

VII. PERMIT TRANSFERS FROM ALASKA LOCALS TO OTHER RESIDENT TYPES

Local Alaskan permits, which are the combined permits from Alaska Rural Local and Alaska Urban Local resident types, are the focus of this section. Alaska local permits are defined as those held by persons who reside in the area near a limited fishery. Tables are provided on the transfers between Alaska Local permit holders and other resident types. They are similar to the tables in the previous section on Alaska Rural Locals.¹

In every year over the 1977-1996 time period, the number of permits held by Alaska Locals declined as a result of transfer activities with the Nonresident and Nonlocal resident types (Table 28). However, in 1997 and 1998 the number of permits held by Alaska Locals increased by 51 and 18 permits, respectively, as the net result of transfer activities. Over the 1975-1998 time period Alaskan Locals transferred 2,951 permits to other resident types. Alaskan Locals received 2,323 permits from other resident types which resulted in a net decrease of 628 locally held permits. Total net decreases were greatest in the years 1978 through 1986.

The corresponding net increases within the other resident types were 339 permits to Alaska Urban Nonlocals (54.0%), 236 permits to Nonresidents (37.6%) and 25 permits to Alaska Rural Nonlocals (4.0%). Transfers to the DCED or CFAB through loan foreclosures and subsequent resales by these agencies have resulted in a net decrease of 28 (4.5%) permits from Alaska Locals.

The cumulative numbers of transfers to and from local permit holders are presented for each fishery in Table 29 and by fishery and year in Appendix E.² By the end of 1998, the number of permits held by Alaska locals decreased in 30 fisheries.

Numerically, the greatest decreases in permit numbers have been in the Bristol Bay fisheries (381 permits), the Prince William Sound salmon fisheries (113 permits), the Peninsula/Aleutian fisheries (89 permits), and the hand troll fishery (66 permits). The Bristol Bay fisheries alone accounted for

¹ The 2,951 cross-cohort transfers from Local Alaskans represent 21.2% of the 13,920 transfers from this resident type. The remaining 78.8% were transfers to other Local Alaskans (10,988 transfers)(Table 5).

² Note that if there have not been any transfers for a particular permit type, that permit/fishery will not be listed on the tables.

60.7% of the 628 net decrease in the number of permits held by Alaska locals due to transfer. The net local shift in these fisheries was highest in the late 1970s and early 1980s but this shift has been reduced in the 1989-1998 period (Appendix E).

The power troll fishery (87 permits) showed the largest numerical gain in permits to Alaska locals.

The relationship between transfer parties by fishery and year is presented in Table 30. Statewide, survey responses indicate that 63.7% of the transfers from local residents to other resident types during the 1980-1998 period were between people who had no pre-existing relationship (1,467 out of 2,302).³ Since 1984 this percentage has ranged from 59.8% to 83.8%.

Transfer acquisition methods are presented in Table 31. From 1980 to 1998, 77.3% of the transfers from Alaska Locals to other resident types were sales (1,780 of 2,302 transfers). Statewide, the majority of all cross-cohort transfers (regardless of resident type) were also sales. Cross-cohort transfers appear more likely to be transfers between people without a pre-existing relationship and therefore are more likely to be sale rather than gift transactions.

Sources of permit financing are shown in Table 32 for 1,780 purchases where non-local buyers acquired locally-held permits. For all fisheries combined, 68.3% of the permit sales throughout 1980-1998 were financed through the personal resources of the transferee. This figure is higher than the amount of self-financing used by only Alaska residents (52.4%) and higher than the overall buyer percentage (57.9%) reported in Table 22.⁴ However, both tables indicate that since 1980 the use of personal assets to buy permits has increased. Table 32 also shows that DCED loans were used to purchase 11.3% of the permits transferred by Alaska Locals.

³ The relationship question in the Transfer Survey form was reworded in October of 1983 from “friend” to “personal friend.” This rewording may be responsible for a portion of the increase in the percentage of “other” responses.

⁴ Note that Table 22 includes both cross-cohort and intra-cohort permit purchases for each resident type.
