VII. PERMIT TRANSFERS FROM ALASKA LOCALS TO OTHER RESIDENT TYPES

Local Alaskan permits, which are the combined permits from Alaska Rural Local and Alaska Urban Local resident types, are the focus of this section. Alaska local permits are defined as those held by persons who reside in the area near a limited fishery. Tables similar to those in the previous section on Alaska Rural Locals are provided on the transfers between Alaska Local permit holders and other resident types.¹

In every year over the 1977-1996 time period, the number of permits held by Alaska Locals declined as a result of transfer activities with the Nonresident and Nonlocal resident types (Table 28). However, in 1997 the number of permits held by Alaska Locals increased by 51 permits as the net result of transfer activities. Over the 1975-1997 time period Alaskan Locals transferred 2,861 permits to other resident types. Alaskan Locals received 2,218 permits from other resident types which resulted in a net decrease of 643 locally held permits. Total net decreases were greatest in the years 1978 through 1986.

The corresponding net increases within the other resident types were 338 permits to Alaska Urban Nonlocals (52.6%), 252 permits to Nonresidents (39.2%) and 27 permits to Alaska Rural Nonlocals (4.2%). Transfers to the DCED or CFAB through loan foreclosures and subsequent resales by these agencies have resulted in a net decrease of 26 (4.0%) permits from Alaska Locals.

The cumulative numbers of transfers to and from local permit holders are presented for each fishery in Table 29 and by fishery and year in Appendix E.² By the end of 1997, the number of permits held by Alaska locals decreased in 29 fisheries.

Numerically, the greatest decreases in permit numbers have been in the Bristol Bay fisheries (376 permits), the Prince William Sound salmon fisheries (111 permits), and the Peninsula/Aleutian fisheries (91 permits). The Bristol Bay fisheries alone accounted for 58.5% of the 643 net decrease in

¹ The 2,861 cross-cohort transfers from Local Alaskans represent 21.2% of the 13,466 transfers from this resident type. The remaining 78.8% were transfers to other Local Alaskans (10,605 transfers)(Table 5).

² Note that if there have not been any transfers for a particular permit type, that permit/fishery will not be listed on the tables.

the number of permits held by Alaska locals. The net local shift in these fisheries was highest in the late 70s and early 80s but this shift has been reduced in the 1989-1997 period (Appendix E).

The power troll fishery (82 permits) showed the largest numerical gain in permits to Alaska locals.

Transfer survey information from 1980-1997 describing 2,216 transfers from Alaska Locals to other resident types is provided in Tables 30-32. The relationship between transfer parties by fishery and year is presented in Table 30. Statewide, survey responses indicate that 63.9% of the transfers from local residents to other resident types during the 1980-1997 period were between people who had no pre-existing relationship (1,415 out of 2,216).³ Since 1984 this percentage has ranged from 62.2% to 83.8%.

Transfer acquisition methods are presented in Table 31. From 1980 to 1997, the majority of the transfers from Alaska Locals to other resident types were sales (77.7% or 1,722 of 2,216 transfers). Statewide, the majority of all cross-cohort transfers (regardless of resident type) were also sales. Cross-cohort transfers appear more likely to be transfers between people without a pre-existing relationship and therefore are more likely to be sale rather than gift transactions.

Sources of permit financing are shown in Table 32 for 1,722 purchases where non-local buyers acquired locally-held permits. For all fisheries combined, 68.1% of the permit sales throughout 1980-1997 were financed through the personal resources of the transferee. This figure is higher than the amount of self-financing used by only Alaska residents (52.1%) and higher than the overall buyer percentage (57.5%) reported in Table 22.⁴ However, both tables indicate that since 1980 the use of personal assets to buy permits has increased. Table 32 also shows that DCED loans are are used to purchase 11.6% of the permits transfered by Alaska Locals.

³ The relationship question in the Transfer Survey form was reworded in October of 1983 from "friend" to "personal friend." This rewording may be responsible for a portion of the increase in the percentage of "other" responses.

⁴ Note that Table 22 includes both cross-cohort and intra-cohort permit purchases for each resident type.
