

CFEC Salmon Set Gillnet Permits and DNR Shore Fishery Leases in Prince William Sound, Cook Inlet, Kodiak, Alaska Peninsula, and Bristol Bay 1975-2024

CFEC Report No. 25-4N

July 2025

OEO/ADA Compliance Statement

The Commission is administratively attached to the Alaska Department of Fish and Game.

The Alaska Department of Fish and Game (ADF&G) administers all programs and activities free from discrimination based on race, color, national origin, age, sex, religion, marital status, pregnancy, parenthood, or disability. The department administers all programs and activities in compliance with Title VI of the Civil Rights Act of 1964, Section 504 of the Rehabilitation Act of 1973, Title II of the Americans with Disabilities Act of 1990, the Age Discrimination Act of 1975, and Title IX of the Education Amendments of 1972.

If you believe you have been discriminated against in any program, activity, or facility please write:

- ADF&G ADA Coordinator, P.O. Box 115526, Juneau, AK 99811-5526
- U.S. Fish and Wildlife Service, 4401 N. Fairfax Drive, MS 2042, Arlington, VA 22203
- Office of Equal Opportunity, U.S. Department of the Interior, 1849 C Street NW, MS 5230, Washington DC 20240.

The department's ADA Coordinator can be reached via phone at the following numbers:

- (VOICE) 907-465-6077
- (Statewide Telecommunication Device for the Deaf) 1-800-478-3648
- (Juneau TDD) 907-465-3646

Abstract

Many Commercial Fisheries Entry Commission (CFEC) salmon set gillnet permit holders in Prince William Sound, Cook Inlet, Kodiak, Alaska Peninsula and Bristol Bay hold shore fishery leases with the Alaska Department of Natural Resources (DNR). A DNR shore fishery lease allows CFEC permit holders the ability to exclude others from fishing at specific sites secured through the DNR lease. This report includes summary statistics on the number of leases, gross earnings, and resident types by year from 1975 through 2024.

The map on the title page was created using data from the Alaska Department of Natural Resources Alaska State Geo-Spatial Data Clearinghouse and residency status from CFEC permit data.

Data Used to Generate This Report

Data used to generate the statistics in this report include Commercial Fisheries Entry Commission (CFEC) Census data, CFEC permit data, CFEC gross earnings data, and Alaska Department of Natural Resources (DNR) shore fishery lease data. In addition to these files, a shape file from the DNR was combined with CFEC residency data to create maps showing set gillnet sites that have active DNR shore fishery leases. Percentages are rounded to the nearest tenth of a percentage where displayed. Dollars are rounded to whole values. If you would like more precise figures, then please contact the CFEC Research Unit. Some data will vary from previous research projects insofar as the data has been corrected and updated.

CFEC Census Data

CFEC maintains data on places within Alaska where permit holders reside. Each community is annotated with information on its local or non-local status by permit fishery. The file indicates the places that are currently designated as local to each of the management areas in this report, as well as urban and rural communities according to the 2020 U.S. Census Bureau File.

Alaskan resident types are separated by designations of local/nonlocal and urban/rural statuses. In some tables, resident types may be aggregated to Alaskan resident and nonresident. Resident type categorizes groups of people as follows:

- **Alaska Rural Local (ARL)** – Alaska resident of a rural community which is local to the fishery for which the permit applies.
- **Alaska Urban local (AUN)** – Alaska resident of an urban community which is nonlocal to the fishery for which the permit applies.
- **Alaska Rural Nonlocal (ARN)** – Alaska resident of a rural community which is nonlocal to the fishery for which the permit applies.
- **Alaska Urban Nonlocal (AUN)** – Alaska resident of an urban community which is nonlocal to the fishery for which the permit applies.
- **Nonresident (NR)** – nonresident to Alaska.
- **DOC** – Signifies permits that have been foreclosed upon by the Department of Commerce, Community and Economic Development or by the Commercial Fishing and Agriculture Bank and have yet to be transferred.

CFEC Permit Data

The CFEC permit data contains information on people who hold or have held CFEC permits. It originates from CFEC permit renewal and permit transfer forms. The permit file contains a data field indicating the declared residency of permit holders as well as their addresses. Using permit holder declared addresses, along with the CFEC Census file, each permit holder's resident status is separated into one of the six resident types.

CFEC Gross Earnings Data

The CFEC gross earnings data is based on ADF&G fish tickets and is augmented with CFEC permit holder and other data. The estimated ex-vessel value for commercially landed fish in the CFEC gross earnings largely comes from the Commercial Operators Annual Report and ADF&G fish tickets with some additional information provided by processors. Note that ex-vessel values for 2024 are preliminary as CFEC has not yet received and processed final data from the 2024 Commercial Operators Annual Report. All dollar values are adjusted for inflation using the 2024 Consumer Price Index from the U.S. Bureau of Labor Statistics.

DNR Shore Fishery Lease Data

The DNR Land Administration System contains records used to maintain the DNR Shore Fishery Lease program. This file includes several identifiers such as CFEC permit numbers and personal identifiers. After validation steps, these records were merged with the CFEC permit file and the CFEC gross earnings file.

Table Descriptions

The tables and appendices in this report contain counts of permits, permit holders, and earnings for the five salmon set gillnet fisheries that allow for the use of DNR shore fishery leases. The five salmon set gillnet fisheries are: Prince William Sound (S04E); Cook Inlet (S04H); Kodiak (S04K); Alaska Peninsula (S04M); and Bristol Bay (S04T). Tables span multiple years, and in some cases include aggregates across all years. Permit counts and counts of permit holders will not always be consistent every year because some individuals hold multiple permits in a fishery, and multiple people can hold a single permit in a year. Report tables generally show aggregates of all permit types while the accompanying appendix provides the same data broken out for each permit type. For detailed methods of how these tables are developed, please refer to CFEC report CFEC 25-02N.

Table 1. Number of CFEC Permits and DNR Shore Fishery Leases. Salmon set gillnet fisheries are divided into two classes of counts for the years 1975 to 2024. Columns labeled as DNR are the number of DNR shore fishery leases; columns labeled as CFEC provide the sum of permanent and interim use CFEC permits. Table 1 also includes the percentages of CFEC permits associated with DNR shore fishery leases. All permits from the five salmon set gillnet fisheries are considered in this table regardless of whether they were used to make commercial landings. The counts are for year-end permit and lease holdings.

Table 2. CFEC Permits and DNR Shore Fishery Leases Resident Type. Counts by resident types are shown for people holding CFEC permits and who possess DNR shore fishery leases.

Table 3. Average Annual Gross Earnings for Salmon Set Gillnet Permit Holders by DNR Shore Fishery Lease Status. For all fisheries combined, average annual gross earnings adjusted for inflation are calculated for two groups of CFEC permit holders: those with DNR shore fishery leases and those without. Average gross earnings calculated across all years are included as well. The difference between average gross earnings of permit holders with and without leases, and the lease premium, are described in terms of a dollar amount and a percent difference. To protect confidential data, earnings are masked when there are fewer than four permits with landings. When either the DNR lease holders or non-DNR lease holder columns have fewer than four permits with landings, both columns are masked to preserve confidentiality. DOC and latent (not fished) permits are excluded from this table.

Table 4. Average Annual Gross Earnings for Salmon Set Gillnet Permit Holders by DNR Shore Fishery Lease Status and Residency. For all fisheries combined, average gross earnings (adjusted for inflation) are presented for four separate groups of CFEC permit holders, which represent combinations of Alaska residency with and without DNR shore fishery leases. Counts of the CFEC permit holders are included as well. Columns with fewer than four permits with landings are masked to maintain permit holders' confidentiality. When the data in only one column is below the confidentiality threshold of four, earnings for the second-lowest count are masked as well. The second-lowest count was selected to minimize the amount of data masked. DOC and latent permits are excluded from this table.

Table 5. Average Annual Gross Earnings for Salmon Set Gillnet Permit Holders by DNR Shore Fishery Lease Status, Residency, and Locality. The table presents average gross earnings for each of ten separate groups for all fisheries combined. The ten groups consist of combinations of the five resident types, both with and without DNR shore fishery leases. Average gross earnings across all years adjusted for inflation are included as well. As mentioned, columns with fewer than four permits with landings are masked to maintain permit holders' confidentiality. When only one column is below the confidentiality threshold of four, earnings for the second-lowest count are masked as well. At least two columns are masked to elimi-

nate the possibility of solving for the missing values. DOC and latent permits are excluded from this table.

Table 6. Number of CFEC Permits with Landings by Resident Type and DNR Shore Fishery Lease Status. This is an accompanying table to Table 5. For all fisheries combined, it presents the count of salmon set gillnet permit holders by resident type both with and without a DNR shore fishery lease; DOC held permits are excluded. The counts are restricted to only the permits that recorded landings in a year.

Table 7. Latent Salmon Set Gillnet Permit Holders by DNR Shore Fishery Lease Status. This table reports data for all fisheries combined, showing latent (no landings recorded for the year on the issued permit) salmon set gillnet permits associated either with or without a DNR shore fishery lease. The rate of latency is also shown.

Table 8. Multiple CFEC Permit Holdings Associated with DNR Shore Fishery Leases. The number of individuals possessing multiple (two) CFEC permits for all fisheries combined are reported, as well as the number of those individuals who also hold a DNR shore fishery lease. The rate of association with or without a DNR lease is also shown.

Table 9. Multiple Leases per CFEC Permit. Counts of permits that are associated with one or multiple DNR shore fishery leases for all fisheries combined.

Appendix Descriptions

The appendices in this report contain counts of permits, permit holders, and earnings for the five salmon set gillnet fisheries that allow for the use of DNR shore fishery leases. Appendices provides the same data provided in tables 2-9, broken out for each permit type.

Appendix A. Salmon Set Gillnet Yearend Residency Counts. For each fishery, counts by resident types are shown for people holding CFEC permits who also possess DNR shore fishery leases.

Appendix B. Average Annual Gross Earnings for Salmon Set Gillnet Permit Holders with and Without DNR Shore Fishery Leases. This table is organized by fishery. For each fishery, average annual gross earnings adjusted for inflation are calculated for two groups of CFEC permit holders: those with DNR shore fishery leases and those without. Average gross earnings calculated across all years are included as well. The difference between average gross earnings of permit holders with and without leases, and the lease premium, are described in terms of a dollar amount and a percent difference. To protect confidential data, earnings are masked when there are fewer than four permits with landings. When either the DNR lease holders or non-DNR lease holder columns have fewer than four permits with landings, both columns are masked to preserve confidentiality. DOC and latent (not fished) permits are excluded from this table.

Appendix C. Average Annual Gross Earnings for Salmon Set Gillnet Permit Holders with and Without a DNR Shore Fishery Lease, by Residency. This table is organized by fishery. For each fishery, average gross earnings, adjusted for inflation, are presented for four separate groups of CFEC permit holders, which represent combinations of Alaska residency with and without DNR shore fishery leases. Counts of the CFEC permit holders are included as well. As mentioned, columns with fewer than four permits with landings are masked to maintain permit holders' confidentiality. When the data in only one column is below the confidentiality threshold of four, earnings for the second-lowest count are masked as well. The second-lowest count was selected to minimize the amount of data masked. DOC and latent permits are excluded from this table.

Appendix D. Average Annual Gross Earnings for Salmon Set Gillnet Permit Holders with and Without a DNR Shore Fishery Lease, by Resident Type and Locality. The table is organized by fishery, presenting average gross earnings for each of ten separate groups. The ten groups consist of combinations of the five resident types, both with and without DNR shore fishery leases. Average gross earnings across all years adjusted for inflation are included as well. As mentioned, columns with fewer than four permits with landings are masked to maintain permit holders' confidentiality. When only one column is below the con-

fidentiality threshold of four, earnings for the second-lowest count are masked as well. At least two columns are masked to eliminate the possibility of solving the missing values. DOC and latent permits are excluded from this table.

Appendix E. Number of CFEC Permits with Landings by Resident Type and DNR Shore Fishery Lease Status by Fishery. For each fishery this appendix presents the count of salmon set gillnet permit holders by resident type both with and without a DNR shore fishery lease; DOC held permits are excluded. The counts are restricted to only the permits that recorded landings in a year.

Appendix F. Latent Salmon Set Gillnet Permit Holders with and Without DNR Shore Fishery Leases. This table is organized overall by fishery. It reports latent (no landings recorded for the year on the issued permit) salmon set gillnet permits associated either with or without a DNR shore fishery lease. The rate of latency is also shown.

Appendix G. Multiple CFEC Permit Holdings Associated with DNR Shore Fishery Leases. The number of individuals possessing multiple (two) CFEC permits in a single fishery are reported, as well as the number of those individuals who also hold a DNR shore fishery lease. The rate of association with or without a DNR lease is also shown.

Appendix H. Multiple DNR Shore Fishery Leases per CFEC Permit. Counts of permits that are associated with one or multiple DNR shore fishery leases. Some permits are associated with up to three separate leases in a fishery.

Appendix I. Summary of Gear Restrictions. Provides a summary of gear restrictions by ADFG management area and references relevant regulations.

Appendix J. Statutes and Regulations. Provides a copy of shore fishery lease regulations.

Appendix K. Shore Fishery Lease Site Maps. Visualizes shore lease locations by set net fishery area color coded by residency and locality status.

Introduction

Set gillnet fishing for salmon in Alaska is a historical and culturally significant endeavor that predates Western contact. The principles and knowledge encompassing this fishery have been passed down through generations and continue to make an impact today. For example, the locations in which set gillnetters choose to set their nets play a significant role in determining the success of their enterprise. Set gillnetters choose to place their nets in rivers, tidelands and near the shore in submerged lands. To harvest the salmon a large anchor is used to secure one end of a gillnet, while the other end is fixed near the tide line. As salmon move along the shore, fish are caught by their gills in the net and harvested at low tide or with a boat moving along and picking fish from the net. While the principles of set gillnet fishing have not changed, the methods and tools used have been modernized. Nylon has replaced nettle and cedar netting, and stone anchors have been substituted with those made of steel and concrete. Set gillnet fishing has expanded significantly in size and value since its inception and now supports an industry that is prosecuted by both subsistence and commercial fisherman as an effective, low-cost method of harvesting salmon.

Beginning with statehood in 1959, Alaska was granted 105 million acres or 25% of the total acreage of Alaska for state use¹. Included in the land grant were tidelands extending three miles from mean high tide and lands under navigable waterways. This area constituted Alaska's exclusive economic zone. Management of State lands is administered by the Department of Natural Resources under Article VIII of the State Constitution. As part of its policy, lands are designated for specific uses through a planning process that considers all viable competing uses. DNR staff use planning documents, public comments, and input from multiple government agencies to grant temporary property rights by way of permits or leases for the use of land under its jurisdiction. In 1964, DNR began a program to lease tidelands and submerged lands for the purposes of set gillnet fishing. This program allows DNR shore fishery leaseholders to establish a priority system for set gillnet sites, thereby resolving conflicts derived from competing lease holders for prime salmon sites. Leaseholders of DNR set gillnet sites are allowed to exclude others from fishing on established sites, subject to certain provisions and restrictions.

The privilege to fish commercially in Alaska requires a permit issued by the Alaska Commercial Fisheries Entry Commission (CFEC). CFEC permits are specific to species, gear type, and administrative area. Prior to 1975, all fisheries in Alaska were managed as open access, where any individual could obtain a fishing permit for a nominal annual fee. Alaska's limited entry program began in 1975 when 19 salmon fisheries were limited. Included in this decision were the salmon set gillnet fisheries located in Prince William Sound (S04E permit), Cook Inlet (S04H permit), Kodiak (S04K permit), Alaska Peninsula (S04M permit) and Bristol Bay (S04T permit). During the phase when an individual's permit qualifications were being determined, they were issued an interim-use permit (IUP). More than 2,300 IUPs were issued to individuals in the five set gillnet fisheries. Permits were issued to individuals who demonstrated both a history of fishing and an economic dependence on the fishery. Eventually, individuals who met the minimum qualifications were issued permanent CFEC limited entry permits.

DNR shore fishery leases were established for Prince William Sound, Cook Inlet, Alaska Peninsula and Bristol Bay starting in 1975. The first shore fishery leases in Kodiak were granted in 1979. Some DNR leases were issued to IUP holders contingent upon final adjudication of their CFEC permit. If an individual successfully qualified for a permanent CFEC limited entry permit, they could retain their shore fishery lease; if they failed to qualify, their lease was cancelled.

Ultimately, 2,121 permanent limited entry permits were issued in the five fisheries, with the majority (92.5%) being transferable permits. A transferable permit allows an individual the ability to choose who the permit can be conveyed to through market transactions, gifts, or inheritance. Nontransferable permits are cancelled either upon the death of the permit holder or when the annual fee is no longer paid. If the

¹ See 1959 Alaska Statehood Act Pub. L. No. 85-508, 72 Stat. 339 (enacted July 7, 1958)

holder of a permanent permit becomes temporarily unable to fish, permits may be transferred and leased as an “emergency transfer” (ET), thereby granting temporary fishing privileges from the permit holder to their designee. At the end of the year, the fishing privilege of the ET holder reverts to the permanent permit holder. There is no restriction on residency or nationality with regards to holding a CFEC permit. Within a fishery, there is no distinction among permits — each permit grants the permit holder equal access to fishing privileges. Department of Fish and Game regulations determine the methods and means of fishing, for example, the amount of gillnet gear that may be deployed in each fishery. These regulations are determined by the Board of Fish.

These regulations, designed to protect the economic well-being of the state as well as the health of the fish stock, sometime clash with permit holders’ beliefs and expectations. Fishing in Alaska is a historical industry with strong cultural connections, especially among rural communities where fishing with immediate and extended family members is especially common. These family groups may span multiple generations and often see a permit exchanging hands within a family depending upon who is available to fish that year. For Prince William Sound, Cook Inlet, Kodiak, Alaska Peninsula, and Bristol Bay, 46% of the salmon set gillnet permit transfers were to relatives, most of which were transferred as gifts (Figure 1).² Many of the commercial set gillnet fishermen will also use the same gear for subsistence fishing activities. Hence, the Board of Fish meets regularly to enact policies and regulations that aim to meet the changing needs of permit holders as well as the economic wellbeing of the fishery.

Figure 1. Source of CFEC Permits for Transfers in Fisheries with DNR Shore Fishery Leases, 1975-2024

² See *Changes in the Distribution of Alaska’s Commercial Fisheries Entry Permits, 1975-2024*; CFEC Report 25-02N.

In 2002, House Bill 286 amended Alaska Statute 16.43.140 (c), to allow individuals to hold two salmon limited entry permits in the same fishery. The permits may be either limited entry or interim-use permits. The law specifies that individuals who hold two permits are not allowed to fish the second permit. This prohibition, however, was made ineffective under specific circumstances by House Bill 251 in 2006, which amended Alaska Statute 16.05.251 (i), giving the Alaska Board of Fisheries the authority to grant fishing privileges for the second permit held by an individual. Stacked permit operations, the fishing of two permits by one individual, have been granted by the Board for set gillnet fishing in the Kodiak, Bristol Bay, Cook Inlet, and Yakutat fisheries. Kodiak permit stacking regulations took effect in 2008 and remained until December of 2010, when they were repealed by a sunset clause. Bristol Bay permit stacking started in 2010 and sunset after December 31, 2012. Cook Inlet regulations went into effect in 2011 with no sunset provisions. The regulations allowing Yakutat permit stacking began in 2012, but the regulations allow stacking to occur only under specific circumstances and were set to sunset at the end of 2017; at the 2018 Board of Fisheries meeting the sunset provision was eliminated.

In contrast, permit holders may choose to invest their resources elsewhere, such as in a shore fishery lease. There are many reasons why an individual might choose such a lease, for example, moving from place to place can be costly, both in terms of the opportunity cost of not fishing, but also in other costs such as fuel and among other expenses incurred during the move. Logistically, running a fishing operation becomes more economically viable with the increased stability associated with fishing an established site. If individuals can invest further in their venture by constructing living quarters and/or storage facilities, such measures would allow them to make more efficient use of the time fishing rather than traveling, reducing costs, and increasing profitability.

While there are benefits to acquiring a shore fishery lease, there are also some downsides. For example, specific movements of fish are inconsistent, hence there may be advantages to not being fettered to a single site. While there are restrictions that specify how many times DNR leaseholders are required to fish their leased sites during any given season,³ some leases may have multiple tracts which may span miles of beach. Furthermore, some families or partnerships may have multiple permits, thereby expanding their ability to secure additional leases.

Requirements for a DNR Shore Fishery Lease

Shore fishery leases are granted at the discretion of the Shore Fishery leasing program within the DNR Division of Mining, Land and Water, solely for state lands managed by DNR. Regulations and statutes determine the requirements for DNR shore fishery leases. Pertinent DNR regulations and statutes can be found in Appendix J of this document.

While a permit holder does not need a DNR shore fishery lease to fish, a shore lease provides a permit holder with the first right to fish anywhere within the area of their lease, subject to Alaska Department of Fish and Game (ADF&G) regulations. Other permit holders retain the opportunity to fish within the area of the lease, but the lease holder has the right to supplant them, forcing them to move. DNR leaseholders are required to personally fish each leased tract for at least four legal fishing periods during the commercial fishing season. They may refrain from fishing for one year, but not two consecutive years.

DNR shore fishery leases are only granted to U.S. citizens who are at least 10 years old and hold a valid CFEC set gillnet permit. ADF&G regulations specify that DNR leases may be held in the ADF&G management areas of Alaska Peninsula, Bristol Bay, Kodiak, Cook Inlet, and part of Prince William Sound.⁴ The number of leases held by an individual is dependent upon governing regulations established for the area. ADF&G regulations also determine which portions of the area are available to lease. DNR staff con-

³ 11 AAC 64.180.

⁴ There are other management areas in Alaska where salmon set gillnets are used but where DNR shore fishery leases are not used.

sider prior use of a site when multiple applicants apply for a lease. Leases in good standing may be transferred from one leaseholder to another at the discretion of DNR.

Currently, the cost and fees related to registering a lease are set at \$240. Once registered, each site can be leased for periods up to ten years with a cost of \$300 per year. These costs are associated with preliminary work necessary to process the lease, including staking the site, obtaining a survey and completing shore fishery diagrams, and applications. The window to apply for a shore fishery lease is set between June 1 and October 15.

DNR set gillnet leases are for tidelands and submerged lands only; the shore fishery leases themselves do not allow for the construction of cabins or outbuildings on adjacent uplands. However, the uplands are privately owned and may be associated with titles obtained through Alaska Native Allotments, historic homesteads, or other sources. In other cases, the uplands remain as public lands and can be developed by set gillnet fishermen under separate leases obtained from the government entity with management authority over the uplands.

Discussion

While the first DNR shore fishery leases date back to the 1960s, this report only considers the period after limited entry permits were first issued in 1975. At that time, there were just over 200 DNR leases issued among the four fisheries mentioned earlier. Figure 3. shows the combined average gross earnings, adjusted for inflation, for these four fisheries as well as for Kodiak. As the value of catches increased, the number of DNR shore fishery leases also increased. By the late 1980s, when salmon prices peaked, the number of CFEC permits with DNR shore fishery leases approached 1,000. Shortly after this peak, salmon earnings began to fall. The number of CFEC permits with DNR shore fishery leases declined 31.4% from 2000 to 2024, ranging between 656 and 979 during that period.

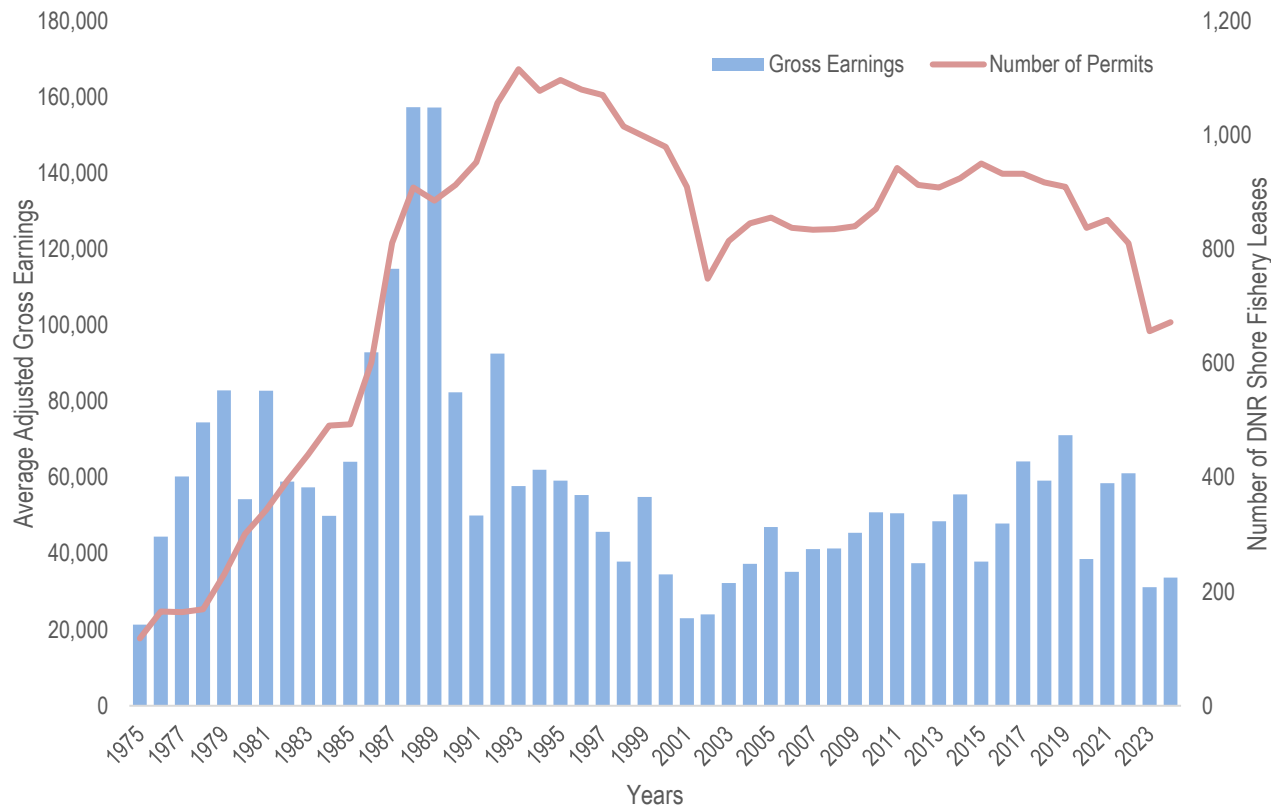

Figure 2. Average Adjusted Gross Earnings and Total Number of DNR Shore Fishery Leases

It is important to note that these values may be influenced by a variety of factors. For example, some families or small groups of individuals pool their harvests and record their landings on only one permit. While such activity is not permissible under state law,⁵ it would have the effect of overestimating the number of latent (unfished) permits in a fishery. Another effect of group recordings on fish tickets would be to increase the mean earnings among ‘fished’ permits as the actual number of permits fished would be unaccounted for in these situations.

Although the data suggests there are economic benefits to permit holders with DNR shore fishery leases (discussed below), there are additional factors that can affect average gross earnings for permit holders as well. These factors include total harvests, ex-vessel prices, processing capacity, fishery allocations and regulations, and disparate mixes of salmon species.

Harvests in set gillnet fisheries are largely based on the productivity (absolute abundance of salmon) of the area, which can vary widely. For example, Bristol Bay is extremely productive, however, there are a large number of permit holders competing among one another. Despite this higher degree of competition, the area experiences large enough runs of salmon to allow permit holders to catch high volumes of fish during the short Bristol Bay season. Cook Inlet is less productive than Bristol Bay and is characterized by a high concentration of permit holders who fish in small, defined areas. This is especially notable along the eastern shore of Cook Inlet, where many fishermen have established leases near the productive Kenai and Kasilof rivers. Other places in Cook Inlet have fewer leases, which is likely related to site accessibility, the relative abundance of salmon, and subsequently less fishing effort.⁶ In Prince William Sound, ADF&G biologists indicated that a recent regulatory re-allocation of fish towards set gillnetters has allowed permit holders to harvest more fish than was historically feasible.

Figure 3. Percent of CFEC Permit Holders with DNR Leases by Area, 2024

⁵ AS 16.05.690 (b); 5 AAC 39.130 (c) (2).

⁶ Detailed images of the location of DNR shore fishery lease sites can be viewed at: <https://dnr.alaska.gov/landrecords/>. General maps can be found in Appendix C of this publication.

External market and ecological factors play an important role in determining the earning potential of permit holders, whether they hold DNR leases or not. For example, in March of 1989 the oil tanker Exxon Valdez struck Bligh Reef in Prince William Sound. Salmon harvesting was suspended in Prince William Sound that year due to the ensuing oil spill. Salmon fisheries in Cook Inlet, Kodiak and the Alaska Peninsula were also affected by the same oil spill.⁷ In the early 1990s, farmed salmon began to impact international fish markets. As a result, the price of salmon declined and reduced ex-vessel values and the associated profitability of the fisheries. In addition to economic and ecological factors, social factors play a significant role in influencing the earning potential of permit holders among the five fisheries. As indicated in Table 2 and Figure 3, locals generally have a lower rate of DNR shore fishery leases than non-locals. Anecdotally, fishermen have indicated that locals will often return to places their families have historically fished for decades. Local agreements and understandings exist about who fishes which locations. It has been reported that when non-locals, who either do not understand or accept local arrangements, move into an area, and begin securing DNR leases, locals will begin to secure DNR lease sites as well. As locals secure sites, they may have to give up some of their traditionally fished sites due to regulations which restrict the number of DNR leased sites per permit.⁸ This may explain what occurred in 1987, when the total number of DNR leases in Bristol Bay rose by 54% in a single year.

Rates of urban and rural holders vary in each of the fisheries, which can be seen in Tables 2, 4, and 6 (and Appendices B, C and E). In Cook Inlet, there are a high proportion of urban locals, many of whom have DNR leases. Urban communities local to Cook Inlet include Anchorage, Eagle River, Soldotna, Kenai, and Chugiak, among others. Kodiak also has a relatively high number of local urban commercial fishermen, while Prince William Sound, Alaska Peninsula and Bristol Bay have no urban centers at all. The overall distribution of permit and lease holdings by resident type has changed over time and mirrored the changes in Alaska's demographics. For example, in Prince William Sound, the proportion of permits held by rural locals has shifted towards urban nonlocals and occurred primarily due to permit transfers.⁹

The number of DNR shore fishery leases allowed per permit is determined by the Alaska Board of Fisheries.¹⁰ Table 9 and Appendix H provide counts of multiple lease holdings per CFEC permit at year-end. Over all areas, from 1975 to 2024, the rate of multiple leases per permit has declined. Multiple leases per permit peaked in 1977 at 7.3% and declined to a low of 2.1% in 2014 and 2015. Among the different fishing areas Alaska Peninsula had the highest rate in 2024, with 18.2% of DNR lease holders possessing multiple leases at year-end. The area with the lowest rate of DNR lease holders possessing multiple leases in 2024 was in Kodiak, where 1.4% of permit holders held DNR leases.

In some fisheries, permit holders who stack permits (two permits fished by one permit holder) can record their landings on just one or both of their permits. In situations where an individual only records landings on just one permit, the second permit would be considered latent even though it was in fact actively used. With the ability to stack permits, the percentage of individuals with two permits increased substantially in Kodiak, Bristol Bay, and Cook Inlet (see Appendix G). At the end of 2008, the first-year permit stacking was allowed in Kodiak, 15.3% of set gillnet permit holders held two permits in that fishery. This rose to 25.3% by the end of 2010 but dropped to 2.1% after the ability to stack permits ended in 2011. In Bristol Bay, the percentage of multiple permit holders was well below 1% of permit holders until 2010, when permit stacking regulations were implemented by the Board of Fisheries. In the first year of permit stacking regulations, 6% of the permit holders held two permits, and the count increased to 11.9% by 2012. After permit stacking regulations sunset, the number of individuals with multiple permit holdings at year-end dropped below 1% again where it has remained. In Cook Inlet there were fewer than 1% permit holders with multiple permits until 2011, the first year of permit stacking when the year-end count rose to 6.4% and rose each year; by the end of 2024, 24.8% of the permit holders held two permits.

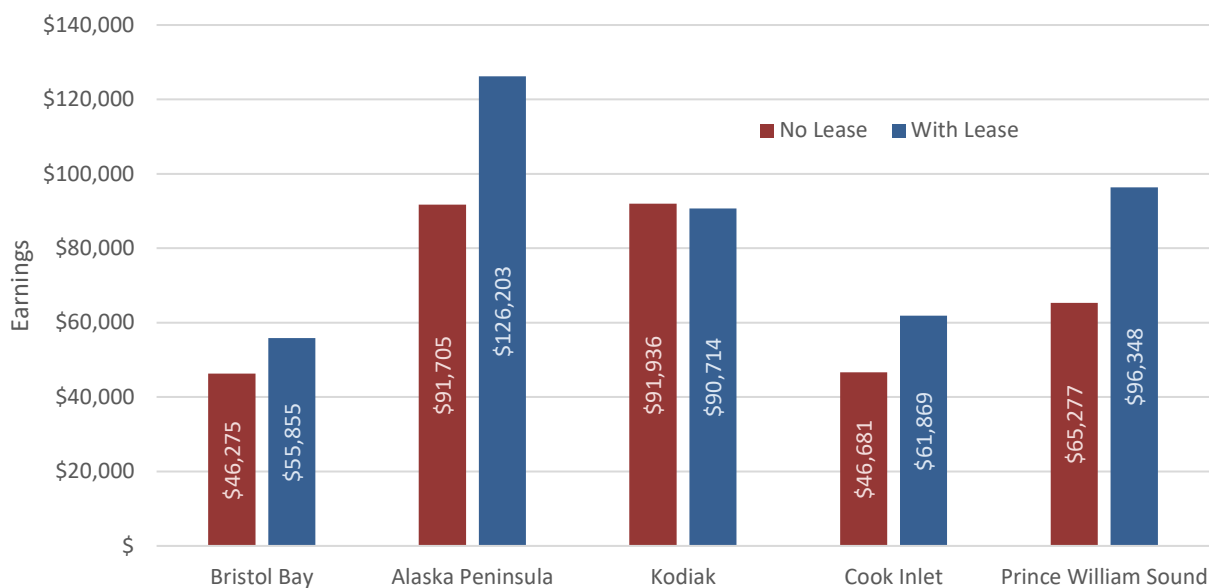

Figure 4. Average Real Earnings by Fishery, 1975-2024

On average, CFEC permit holders with DNR shore fishery leases had substantially higher gross earnings than their counterparts without leases, except in the Kodiak area (Appendices B, C, D and Figure 4). For all fisheries, the average difference, or “lease premium” over the 1975 to 2024 period is 24.7%. DNR lease holders had higher average earnings than non-lease holders only in one third of those years. Prince William Sound experienced the greatest average premium rate at 47.6% between 1975 and 2024. Alaska Peninsula experienced the highest lease premium in terms of real dollars where real ex-vessel earnings for leaseholders averaged \$34,498.

As shown in Appendix D, among the Kodiak permit holders, rural locals and nonresidents appear to fare better without a DNR lease. On the other hand, non-locals, both rural and urban, posted higher earnings with a DNR lease. With the exception of Kodiak, DNR leaseholders earned substantially higher earnings than non-lease holders.

As documented in Appendix I, each fishery has different gear restrictions, and there may be different gear restrictions in districts and sub-districts within a fishery, as established by Board of Fisheries regulations. Each level of gear restriction provides associated levels of fishing capacity. Alaska Peninsula set gillnet permit holders have the highest average ex-vessel earnings; likewise, they can deploy the most aggregate net. Bristol Bay has the smallest amount of allowable gear, and despite the high number of permit holders, permit holders bring in a substantial amount of revenue due to the productivity of the region.

Conclusion

Generally, the ability to secure a productive site with a DNR shore fishery lease for commercial set gillnet fishing is advantageous but other factors influence a permit holder’s harvests, including external market and ecological factors, gear restrictions, the permit holder’s skill level and effort, fishery allocations, and the relative abundance of available fish stock.

This report does show that for the salmon set gillnet fisheries in total, the overall average gross earnings of DNR leaseholders is considerably more than those of non-DNR leaseholders. Averaged over all fisheries and years, the annual average benefit of a DNR shore fishery lease was \$13,100, which represents a 24.7% premium over non-lease-holding counterparts (Table 3 and Appendix B). This benefit is common

throughout all years and all fisheries except Kodiak; therefore, it is likely attributable to the DNR shore fishery lease itself, and not to other external factors.

Although this report explores a very limited level of the geography of the DNR shore fishery lease site, it can be surmised that certain locations are intrinsically more productive for fishing. That such locales have been selected for DNR lease sites likely explains much of the premium.

- The figures in this table reflect only the CFEC permits that recorded fishery landings.
- Permits held at year-end by the Department of Commerce, Community and Economic Development or the Commercial Fishing and Agriculture Bank are excluded from this table.
- Earnings are adjusted for inflation using the US Bureau of Labor Statistics base 2025 consumer price index.
- 2024 earnings are preliminary.

- Figures in this table reflect only the CFEC permits that recorded fishery landings.
- Permits held at year-end by the Department of Commerce, Community and Economic Development or Commercial Fishing and Agriculture Bank are excluded from this table.
- Earnings are adjusted for inflation using the US Bureau of Labor Statistics base 2024 consumer price index. 2024 earnings are preliminary.

- Permits held at year-end by the Department of Commerce, Community and Economic Development or the Commercial Fishing and Agriculture Bank are excluded from this table.
- Counts in this table are for permit holders, not permits.
- Counts are as of December 31st for each year.
- Some counts may reflect an administrative lag in assigning the appropriate DNR lease to a CFEC permit number.

Latent Salmon Set Gillnet Permits and DNR Lease Association

Note: Permit stacking regulations may allow additional gear. The numbers presented here are for a single CFEC issued permit card.

Appendix J. Statutes and Regulations

Appendix J. Shore Fishery Lease Statutes and Regulations

Alaska Statute 38.05.082. Leases for shore fisheries development.

(a) The director, with the approval of the commissioner, may lease tide and submerged land for fisheries development. Fisheries development includes the utilization of shore gill nets or set nets for the taking of fish. Every lease issued under this section shall reserve to the public a right-of-way for access to navigable waters and other tide and submerged land.

(b) The director may classify land as subject to leases for fisheries development and publicly invite applications for lease of the selected areas. Each application shall be accompanied by an affidavit to the effect that the applicant presently intends to personally utilize the leased area for fishing purposes the following season. If two or more applications are received for the same shore area, the director shall award the lease to the most qualified applicant. In determining the qualifications of applicants, the director shall consider the length of time during which the applicant has been engaged in set netting, the proximity of the past fishing sites of the applicant to the land to be leased, the present ability of the applicant to utilize the location to its maximum potential, and other factors relevant to the equitable assignment of the disputed area. If the director cannot determine a preference between conflicting applicants for the same lease site on the basis of qualifications, the director shall select between the applicants by lot. An aggrieved applicant may appeal to the commissioner within 30 days for a review of the director's determination.

(c) A lease for set net fishing may be issued for any period not exceeding 10 years. If the commissioner determines that the land is not being utilized for the purpose for which the lease is issued, the lease may be declared void. The director shall establish a reasonable rental for the lease, equal to the administrative costs involved in processing the leasehold applications.

(d) Subleasing and renewals of leases are governed by AS 38.05.095 and 38.05.102.

(e) The lease of submerged land conveys no interest in the water above the land or in the fish in the water.

(f) The shore fisheries development lease program account is established in the state treasury. The rents, fees, and other proceeds received by the department in connection with the issuance of shore fisheries development leases under this section shall be deposited into the account. The legislature may appropriate money deposited into the account for the operation of the shore fisheries development lease program by the department or for any other public purpose.

DNR Regulations regarding Shore Fishery Leases

11 AAC 64.010. SHORT TITLE.

This chapter applies to leasing tide and submerged lands of the state for the purpose of shore fisheries development. Authority: AS 38.05.020, AS 38.05.082

11 AAC 64.020. PARTICIPATION IN SHORE FISHERY.

No person is required to lease tide and submerged lands to participate in a shore fishery. However,

(1) upon written or verbal notification by a lessee holding a valid shore fishery lease issued under this chapter, a set gillnetter shall remove any net or nets from the site or tract of the lessee if the lessee personally begins to commercially fish the lease site; and

(2) no set gillnet may be set at less than the minimum distance established by Department of Fish and Game commercial finfish regulations set out in 5 AAC 03 - 5 AAC 39, from a net currently in use by a lessee holding a valid shore fishery lease issued under this chapter.

11 AAC 64.040. ADVISORY COMMITTEES.

The director will, in his or her discretion, accept recommendations from recognized associations or groups whose members are engaged in the practice of set gillnet fishing, or establish an advisory group to recommend resolutions involving application conflicts or protests. Authority: AS 38.05.020, AS 38.05.082

11 AAC 64.050. TIDE AND SUBMERGED LAND AVAILABLE FOR LEASING.

The director will, in his or her discretion, classify for leasing, under 11 AAC 55, all unappropriated tide and submerged land where set gillnet fishing is allowed by the Alaska Department of Fish and Game. After the director designates an area as open to leasing, the director will publicly invite lease applications for all or specific portions of the open areas. Authority: AS 38.05.020, AS 38.05.082

11 AAC 64.060. PERMANENT IMPROVEMENTS DISALLOWED.

No lessee may erect a permanent installation, building, structure, fixture, or facility upon a lease tract or site. Authority: AS 38.05.020, AS 38.05.082

11 AAC 64.061. STAKING AND FILING PERIOD.

Appendix J. Statutes and Regulations

An applicant may stake a set gillnet site or tract, and may file an application for a shore fishery lease, annually from May 1 to September 1. The director will extend, close, suspend, or otherwise modify the period for staking and filing an application if the director determines in writing that it is in the best interests of the state to do so. Authority: AS 38.05.020, AS 38.05.082.

(Due to Director's policy change the staking period is between May 2 and October 15 and the application period is between June 1 and October 15.)

11 AAC 64.070. SIZE OF LEASE TRACTS.

(a) If an applicant has more than one set gillnet site, and the area between individual sites is not claimed by another person for set gillnet purposes, the applicant may include all such set gillnet sites in one lease tract if

- (1) the maximum number of set gillnet sites included in one tract does not exceed that number allowed by 11 AAC 64.080;
- (2) the maximum distance between set gillnet sites does not exceed twice the minimum distance, minus one foot, allowed between nets by Department of Fish and Game Commercial Finfish Regulations, set out in 5 AAC 03 - 5 AAC 39, for the local area, unless otherwise determined by the director;
- (3) the maximum distance of the tract side line from the nearest set gillnet site within the tract does not exceed one-half the distance allowed between set gillnet sites by Department of Fish and Game Commercial Finfish regulations set out in 5 AAC 03 - 5 AAC 39; and
- (4) the maximum distance between the seaward end line of a tract and the landward end line of an offshore tract is not greater than one-half the distance from the seaward end of the nearest set gillnet as determined by Department of Fish and Game Commercial Finfish regulations set out in 5 AAC 03 - 5 AAC 39.

(b) In establishing the size and proper location of a tract, the director will, in his or her discretion, require the applicant to survey the tract. Authority: AS 38.05.020, AS 38.05.082

11 AAC 64.080. MAXIMUM NUMBER OF NET SITES AND LEASE TRACTS.

Except as provided otherwise in this section, the maximum number of sites allowed one applicant is that number established under Department of Fish and Game Commercial Finfish Regulations set out in 5 AAC 03 - 5 AAC 39, except for Cook Inlet, where the maximum is three sites. The sites may be contained in one, two, or three tracts. In an area where, under established custom, the applicant has or currently uses the same set gillnet and other gear for high and low water sites, the director will, in his or her discretion, lease additional set gillnet sites, if the applicant submits proper justification. Authority: AS 38.05.020, AS 38.05.082

11 AAC 64.090. STAKING OF SITES AND TRACTS.

Before submitting an application under 11 AAC 64.260, an applicant must stake each tract by placing the stake at the net anchor point. The location stake must be at least three feet above ground level and must support a sign showing the applicant's name, mailing address, limited entry permit number, and date of staking. For a low water tract, the location stake may be co-located with the high water stake. The sign on the low water stake must contain the information contained on the high water sign and must be labeled across the top as a low water site with the distance and bearing to the shoreward end of the net or net anchor point noted on the sign. Authority: AS 38.05.020, AS 38.05.082

11 AAC 64.180. REASONABLE UTILIZATION.

(a) Except as otherwise provided by (b) of this section, reasonable utilization of a site or tract means personally fishing each site of each leased tract for at least four legal fishing periods during the commercial fishing season.

(b) The lessee may refrain from fishing upon any one or all leased tracts for one year, but not for two consecutive years. Authority: AS 38.05.020, AS 38.05.082

11 AAC 64.200. CLOSED AREA.

The director will not issue a lease in an area closed to commercial fishing by the Department of Fish and Game. The closure of an area by the Department of Fish and Game will not result in the termination of a lease for failure of reasonable utilization. The closure of an area will not extend the term of an issued lease. The lessee may, however, request an extension of a current valid lease as provided for under 11 AAC 64.391, if the area is reopened to commercial fishing. Authority: AS 38.05.020, AS 38.05.082

11 AAC 64.220. HARDSHIP CLAUSE; WAIVER OF RENTAL.

The director will, in his or her discretion, waive the annual rental in the case of substantial injury, illness, call to military service, or legal closure of the fishery. An application for a waiver must be postmarked at least 30 days before the date the annual rental is due. Authority: AS 38.05.020, AS 38.05.082

11 AAC 64.230. QUALIFICATIONS OF APPLICANT.

Appendix J. Statutes and Regulations

An applicant for a lease is qualified if the applicant

- (1) is a citizen of the United States and is at least 18 years of age; and
 - (2) holds a valid limited entry permit or interim-use salmon setnet permit for the area within which a lease is requested.
- Authority: AS 38.05.020, AS 38.05.082

11 AAC 64.240. TRUSTEESHIP FOR MINORS.

The director will, in his or her discretion, issue a lease in trust for the benefit of a minor who is 10 years of age or older if the minor is otherwise qualified to lease under 11 AAC 64.230. The trust automatically terminates upon the date of the minor's 18th birthday. Authority: AS 38.05.020, AS 38.05.082

11 AAC 64.250. APPOINTMENT OF TRUSTEE.

A person who is qualified under the laws of Alaska to act as a trustee may apply for approval to act as a trustee for a shore fishery lease on behalf of a minor. The director will issue the lease in the name of an approved trustee, subject to other provisions of this chapter. The trustee does not acquire any rights in the leased area by virtue of this trusteeship. Authority: AS 38.05.020, AS 38.05.082

Appendix J. Statutes and Regulations

11 AAC 64.260. APPLICATION.

(a) An applicant shall file a shore fishery lease application with the department within 30 days after staking a shore fishery lease site. The filing date is determined by the postmark date of the application.

(b) A nonrefundable filing fee, as prescribed by 11 AAC 05.010, must accompany each application.

(c) A shore fishery lease application must contain the following information:

- (1) the applicant's name, mailing address, and birthdate;
 - (2) if the applicant is a minor, the name and mailing address of the trustee;
 - (3) the applicant's limited entry permit or interim-use salmon setnet permit number;
 - (4) the date the site was staked;
 - (5) the number of seasons the applicant has commercially fished the site;
 - (6) the number of years the applicant has participated in a shore fishery;
 - (7) a description of the lease tract sufficient to locate the tract and sites on the ground and including the township, range, and protracted section in which the site is located, as well as the site's distance and bearing from the shoreward end of the net or net anchor point to a known fixed point, such as a permanent building, monument, or fixed natural feature;
 - (8) a U.S.G.S. map of not more than 1:63,360 scale showing the location of the site;
 - (9) a statement that the applicant intends to personally fish the site;
 - (10) a statement that the applicant has complied with the staking requirements of 11 AAC 64.090 and that the applicant is within legal net distances as established by Department of Fish and Game Commercial Finfish Regulations set out in 5 AAC 04 - 5 AAC 39; and
 - (11) the names and addresses of adjacent right, left, shoreward and seaward setnet neighbors; if any.
- (d) Upon acceptance of a shore fishery lease application, the division will send the applicant further instructions for completing a shore fishery diagram.

(e) Within 90 days after receipt of the instructions, the applicant shall provide the division with a completed and signed shore fishery diagram.

(f) If an applicant is unable to comply with any of the instructions for completing the shore fishery diagram, the applicant shall submit a notarized affidavit attesting to the reason or the cause for failing to comply. The affidavit will be made part of the lease document.

(g) Failure to provide the information required by this section constitutes grounds for denying the shore fishery lease application. Authority: AS 38.05.020 AS 38.05.082

11 AAC 64.280. PROOF OF QUALIFICATION.

In addition to the information submitted with the application, the director may request such additional proof of qualification as is deemed necessary to help effect an equitable assignment of the disputed area. Failure to comply with any request for proof of qualification or additional information shall be reason for the disqualification of an applicant. Authority: AS 38.05.020, AS 38.05.082

11 AAC 64.301. TERM OF LEASE.

Upon the successful completion of all requirements of this chapter, and the resolution of any protest filed, the director will issue a lease for a period not to exceed 10 years. In determining the term of a lease, the director will consider the stability of the beach within the area, as well as any other applicable considerations or factors. Authority: AS 38.05.020, AS 38.05.082

11 AAC 64.330. RIGHTS PRIOR TO LEASING.

The filing of an application for a lease shall not in any way vest any right in the applicant to a lease. Authority: AS 38.05.020, AS 38.05.082

Appendix J. Statutes and Regulations

11 AAC 64.370. ANNUAL RENTAL.

Annual rental shall be an approved proportionate share of the cost of administration of the total of the shore fishery development leasing costs, as determined by the director and concurred in by the commissioner. Annual rental shall be paid in advance of April 15, unless otherwise approved by the director, and shall be prorated from the 15th day of the month in which issued to the 15th day of April of the following year. All leases shall stipulate that the annual rental shall be subject to adjustment by the director at five year intervals and such adjustment is to be based on the administration costs involved, and shall in no way reflect the value of the leasehold. Authority: AS 38.05.020, AS 38.05.082

11 AAC 64.380. RECEIPT OF ANNUAL RENTAL.

The first year's rental shall be receipted on the lease; thereafter the director shall immediately issue receipts for all rents paid. Authority: AS 38.05.020, AS 38.05.082

11 AAC 64.391. EXTENSION OF LEASE.

90 days before the expiration of a valid lease, the lessee may request an extension of the lease. The director will, in his or her discretion, extend the lease for a period of up to 10 years if no changes in site or tract location have occurred, the beach has remained stable, the lease is in good standing with the department, the lessee remains qualified under 11 AAC 64. 230. and no protest of the extension is received. A nonrefundable filing fee, as established by the department's approved fee schedule, must accompany a request for an extension. Authority: AS 38.05.020, AS 38.05.082

11 AAC 64.410. LEASE TERMINATION.

(a) The department will, in its discretion. terminate a lease if

- (1) the lessee fails to pay the annual rental;
- (2) the director determines that the site is not being used for the purpose for which the lease was issued;
- (3) the lessee misrepresented facts or made an error with respect to a material fact in the shore fishery lease application;
- (4) the lessee fails to properly locate his tract and sites or fails to properly situate in the tract when commercially fishing;
- (5) the lessee fails to maintain a valid limited entry permit or interim-use salmon setnet permit: or
- (6) utilization of the tract or sites is not in accordance with 11 AAC 64.180;

(b) The director will notify a lessee in writing of the department's intention to terminate a lease under this section. The director will send the notice of termination to the last address provided to the department by the lessee. The notice is considered delivered when deposited in the mail.

(c) A lease termination is effective 30 days after the date of the notice, unless stayed by the commissioner in conjunction with an appeal filed by the lessee under 11 AAC 64.460. Authority: AS 38.05.020, AS 38.05.082

11 AAC 64.430. ASSIGNMENT.

A lessee may assign a lease to another if

- (1) the lease rental payments are current;
- (2) the assignee is qualified under 11 AAC 64.230 or 11 AAC 64.240 and holds a valid limited entry permit or interim-use salmon setnet permit for the fishery;
- (3) the assignee does not currently lease the maximum allowed sites for the fishery;
- (4) approval of an assignment will not result in the assignee holding leases for more than the maximum allowable number of sites;
- (5) the lessee and assignee complete the required assignment of lease form; and
- (6) the director approves the assignment. Authority: AS 38.05.020, AS 38.05.082

Appendix J. Statutes and Regulations

11 AAC 64.440. SUCCESSION TO APPLICANT'S INTEREST.

A person who is legally assigned all rights to another person's lease application succeeds to all rights and privileges of the original lease applicant under this chapter if the assignee submits

- (1) a notarized statement setting out the name of the lease applicant, the lease applicant's address of record, the location of the site or sites, the date of lease application acquisition, and the name and address of each of the adjacent site holders, if any; and
- (2) a notarized statement by the lease applicant stating the length of time the lease applicant has personally operated the site or sites, and stating that the lease applicant has relinquished to the assignee all rights to and interest in the site or sites. Authority: AS 38.05.020, AS 38.05.08

11 AAC 64.450. PROTEST.

(a) A person may protest an application for or the location of a shore fishery lease site by mailing a statement of protest to the applicant and to the director. The protest may be filed from the time a site has been staked until the last date for filing a protest, as determined and published in writing by the department. The postmark date of the statement of protest constitutes the date of protest. If a protest is filed, the director will not issue a lease until resolution of the protest.

(b) A statement of protest must be in writing, must be signed by the protester, and must contain

- (1) the protester's name and mailing address;
- (2) the protester's limited entry permit number or interim-use salmon setnet permit, if any;
- (3) the applicant's name and address as shown on the staking sign;
- (4) a brief statement of reasons why the protester believes that the lease site location is invalid or that the protester is more qualified to fish at the lease site; affidavits may be included to support the reasons set out in the statement; and
- (5) a brief statement of the relief requested, which may be either denial of the lease site location, or a determination that the protester is more qualified to fish from the lease site and more entitled to lease the site than is the applicant.

(c) The applicant shall prepare a brief written response rebutting the protester's statement, the applicant shall mail the response to the protester and to the director within 30 days after receiving the statement of protest. Affidavits may be included to support the facts set out in the response.

(d) The director will base a decision resolving a protest on the criteria contained in AS 38.05.082 and on the protest, response, supporting affidavits, and hearing, if one is conducted. The decision constitutes the final departmental action unless it is appealed. Authority: AS 38.05.020, AS 38.05.082

11 AAC 64.460. APPEAL.

An eligible person affected by a decision issued under this chapter may appeal that decision in accordance with 11 AAC 02. Authority: AS 38.05.020, AS 38.05.082.

11 AAC 64.490. DISPUTES OF BOUNDARY LINE LOCATION.

In a dispute concerning one or more leased tract locations, the protesting party may request that the director establish or reestablish, by survey, the boundary lines of the tract or tracts in question. The director will, in his or her discretion, require that a survey be performed to determine the location of the boundary lines in dispute. The party or parties at fault shall pay the cost of the entire survey. The department will, in its discretion, terminate the lease of the party or parties at fault if they do not pay the survey costs. Authority: AS 38.05.020, AS 38.05.082

Appendix J. Statutes and Regulations

11 AAC 64.565. TRANSITION.

Pending applications submitted under this chapter before March 30, 1985 will be adjudicated under the provisions of this chapter which are in effect after that date. The applicant will be notified of any additional requirements. Authority: AS 38.05.020, AS 38.05.082

11 AAC 64.570. DEFINITIONS.

In these regulations, the following terms shall have the meaning indicated unless the context clearly requires a different meaning:

- (1) repealed 3/30/85;
- (2) "adjacent" means touching or lying in close proximity, as opposed to "contiguous" which requires a common boundary;
- (3) "boundary lines" means lines having a course and distance that enclose one tract;
- (4) repealed 3/30/85;
- (5) repealed 3/30/85;
- (6) "commercial fishing" means the taking, fishing for, or possession of fish, with the intent of disposing of them for profit, or by sale, barter, or in commercial channels;
- (7) "commercial fishing season" means the locally recognized commercial fishing season opened by field announcement by the Alaska Board of Fish and Game;
- (8) "commissioner" means the Commissioner of the Department of Natural Resources, State of Alaska;
- (9) "department" means the Department of Natural Resources, State of Alaska;
- (10) "director" means the Director of the Division of Lands;
- (11) "division" means the Division of Lands within the Department of Natural Resources;
- (12) "endline" means that boundary line of any lease tract that is parallel or nearly so with the shoreline;
- (13) repealed 3/30/85;
- (14) repealed 3/30/85;
- (15) "lease" means a surface lease for shore fisheries development issued or held pursuant to these regulations;
- (16) repealed 3/30/85;
- (17) repealed 3/30/85;
- (18) repealed 3/30/85;
- (19) "monument" means a natural, physical, artificial, or record monument, as customarily used to appropriately define or mark an area;
- (20) "neighbor" means an adjacent commercial fisherman who is to be designated as right or left side, or seaward or shoreward neighbor;
- (21) "offshore" means those submerged lands lying seaward from the line of mean low tide;
- (22) repealed 3/30/85;
- (23) repealed 3/30/85;
- (24) repealed 3/30/85;
- (25) repealed 3/30/85;
- (26) repealed 3/30/85;
- (27) repealed 3/30/85;
- (28) "site" means setnet site, individual setnet location, setnet fishing site, and set gillnet site;
- (29) repealed 3/30/85;
- (30) "tidelands" are those lands that are periodically covered by tidal waters between the elevation of mean high and mean low tides;

Appendix J. Statutes and Regulations

(31) "tract" means a parcel of tidelands leased under this chapter and may include one, two, or three set gillnet sites;

(32) repealed 3/30/85;

(33) repealed 3/30/85;

(34) repealed 3/30/85;

(35) "party at fault" means the lessee or lessees who, following a dispute over tract or site boundaries or locations, is determined by the director to be in error;

(36) "permanent" means not capable of being readily dismantled or removed from a site or tract within the 24 hours after notification, without destroying the object dismantled or removed or damaging the site or tract, and does not include setnet anchors;

(37) "shore fishery diagram" means a graphic depiction of an applicant's or lessee's site which indicates the relationship of the site to local landmarks and adjacent or neighboring sites. Authority: AS 38.05.020, AS 38.05.082, AS 38.05.965
