

# **CFEC Permit Holdings, Harvests, and Estimated Gross Earnings by Resident Type in the Bristol Bay Salmon Gillnet Fisheries**

## **Abstract**

Limited entry permit holdings, fishery harvests, and estimated gross earnings are broken out by resident type for the Bristol Bay salmon drift gillnet and set gillnet fisheries. Three resident types are considered: persons who reside in places local to Bristol Bay; persons who reside in Alaska, but in places outside of Bristol Bay; and persons who are nonresidents of Alaska. The resident status for a permit is determined by the residence of the end-of-the-year permit holder. This report also contains a description of the computer files and methodology used to generate the figures.
