale	2,686	81.3%	7,377	75.8%	5,057	81.6%	24,955	58.3%
Trade	62	1.9%	148	1.5%	104	1.7%	540	1.3%
Inheritance	137	4.1%	394	4.1%	265	4.3%	1,956	4.6%
Other	35	1.1%	150	1.5%	77	1.2%	1,274	3.0%
Total	3,304		9,726		6,199		42,768	

Table 4-2 provides counts of permits by transfer acquisition method for the S05B permits, all five Southeast Alaska salmon permit types combined, both hand and power troll permits, and all limited entry permits between 1982 and 2023. More than four-fifths of all S05B permit transfers were sales (81.3%, or 2,686/3,304), about one in ten were transferred as gifts (11.6% or 384/3,304).

Table 4-3. Relationships of Transferor to Transfer Recipients for Statewide Salmon Hand Troll Permits, 1982-2023

Relationship	S05B Permit		Combined Southeast Salmon		Statewide Salmon Troll		All Fisheries Statewide	
	Count	Percent	Count	Percent	Count	Percent	Count	Percent
Business Partner/Friend	705	21.3%	1,932	19.9%	931	15.0%	8,041	18.8%
Member of Immediate Family	555	16.8%	2,041	21.0%	3,165	51.1%	14,350	33.6%
Other Relative	68	2.1%	254	2.6%	112	1.8%	1,903	4.4%
Other	1,976	59.8%	5,499	56.5%	1,991	32.1%	18,474	43.2%
Total	3,304		9,726		6,199		42,768	

Table 4-3 shows the relationships between the transferors and transfer recipients for S05B permits and provides counts of S05B permit transfers with all five Southeast Alaska salmon permit types combined, statewide salmon troll permits, and all limited entry permits from 1982 to 2023. Transfers within the family, both immediate family members and other relatives, total 18.9% (623/3,304) of all transfers. This compares to 23.6% (2,295/9,726) for all five Southeast Alaska salmon permit types combined, 52.9% (3,275/6,199) for statewide salmon troll permits, and 38% (16,253/42,768) for all limited entry permits statewide.

⁵ CFEC implemented the transfer survey in 1980.

Emergency Transfers of S05B Permits

Commercial landings can be made with either permanently held permits or with permits held temporarily through emergency transfers. Emergency transfers (ET) of permits are granted if illness, disability, death, required military or government service, or other unavoidable hardship of a temporary, unexpected, and unforeseen nature prevents the permanent permit holder from participating in the fishery. “Hardship” does not include the results of a permit holder’s own economic decisions, or the results of economic, biological, or regulatory variables which are normally part of the risk of doing business as a fisher. At the end of the year, ET permits automatically revert to the permanent permit holder.

Table 4-4 and Figure 4-1 show the total number of individuals who recorded landings each year, and of that group, the number of individuals who made landings with ET permits. Some individuals who made landings with ET permits also made landings with permanent permits in the same year.

Table 4-4. Use of Emergency Transfer Permits in the Statewide Salmon Hand Troll Fishery, 1982-2023

Year	Individuals With Landings	ET Permit Holders With Landings	ET Rate
1982	1,068	3	0.3%

Figure 4-1. Use of Emergency Transfer Permits in the Statewide Salmon Hand Troll Fishery, 1982-2023

Latent S05B Permits

CFEC regulations require individuals to renew their limited entry permits annually, regardless of whether they fish. Permits that are not used (don't record landings) in a particular year are referred to herein as "latent" permits for that year.

Table 4-5 indicates the total number of viable S05B permits issued each year, the number of permits fished (with commercial landings), and the rate of permit latency. Viable permits include both interim entry and permanent permits. Note that for this table, in years when a single individual held an interim-entry permit and was also issued a permanent permit, only the permanent permit is counted. The rate of latency is depicted in Figure 4-2.

There are many reasons why an individual might not fish in any given year. This table and figure do not explain any of these reasons, but simply estimate the rate of permit latency.

Table 4-5. Statewide Salmon Hand Troll Permit Latency, 1982-2023

Year	Permits		Latency Rate
	Issued	Fished	
1982	1,909	1,067	44.1%
1983	2,150	946	56.0%
1984	2,147	860	59.9%
1985	2,030	903	55.5%
1986	1,983	804	59.5%
1987	1,937	763	60.6%
1988	1,870	777	58.4%
1989	1,817	694	61.8%
1990	1,782	699	60.8%
1991	1,741	700	59.8%
1992	1,688	645	61.8%
1993	1,634	600	63.3%
1994	1,579	547	65.4%
1995	1,540	460	70.1%
1996	1,501	412	72.6%
1997	1,459	387	73.5%
1998	1,409	304	78.4%
1999	1,370	338	75.3%
2000	1,329	315	76.3%
2001	1,295	307	76.3%
2002	1,248	253	79.7%
2003	1,189	265	77.7%
2004	1,140	324	71.6%
2005	1,108	353	68.1%
2006	1,105	371	66.4%
2007	1,083	375	65.4%
2008	1,065	375	64.8%
2009	1,055	364	65.5%
2010	1,044	339	67.5%
2011	1,037	372	64.1%
2012	1,019	353	65.4%
2013	1,002	362	63.9%
2014	992	346	65.1%
2015	978	316	67.7%
2016	959	269	71.9%
2017	950	256	73.1%
2018	945	235	75.1%
2019	918	227	75.3%
2020	910	218	76.0%
2021	902	210	76.7%
2022	880	173	80.3%
2023	866	159	81.6%

- When an individual with an interim-entry permit is issued a permanent permit in the same year, only the permanent permit is counted in the above table.
- 'Permits Fished' is the number of CFEC permits that were used to record commercial landings in that year.

Figure 4-2. Statewide Salmon Hand Troll Permit Latency, 1982-2023

New Entrants into the Statewide Salmon Hand Troll Fishery

New entrants are defined herein as individuals who, for the first time, record a landing on a permanent S05B permit. It is important to note that initial permit holders are not considered new entrants because they needed a proven fishing history prior to 1980 to become an initial permit holder of a limited entry

permit. Individuals who only make landings on an emergency transfer or interim-entry permit for any given year are not considered in this table.

Table 4-6 and Figure 4-3 describe individuals rather than permits. An individual may hold up to two permits in this fishery but can only fish one of them. An individual may hold one S05B permit one year, and then in subsequent years hold a different S05B permit. Likewise, individuals may enter and exit the fishery multiple times over the years. Individuals are only counted once as a new entrant and only in the year in which they made their first documented landing.

Table 4-6. New Entrants into the Statewide Salmon Hand Troll Fishery, 1982-2023

Year	Individuals		Percent New	Year	Individuals		Percent New	Year	Individuals		Percent New
	w/Landings	New			w/Landings	New			w/Landings	New	
1982	451	24	5.3%	1998	304	46	15.1%	2014	349	50	14.3%
1983	937	80	8.5%	1999	338	47	13.9%	2015	322	41	12.7%
1984	845	65	7.7%	2000	314	45	14.3%	2016	271	25	9.2%
1985	877	86	9.8%	2001	308	36	11.7%	2017	257	40	15.6%
1986	802	110	13.7%	2002	253	29	11.5%	2018	235	28	11.9%

2023	63.4	59.8	62.1	56.0	37.0

- Median Alaska Age is the average age of all Alaskans as reported by the Alaska Department of Labor and Workforce Development, Research and Analysis Section.
- Displayed figures are rounded to the nearest 10th. Age data from the CFEC permit file is as of December 31st of each year.

Table 4-7 shows the annual median age of five different cohorts of people: 1) Statewide salmon hand troll (S05B) permit holders; 2) all five (S01A, S03A, S04D, S05B, and S15B) Southeast Alaska salmon permit holders; 3) statewide salmon troll permit holders 4) all CFEC limited entry permit holders; and 5) the General population of Alaska.

Some individuals hold permits in more than one fishery; in these cases, the age of the permit holder is counted once for each permit that he or she holds.

The median age of the general Alaska population has increased 7 years between 1982 and 2023. The ages over the same period for all CFEC permit holders increased by 16.5 years, and 21.9 years for the statewide salmon hand and power troll permit holders combined, and 17.2 years for the combined Southeast Alaska salmon permit holders.

For S05B permit holders, the median age increased 21.9 years.

S05B Permit Value

Many permit transfers are non-monetary transactions (see Table 4-2). Table 4-8 considers solely the arms-length market transactions where permits are sold. CFEC estimated values are only expressed in real (adjusted for inflation) terms.

Table 4-8. CFEC Estimated Value of Statewide Salmon Hand Troll Permits, 1987-2023

Year	Hand Troll Permit Sales	Permit Value	Standard Deviation
1987	90	\$14,700	\$1,100
1988	96	\$16,400	\$2,000
1989	62	\$18,000	\$1,900

2019	24	\$10,200	\$700
2020	40	\$9,300	\$600
2021	43	\$9,800	\$900
2022	34	\$10,400	\$700
2023	25	\$8,500	\$800

- Permit values represent averages of all arms-length sale transactions over the year. Beginning in 1991, additional data from recent months in the preceding year may be included until at least four observations can be averaged.
- The Standard Deviation was not calculated prior to 1987. See https://www.cfec.state.ak.us/pmtvalue/pre1987_main.htm for details..
- Real permit values were calculated using the 2024 Consumer Price Index from the U.S. Bureau of Labor Statistics.

Statewide Salmon Hand Troll Vessel Characteristics

Table 4-9 reports on various vessel characteristics of the Statewide salmon hand troll fleet since 1982. Reported are the age, length, net tonnage, horsepower, and hold capacity. This data is from the vessel license file which includes voluntarily supplied information on vessels. The first column of each category is the count of vessels with the described characteristics; other statistics reported include the 25th percentile, median, and 75th percentile.

Table 4-9. Statewide Salmon Hand Troll Vessel Characteristics, 1982-2023

Year	Vessel Count	Age				Length in Feet				Net Tons				Horsepower				Hold Capacity (ft ³)			
		Count	25%	Median	75%	Count	25%	Median	75%	Count	25%	Median	75%	Count	25%	Median	75%	Count	25%	Median	75%

- Mean values include every vessel used in this fishery from 1982 to 2023.

Table 4-10 provides additional Statewide salmon hand troll vessel characteristics. Included are statistics of engine power type and hull material for each year since 1982.

Table 4-10. Additional Statewide Salmon Hand Troll Vessel Characteristics, 1982-2023

• Mean values include every vessel used in this fishery from 1982 to 2023.

Participation and Earnings

Earnings are estimated from weighted average ex-vessel prices, and as noted earlier, largely stem from the ADF&G Commercial Operators Annual Report and fish ticket values. Earnings shown in Figure 4-4 are in real dollars using the 2024 Consumer Price Index from the U.S. Bureau of Labor Statistics.

Permit counts include interim entry permits and permanent permits. Interim-entry permits are issued to individuals during the period when their applications for permanent permits are in adjudication. The last year an interim-entry permit was held for the Statewide salmon hand troll fishery was in 2010. Some individuals made landings on both an interim-entry permit and subsequently on their newly issued permanent permit in the same year; for these instances, only the permanent permit is counted in this report.

Table 4-11 reports the number of permits issued, permits and vessels with landings, and estimated gross earnings in the Statewide salmon hand troll fishery from 1982 to 2023. Note that the figures by permit in this table span the entire year, regardless of who held the permit or however many times the permit was transferred.

Table 4-12 reports the number of permit holders (people) and estimated real (inflation-adjusted) gross earnings by each resident type. Where fewer than four individuals made landings, earnings are masked for that group and at least one other to protect confidentiality.

Figure 4-4. Estimated Real Average Gross Earnings Per Statewide Salmon Hand Troll Permit, 1975-2023

- Real earnings are adjusted for inflation using the 2024 U.S. Bureau of Labor Statistics Consumer Price Index.

Table 4-11. Estimated Total Gross Earnings (Real and Nominal) for the Statewide Salmon Hand Troll Fishery, With Average Earnings (Real) by Permit and Vessel, 1975-2023

Year	Permits	Total Gross Earnings	Permits With Landings	Average Earnings	Vessels With Landings	Average Vessel Earnings

- Adjusted for inflation to 2024 dollars using U.S. Bureau of Labor Statistics Consumer Price Index.
- Counts will differ from CFEC on-line Basic Information Tables where the on-line data does not account for the combination of interim entry permits that were issued as permanent permits in the same year. Note that these counts are for individuals, not permits.

Chapter 5 Statewide Salmon Power Troll

S15B Permit Holdings

Limited entry permits for the Statewide salmon power troll (S15B permits) were issued starting in 1975. Table 5-1 indicates the initial distribution and historical net changes in permit holdings for the fishery. CFEC has issued 972 S15B permits. Of this total, Alaska Locals received 69.4% (675/972) of the permits, Nonlocal Alaskans received 1.6% (16/972) of the permits, and Nonresidents received 28.9% (281/972). Every permit issued was a transferable permit.

Table 5-1. Initial Issuance and Year-end 2023 Totals of Statewide Salmon Power Troll Permits, With Net Changes Due to Permit Transfers, Migrations, and Cancellations, by Resident Type

Residency	INITIAL ISSUE		TRANSFERS		MIGRATIONS		CANCELLED		2023 YEAR-END	
	Total	Percent	Change	Percent Change	Change	Percent Change	Change	Percent Change	Total	Percentage
Local	675	69.4%	214	31.7%	-141	-20.9%	-7	-1.0%	741	77.2%
Nonlocal	16	1.6%	-4	-25.0%	16	100.0%	-1	-6.3%	27	2.8%
Nonresident	281	28.9%	-150	-53.4%	57	20.3%	-4	-1.4%	184	19.2%
AK Data Missing	0	0.0%	-60	.	68	.	0	0.0%	8	0.8%
Total	972	100.0%	0		0		-12	-1.2%	960	100.0%

The number of permits held by each resident type can change for three reasons: permits can be transferred to other resident types (transfer); permit holders can move from one location to another (migration); or permits can be cancelled (such as when a permit holder does not pay the renewal fee for two consecutive years). This table indicates the extent to which these factors have contributed to net changes in permit holdings in this fishery. Transfers have contributed the most to changes of permit holdings in this fishery.

Transfers of S15B Permits

Under the Limited Entry Act’s terms of free transferability, permits may be sold, traded, given away, or inherited. CFEC requires the completion of a survey with each transfer. The surveys provide information such as transfer acquisition methods, the relationship between individuals in the transaction, and the sale amount for instances when the permit is sold.

Table 5-2. Transfer Acquisition Methods for Statewide Salmon Power Troll Permits, 1980-2023

Acquisition Method	S15B Permit		Combined Southeast Salmon		Statewide Salmon Troll		All Fisheries Statewide	
	Count	Percent	Count	Percent	Count	Percent	Count	Percent
Gift	312	10.8%	1,657	17.0%	696	11.2%	14,043	32.8%
Sale	2,371	81.9%	7,377	75.8%	5,057	81.6%	24,955	58.3%
Trade	42	1.5%	148	1.5%	104	1.7%	540	1.3%
Inheritance	128	4.4%	394	4.1%	265	4.3%	1,956	4.6%
Other	42	1.5%	150	1.5%	77	1.2%	1,274	3.0%
Total	2,895		9,726		6,199		42,768	

Table 5-2 provides counts of permits by transfer acquisition method for the S15B permits, all five Southeast Alaska salmon permit types combined, statewide salmon troll permits, and all limited entry permits between 1980 and 2023. More than four-fifths of all S15B permit transfers were sales (81.9%, or 2,371/2,895), about one in eight were transferred as gifts (10.8% or 312/2,895), and a smaller percentage were trades (1.5% or 42/2,895) or other (5.9% or 170/2,895).

Table 5-3. Relationships of Transferor to Transfer Recipients for Statewide Salmon Power Troll Permits, 1980-2023

Relationship	S15B Permit		Combined Southeast Salmon		Statewide Salmon Troll		All Fisheries Statewide	
	Count	Percent	Count	Percent	Count	Percent	Count	Percent
Business Partner/Friend	547	18.9%	1,932	19.9%	931	15.0%	8,041	18.8%
Member of Immediate Family	479	16.5%	2,041	21.0%	3,165	51.1%	14,350	33.6%
Other Relative	50	1.7%	254	2.6%	112	1.8%	1,903	4.4%
Other	1,819	62.8%	5,499	56.5%	1,991	32.1%	18,474	43.2%
Total	2,895		9,726		6,199		42,768	

Table 5-3 shows the relationships between the transferors and transfer recipients for S15B permits and provides counts of S15B permit transfers with all five Southeast Alaska salmon permit types combined, statewide salmon troll permits, and all limited entry permits from 1980 to 2023. Transfers within the family, both immediate family members and other relatives, total 18.3% (529/2,895) of all transfers. This compares to 18.6% (1,152/6,199) for all five Southeast Alaska salmon permit types combined, 18.3% (529/2,895) for statewide hand and power troll permits, and 38% (16,253/42,768) for all limited entry permits statewide.

Emergency Transfers of S15B Permits

Commercial landings can be made with either permanently held permits or with permits held temporarily through emergency transfers. Emergency transfers (ET) of permits are granted if illness, disability, death, required military or government service, or other unavoidable hardship of a temporary, unexpected, and unforeseen nature prevents the permanent permit holder from participating in the fishery. “Hardship” does not include the results of a permit holder’s own economic decisions, or the results of economic, biological, or regulatory variables which are normally part of the risk of doing business as a fisher. At the end of the year, ET permits automatically revert to the permanent permit holder.

Table 5-4 and Figure 5-1 show the total number of individuals who recorded landings each year, and of that group, the number of individuals who made landings with ET permits. Some individuals who made landings with ET permits also made landings with permanent permits in the same year.

Table 5-4. Use of Emergency Transfer Permits in the Statewide Salmon Power Troll, 1975-2023

Figure 5-1. Use of Emergency Transfer Permits in the Statewide Salmon Power Troll, 1975-2023

Latent S15B Permits

CFEC regulations require individuals to renew their limited entry permits annually, regardless of whether they fish. Permits that are not used (don't record landings) in a particular year are referred to herein as "latent" permits for that year.

Table 5-5 indicates the total number of viable S15B permits issued each year, the number of permits fished (with commercial landings), and the rate of permit latency. Viable permits include both interim entry and permanent permits. Note that for this table, in years when a single individual held an interim-entry permit and was also issued a permanent permit, only the permanent permit is counted. The rate of latency is depicted in Figure 5-2.

There are many reasons why an individual might not fish in any given year. This table and figure do not explain any of these reasons, but simply estimate the rate of permit latency.

Table 5-5. Statewide Salmon Power Troll Permit Latency, 1975-2023

Year	Permits		Latency Rate	Year	Permits		Latency Rate	Year	Permits		Latency Rate
	Issued	Fished			Issued	Fished			Issued	Fished	
1975	1,049	757	27.8%	1992	957	837	12.5%	2009	961	745	22.5%
1976	979	740	24.4%	1993	956	836	12.6%	2010	962	729	24.2%

1982	968	810	16.3%	1999	965	721	25.3%	2016	961	745	22.5%
1983	968	810	16.3%	2000	963	712	26.1%	2017	961	721	25.0%
1984	963	795	17.4%	2001	965	701	27.4%	2018	961	669	30.4%
1985	963	830	13.8%	2002	965	666	31.0%	2019	959	661	31.1%
1986	957	827	13.6%	2003	965	637	34.0%	2020	960	628	34.6%
1987	957	828	13.5%	2004	961	688	28.4%	2021	957	629	34.3%
1988	956	828	13.4%	2005	961	715	25.6%	2022	956	609	36.3%
1989	955	830	13.1%	2006	961	737	23.3%	2023	953	552	42.1%
1990	956	839	12.2%	2007	961	740	23.0%				
1991	958	847	11.6%	2008	961	745	22.5%				

- When an individual with an interim-entry permit is issued a permanent permit in the same year, only the permanent permit is counted in the above table.
- 'Permits Fished' is the number of CFEC permits that were used to record commercial landings in that year.

Figure 5-2. Statewide Salmon Power Troll Permit Latency, 1975-2023

New Entrants into the Statewide Salmon Power Troll

New entrants are defined herein as individuals who, for the first time, record a landing on a permanent S15B permit. It is important to note that initial permit holders are not considered new entrants because they needed a proven fishing history prior to 1975 to become an initial permit holder of a limited entry

permit. Individuals who only make landings on an emergency transfer or interim-entry permit for any given year are not considered in this table.

Table 5-6 and Figure 5-3 describe individuals rather than permits. An individual may hold up to two permits in this fishery but can only fish one of them. An individual may hold one S15B permit one year, and then in subsequent years hold a different S15B permit. Likewise, individuals may enter and exit the fishery multiple times over the years. Individuals are only counted once as a new entrant and only in the year in which they made their first documented landing.

Table 5-6. New Entrants into the Statewide Salmon Power Troll, 1975-2023

Year	Individuals w/Landings	New	New Percent

• New Entrants excludes individuals with interim-entry and emergency transfer permits.

Figure 5-3. New Entrants into the Statewide Salmon Power Troll, 1975-2023

Age of S15B Permit Holders

Table 5-7 shows the annual median age of five different cohorts of people: 1) statewide salmon power troll (S15B) permit holders; 2) all five (S01A, S03A, S04D, S05B, and S15B) Southeast Alaska salmon permit holders; 3) statewide salmon power and hand troll permit holders 4) all CFEC limited entry permit holders; and 5) the General population of Alaska.

Note that these figures include ages of permit holders for both transferable and non-transferable permits; however, there were no non-transferable S15B permits issued. Some individuals hold permits in more than one fishery; in these cases, the age of the permit holder is counted once for each permit that he or she holds.

The median age of the general Alaska population has increased 7 years between 1980 and 2023. The change in ages over the same period for all CFEC permit holders increased 16.4 years, and 16.8 for the statewide salmon hand and power troll permit holders. Median ages increased by 16.3 for the combined Southeast Alaska salmon permit holders.

For S15B permit holders, the median age increased 15.1 years).

Table 5-7. Median age of Select CFEC Permit Holders and the General Alaska population

- Median Alaska Age is the average age of all Alaskans as reported by the Alaska Department of Labor and Workforce Development, Research and Analysis Section.
- Displayed figures are rounded to the nearest 10th. Age data from the CFEC permit file is as of December 31st of each year.

S15B Permit Value

Many permit transfers are non-monetary transactions (see Table 5-2). Table 5-8 considers solely the arms-length market transactions where permits are sold. CFEC estimated values are only expressed in real (adjusted for inflation) terms.

Table 5-8. CFEC Estimated Value of Statewide Salmon Power Troll Permits

Year	S15B Permit Sales	Permit Value	Standard Deviation
1987	63	\$70,000	\$8,400
1988	65	\$76,100	\$5,800
1989	55	\$78,300	\$7,500
1990	50	\$76,300	\$4,900

2023	22	\$25,000	\$3,700

- Permit values represent averages of all arms-length sale transactions over the year. Beginning in 1991, additional data from recent months in the preceding year may be included until at least four observations can be averaged.
- Real permit values were calculated using the 2024 Consumer Price Index from the U.S. Bureau of Labor Statistics

Statewide Salmon Power Troll Vessel Characteristics

Table 5-9 reports on various vessel characteristics of the statewide salmon power troll fleet since 1978. Reported are the age, length, net tonnage, horsepower, and hold capacity. This data is from the vessel license file which includes voluntarily supplied information on vessels. The first column of each category is the count of vessels with the described characteristics; other statistics reported include the 25th percentile, median, and 75th percentile.

Table 5-9. Statewide Salmon Power Troll Vessel Characteristics

Year	Vessel Count	Age				Length in Feet				Net Tons				Horsepower				Hold Capacity (ft ³)			
		Count	25%	Median	75%	Count	25%	Median	75%	Count	25%	Median	75%	Count	25%	Median	75%	Count	25%	Median	75%

Chapter 5. Statewide Salmon Power Troll (S15B)

Table 5-10 provides additional statewide salmon power troll vessel characteristics. Included are statistics of engine power type and hull material for each year since 1978.

Table 5-10. Additional Statewide Salmon Power Troll Vessel Characteristics

- Mean values include every vessel used in this fishery from 1978 to 2023.

Participation and Earnings

Earnings are estimated from weighted average ex-vessel prices, and as noted earlier, largely stem from the ADF&G Commercial Operators Annual Report and fish ticket values. Earnings shown in Figure 5-4 are in real dollars using the 2024 Consumer Price Index from the U.S. Bureau of Labor Statistics.

Permit counts include interim entry permits and permanent permits. Interim-entry permits are issued to individuals during the period when their applications for permanent permits are in adjudication. The last year an interim-entry permit was held for the statewide salmon power troll was in 2002. Some individuals made landings on both an interim-entry permit and subsequently on their newly issued permanent permit in the same year; for these instances, only the permanent permit is counted in this report.

Table 5-11 reports the number of permits issued, permits and vessels with landings, and estimated gross earnings in the Statewide salmon power troll from 1975 to 2023. Note that the figures by permit in this table span the entire year, regardless of who held the permit or however many times the permit was transferred.

Table 5-12 reports the number of permit holders (people) and estimated real (inflation-adjusted) gross earnings by each resident type. Where fewer than four individuals made landings, earnings are masked for that group and at least one other to protect confidentiality.

Figure 5-4. Estimated Real Average Gross Earnings Per Statewide Salmon Power Troll Permit

- Real earnings are adjusted for inflation using the 2024 U.S. Bureau of Labor Statistics Consumer Price Index.

Table 5-11. Estimated Total Gross Earnings for the Statewide Salmon Power Troll Fishery, With Average Earnings by Permit and Vessel, 1975-2023

Year	Viable Permits	Total Gross Earnings	Permits With Landings	Average Earnings	Vessels With Landings	Average Vessel Earnings

- Adjusted for inflation to 2024 dollars using U.S. Bureau of Labor Statistics Consumer Price Index.
- Counts will differ from CFEC on-line Basic Information Tables where the on-line data does not account for the combination of interim entry permits that were issued as permanent permits in the same year. Note that these counts are for individuals, not permits.

Chapter 6 Permit Holdings in Multiple Southeast Alaska Salmon Fisheries

Because of their established fishing history in multiple fisheries prior to limitation, some initial permit holders were issued permits in more than one fishery. Table 6-1 provides counts of permit holders who were issued only one permit in a Southeast salmon fishery, 6-2 has counts of permit holders issued two permits in a Southeast salmon fishery, and 6-3 includes the counts of permit holders who were issued three permits in a Southeast salmon fishery. No individual was issued more than three permits in a Southeast salmon fishery.

Table 6-1. Initial Permit Issuance in One Southeast Alaska Salmon Fishery

Permit Type	One Permit	Multiple Permits	Total
Southeast Alaska Purse Seine	321	97	418
Southeast Alaska Drift Gillnet	349	125	474
Yakutat Set Gillnet	151	20	171
Hand Troll	2,027	135	2,162
Power Troll	791	180	971

Table 6-2. Initial Permit Issuance in Two Southeast Alaska Salmon Fisheries

Permit Type	Southeast Alaska Purse Seine	Southeast Alaska Drift Gillnet	Yakutat Set Gillnet	Hand Troll	Power Troll
Southeast Alaska Purse Seine		8	0	33	49
Southeast Alaska Drift Gillnet	8		0	34	71
Yakutat Set Gillnet	0	0		14	5
Hand Troll	33	34	14		39
Power Troll	49	71	5	39	

Table 6-3. Initial Permit Issuance in Three Southeast Alaska Salmon Fisheries

Purse Seine/Drift Gillnet/Hand Troll	1
Purse Seine/Drift Gillnet/Power Troll	2
Purse Seine/Hand Troll/Power Troll	4
Yakutat Set Gillnet/Hand Troll/Power Troll	1

Table 6-4 shows the count of Yakutat and Southeast permit holders who either held or fished in one or more fisheries at some point during the year. Both the hand and power troll fisheries are combined for tables 6-4 through 6-8. For this table, '1 Permit' indicates that the person did not hold multiple permits but held a sole permit only.

Table 6-4. Held and Fished Salmon Permits in Yakutat and Southeast Alaska

Appendix A. Stacked Permit Regulations

2002: AS 16.43.140 (c) was amended to allow individuals to hold two salmon limited entry permits in the same fishery. 2006: AS 16.05.251 (i) gives the BOF the authority to grant fishing privileges to the second permit held by an individual.					
Fishery	First Season in Effect	Basic Regulation	Identification	Special Considerations	Regulation
Kodiak Salmon Set Gillnet S04K	2 regulations: (a) 2008 and (b) 1985 then 2010:	(a) Permit holders may own and fish 2 permits simultaneously. Their allowable gear doubles from 2 nets and 150 fathoms to 4 nets and 300 fathoms. (b) Two permit holders may fish in a joint venture; the operation's total allowable gear increases from 2 nets and 150 fathoms to 3 nets and to 300 fathoms	In 2008 persons who fished 2 permits were issued 2 permit cards: a standard card and a white-colored (non-functioning) card. In 2009, the non-functioning card was yellow-colored. In 2010, persons were issued 2 standard cards, and either could be used to record a landing. Gillnet buoys must be marked with a 'D' and both permit numbers when operation fishes 2 permits.	(a) this regulation expired after 2010	5 AAC 18.331
Bristol Bay Salmon Set Gillnet S04T	2010	Permit holders may own and fish 2 permits simultaneously. Their allowable gear doubles from 2 nets and 50 fathoms to 4 nets and 100 fathoms.	Persons who fish 2 permits are issued 2 permit cards. Each are standard cards, and either can be used to record a landing. Gillnet buoys must be marked with a 'D' and with both permit numbers when the operation fishes 2 permits.	(u) expired after 2012	5 AAC 06.331(u)
Cook Inlet Salmon Drift Gillnet S03H	2017	Permit holders may own and fish 2 permits simultaneously. Their allowable gear increases from 150 (with 1 permit) to 200 fathoms of drift gillnet gear.	Vessels display a 'D' adjacent to the license plate when fishing 2 permits. Otherwise, the 'D' is to be covered		5 AAC 21.333(a)
Cook Inlet Salmon Set Gillnet S04H	2011	Permit holders may own and fish 2 permits simultaneously. Their allowable gear doubles from 4 nets and 105 fathoms to 210 fathoms in aggregate, with no single net longer than 35 fathoms, of which no more than 105 fathoms may be more than 29 meshes in depth in the Upper Subdistrict.	Persons who fish 2 permits are issued 2 permit cards. Each are standard cards, and either can be used to record a landing. Gillnet buoys must be marked with a 'D' and with both permit numbers when the operation fishes 2 permits. The identification buoy attached to gillnet gear of no more than 29 meshes in depth must be marked with a "D 29" following the CFEC permit holder's permit number.		5 AAC 21.331
Yakutat Salmon Set Gillnet S04D	2012	Permit holders may own and fish 2 permits simultaneously. Their allowable gear doubles from 4 nets and 105 fathoms to 210 fathoms in aggregate, with no single net longer than 35 fathoms.	Persons who fish 2 permits are issued 2 permit cards. Each are standard cards, and either can be used to record a landing. Gillnet buoys must be marked with a 'D' and with both permit numbers when the operation fishes 2 permits. Valid only for Situk, Yakutat Bay, and Kaliakh, and only if Situk Chinook escapement exceeds 750 fish.		5 AAC 30.345
