

VI. PERMIT TRANSFERS FROM ALASKA RURAL LOCALS TO OTHER RESIDENT TYPES

The long-term effects of limited entry on rural communities dependent upon fishing have been of considerable interest to the legislature, the administration and the public, especially the degree to which limited entry permits have been transferred away from these communities. Since 1975, two-thirds (66.7%) of the 7,801 transfers made by Alaska Rural Locals have been to other Alaska Rural Locals. This percentage has been relatively consistent, ranging from a low of 60.8% in 1982 to a high of 72.9% in 1994 (Table 5). The remaining 33.3% (2,597) of the transfers since 1975 have been to other resident types (cross-cohort transfers). This section will present information regarding only the cross-cohort transfers from Alaska Rural Local residents.

In every year except 1975, 1990, and 1997, cross-cohort transfers by ARLs have resulted in a net decrease in ARL-held permits -- in other words, ARLs have transferred more permits to other resident types than other resident types have transferred to them (Table 23). Through 1998, this cross-cohort transfer activity has resulted in a net decrease of 733 transferable permits held by Alaska Rural Locals. Statewide, the number of permits held by each of the other resident types increased through these ARL cross-cohort transfers as follows: Alaska Urban Nonlocal permits increased by 314, Alaska Urban Local permits increased by 88, Alaska Rural Nonlocal permits increased by 28, and Nonresident permits increased by 283.

From 1977 through 1986, decreases of permits held by Alaska Rural Locals due to net transfer activity ranged from 23 to 93 permits per year. Since then the annual net decreases have been less than 20. In 1998, the number of permits held by Alaska Rural Locals decreased by six permits as the net result of transfer activity.

Net transfer activity of Rural Local permits is presented in Table 24 for each fishery, all years combined. The same data are presented in Appendix D by fishery and year.¹ The Bristol Bay drift and set gillnet fisheries have had the largest net numerical decreases in rural local permits due to

¹ If there have not been any transfers of a particular permit type, that permit/fishery will not be listed on the tables.

transfer activity (216 and 165 permits, respectively), which represents 52.0% (381 of 733 permits) of the statewide ARL net transfer decrease.

While the Bristol Bay fisheries have had the highest numerical decreases in the number of permits held by ARLs, other fisheries have had larger proportional decreases. There are ten fisheries (other than Bristol Bay fisheries) with more than 5 permits issued with net decreases greater than 25% of the number issued to ARLs.

Table 25 provides information concerning the relationships between transfer parties for 1,992 Alaska Rural Local cross-cohort transfers that occurred over the 1980-1998 time period. The information comes from the CFEC transfer survey. As might be expected, most (61.2%) cross-cohort transfers of ARL-held permits were between persons who had no previous relationship.²

The acquisition method used in permit transfers from Alaska Rural Locals to other resident types for the 1980-1998 period is presented in Table 26. Most (78.5%) of these cross-cohort transfers were sales (1,563 of 1,992).

Transfer survey information on financing methods used in the permit sales from Alaska Rural Locals to other resident types is provided in Table 27 by fishery and year. The predominant source of financing has been the personal resources of the buyer (61.7%). DCED loans are also an important source of financing for buyers of permits held by ARLs (18.0%). These figures differ from the Alaska resident totals in Table 22 and suggest that other resident types who buy ARL-held permits tend to rely slightly more on self-financing and banks and less on state loans than do Alaska residents as a whole.

The survey information also indicates that since 1984 there has been a sharp decrease in the number of sales of ARL-held permits which have been financed by the transferor.

² The relationship question in the Transfer Survey form was reworded in October 1983 from “friend” to “personal friend.” This rewording may be responsible for part of the increase in the percentage of “other” responses after 1983.
