

## V. TRANSFER SURVEY RESULTS

CFEC has conducted a survey of transfer participants since 1975. The survey collects information on the relationship between transfer parties, whether the transfer was a gift, sale, trade or inheritance, and for sale transfers, the type of financing used and the sales price. The survey has been the sole source of information for CFEC permit price estimates which are used by the Department of Commerce and Economic Development and the Alaska Commercial Fishing and Agriculture Bank for fishing loan purposes.

During the period 1975-1979 the survey was sent to all transferors and transferees, but its completion was entirely voluntary and anonymous. Because many surveys were not returned and because those that were returned could not be tied to other CFEC data, their usefulness was somewhat limited. Information from these 1975-1979 transfer surveys is not included in this report, but may be found in the first edition published in 1983.<sup>1</sup>

In 1980 the survey was modified. It was tied to other CFEC data sources, and made mandatory for the transferee to complete. In late 1983 the survey was expanded to include information from the transferor. Transfer survey results from the 1980-1998 time period are presented in the following tables.

Even though the survey was made mandatory in 1980, strict enforcement of this rule did not occur until 1981. There were 139 transfers in 1980 and 15 transfers in 1981 without completed surveys. Note that in every year some transfers occur and no transfer survey is completed for them, which accounts for the slight differences in the "Totals" columns between Table 1 and the tables in this chapter. The majority of transfers without surveys occur on foreclosed permits. Overall, the surveys represent 98.4% of all transfers since 1980 (19,082 of 19,386 transfers).

## **Relationships of Transfer Participants**

Of the 19,082 transfer surveys received during 1980-1998, 39.1% (7,468 surveys) indicated a transfer between immediate family members or other relatives, and 19.9% (3,797 surveys) indicated a transfer between friends or business partners. Permit exchanges between people who appeared to have no pre-existing relationship accounted for the remaining 7,816 transfer surveys (41.0%) (Table 16).<sup>2</sup> Many individual fisheries differ from the all years' statewide percentages.

From 1981-1988 the percentage of transfers between friend/partners decreased while from 1989-1998 the percentage of transfers between friend/partners has remained relatively constant. The rewording of the "Friend" category on the survey form to "Personal Friend" in October of 1983 may be responsible for part of this decrease and may also account for the relatively sharp increase in the number of transfers between persons in the "Other" category in 1984.

When transfers are organized by the resident type of the transferee, considerable variation in relationship patterns is evident among resident types (Table 17). Over half of the transfers to Alaska Rural Locals, for all years combined, were from immediate family members and relatives (57.8% or 3,253 transfers), which is almost double that of any other resident type. In the remaining resident types, the "Other" category predominated.

## **Permit Acquisition Method: Gift, Sale, Trade, and Other**

Under the Limited Entry Act's terms of free transferability, permits may be sold, traded, given away or inherited, thus enabling new participants to enter a fishery. During the 1980-1998 time period transfer survey responses indicated that 59.6% of transfers for all fisheries were sales (11,382 transfers), 34.7% were gifts (6,622 transfers), and 1.7% were trades (330 transfers). The remaining 746 transfers in the "Other" category comprised 3.9% of the survey responses (Table 18).

The incidence of gift transactions has accounted for roughly 30 to 40% of all transfers since 1980. Because gifts accounted for only 21.5% of all transfer survey responses in the 1975-1979

---

<sup>2</sup> If no transfers have occurred in a particular fishery, that fishery will not be shown on the table.

time period,<sup>3</sup> it has been suggested that the 1980-1998 percentage increase may be a result of regulatory attempts to enforce the leasing prohibition. If so, some of the “Gift” responses may actually represent lease arrangements or carry reciprocal expectations.

Individual fisheries often differ considerably from the statewide averages. While sale transactions predominated in most fisheries, gifts represented at least half of the 1980-1998 survey responses in 14 fisheries. Fisheries with lower permit values tend to have higher proportions of gift transactions than fisheries with higher permit values. Notable exceptions are the Peninsula/Aleutian salmon seine fisheries (high percentage of gifts and high permit values), and the hand troll fishery (low percentage of gifts and a low permit value) (Tables 18 and 20).

A breakdown of acquisition methods by the resident type of the transferee is presented in Table 19. Since 1980, a majority of the Alaska Rural Locals who have obtained permits through transfer have received them as gifts (51.5%). Sales have accounted for 62% to 69% of the transfers to each of the other resident types over the time period.

### **Permit Prices**

In Table 20, mean and median permit prices are given by fishery and year for permit sales during the period 1980 through 1998. Surveys that indicated permit prices of less than \$500 have been excluded from the computations.<sup>4</sup> To preserve confidential data, price statistics are not computed for fisheries in years with less than four sales transactions; also, no value will be reported for a permit if there were no sales transactions for that permit in a year. All of the prices are in nominal dollars which do not reflect adjustments for general price inflation.

Permit prices for the same gear type used in different areas of the state vary greatly (Table 20). For example, the median price of salmon drift gillnet permits varied in 1996 from \$60,000 (Southeast) to \$300,000 (Peninsula/Aleutian).

---

<sup>3</sup> CFEC “Changes in the Distribution of Permit Ownership in Alaska’s Limited Fisheries, 1975-1981,” February 1983.

<sup>4</sup> Permit price estimates produced for this report may differ from the CFEC estimated monthly permit value report due to the more stringent exclusion criteria used for the monthly report.

Generally, nominal permit prices of individual fisheries over the 1980-1998 time period have tended to increase through 1990, then fall from 1991 to 1998, especially in the salmon fisheries. Permit prices have remained fairly stable in the hand troll and AYK salmon fisheries.

### **Financing of Permit Purchases**

Transfer survey information on sources of financing used for 11,382 permit purchases is presented by fishery and year in Table 21. Beginning in 1990, additional data has been utilized from surveys in which more than one finance method was indicated. The decision rules used in analyzing these data are listed at the end of this chapter.

Statewide, self-financing of permits has been the predominant method of finance, accounting for 57.9% of all purchases during the 1980-1998 time period (6,590 permits). The next most important source of financing has been the Department of Commerce and Economic Development's loan program with 18.8% (2,135 permits).<sup>5</sup> Transferors financed 9.9% (1,122 permits), banks and other private lending institutions financed 7.6% (867 permits), the Commercial Fishing and Agriculture Bank financed 2.5% (280 permits), and processors financed 1.4% (158 permits) of the permit purchases. The remaining 230 (2.0%) survey responses which indicated multiple finance sources were placed in the combination category.

Both the percentage and the number of permit sales financed by the transferor have declined significantly since 1980 (Table 21). In 1980, 142 transfers were financed by the seller (27.7%); in 1998 only one transfer was seller-financed (0.2%). The percentage of self-financed purchases has tended to increase over the time period and the percentage of sales financed by DCED has been lower since the high in 1982.

Sources of permit financing by resident type and year derived from the Transfer Survey are provided in Table 22. The most commonly used methods of financing for the 7,877 permits purchased by Alaskan residents were the personal resources (Self/Other) of the transferee (52.4% or 4,124 sales) and DCED authorized loans (27.0% or 2,123 sales). Urban Alaska residents have

---

<sup>5</sup> The percentage of State-financed permits increases to 27.0% when only the purchases by Alaskan residents are considered (Table 22).

received about two-thirds (1,405 of 2,123) of the DCED loans. Nonresidents have the highest rates of self-financing (70.4%) and of financing through the transferor (14.3%) of the permit.

Finance source data from 1980-1998 have been re-evaluated in the following manner:

1. Survey respondents may mark “Other” on the survey form if they feel that their source of financing does not fit into the categories of personal resources, DCED loan, CFAB loan, other bank loans, transferor, or processor. A review of the comments associated with the surveys marked “Other” revealed that a large number of these involved unique methods of self-financing or loans from relatives or friends. Because of the strong association of the “Other” financing with that of the personal resources financing, those responses were combined and classified under a new “Self/Other” category thus eliminating the non-descriptive “Other” category for the purposes of this report.
2. For surveys where two finance sources were indicated but one of those sources was “Self/Other”, the finance source reported in tables of this study is that of the alternative finance source (other than the “Self/Other” category). The self-financing associated with permits financed by multiple methods is primarily in the form of a down payment or interim financing. The “Self/Other” category is intended to be representative of permit purchases that are primarily financed by personal resources rather than simply purchases involving a down payment (many financing methods involve a down payment).
3. Surveys involving three finance sources as well as the remainder of the two finance source surveys (i.e. those surveys that did not indicate “Self/Other”) are reported under the category of “Combination” financing in subsequent tables of this study.

\* Because permit prices of less than \$500 are excluded, average permit values in this table will vary somewhat from those reported in CFEC Annual Reports, which use different exclusionary criteria.

\*\* All instances where there are less than four transactions are masked due to confidentiality statutes.

Transfer survey information for DCED foreclosures are also excluded, however transfers from the DCED to other Alaskans are included.
